

Boatasy ROPECLEANER - The cleaner of overgrown ropes

Ropecleaner offers a new way of cleaning different overgrown marine ropes (mooring ropes, lazy lines, etc.).

Its innovative design guarantees simple, fast and effective usage in the same way. You can easily twist Ropecleaner onto the overgrown rope in a few seconds. The distance between the spirals and their inner diameter is wide enough to insert the line up to 32 mm.

When the user pushes or pulls it on the dirty part of the line, separated parts of the shells, corals, and algae fall away and don't interfere with the cleaning process. Its heavy-duty structure resists as the spiral is made of strong stainless steel. The metal spiral of the Square section of 6 mm has sharpened inner parts, which efficiently cuts and remove various shells, corals and algae. The results from the test on different ropes show that it efficiently removes bigger and smaller shells, algae, mud, corals and other dirties.

Boatasy ROPECLEANER:

- it **simple substitutes the traditional cleaning** of the overgrown ropes. There is no need for underwater cleaning with the divers, or to dismantle the line and then clean it on the pier with the high-pressure cleaner,
- It is a **clean, environment-friendly solution** and completely substitutes cleaning with chemicals. You don't need energy for the cleaning machines, etc.;
- It **saves time**. A 15-meter-long overgrown line could be efficiently cleaned in less than 5 minutes. Compared to traditional cleaning is a few times shorter;
- **Easy to use** it could be used by different users - owners of the boats, harbour managers, marina staff, etc;

- **It saves time and money.** You don't need a high-cost underwater cleaning service or divers, who dismantle and then fix the rope from the underwater objects. You save money as you don't need energy and chemicals;

Boatasy is a registered trademark, launched in May 2017, by a team of experienced Slovenian sailors, facing the same problems over and over again - and decided to come up with easy and efficient mooring and docking solutions and innovative products, that would work for them and help others as well.

Due to ROPECLEANER many advantages, it has been also nominated in October for **The DAME Design Award 2022** - the largest marine competition in the world.

Products are available in major nautical shops all over Europe and on <https://boatasy.com>.
