

PRESS RELEASE
11.10.2023

NANNI REVOLUTIONISES THE MARKET WITH SOUNDLESS VERSION OF ITS MARINE GENERATOR, TO BE DISCOVERED AT METSTRADE.

Nanni will be exhibiting at Metstrade from 15 to 17 November 2023. Visitors will have the opportunity to discover a world first: the innovative SOUNDLESS version of the marine generator with sound shield. On the stand you'll find the Q2400 - 20CM50 model (20 kW, monophase and 50 Hz), equipped with its innovative acoustic materials that reduce the noise level to 61.7 db, the lowest on the market today. The T8V engine will also be on show, with power ratings from 235 to 272 kW, 320 to 370 hp and 3800 rpm.

A NEW STEP TOWARDS ONBOARD SILENCE

We know how important it is to have the right engineering on board to power all the equipment needed for optimum, safe navigation. With over 70 years' experience in marinization, Nanni wants to do it in silence, so that every sailor can enjoy the calm of the sea while cruising. That's why we're pleased to present the brand new SOUNDLESS version of our generators with acoustic insulation. The customer benefits don't stop there. This version has a compact design, is powered by a four-stroke diesel engine, and a cooling system by heat exchanger (sea water/cooling liquids).

COMPLETE MARINE POWER SOLUTION

NANNI strives for excellence by offering unique and complete marine solutions with powerful and robust products, from engines to monitoring and control systems, all powered by its generators, for both professional and leisure boating applications. To support its customers throughout the lifecycle of its products, NANNI has an extensive worldwide network of service centres with trained, qualified and responsive agents.
