

Mini Snubber

For \varnothing 10-12 mm rope.

A classic mooring compensator in a new innovative design

In addition to the present range of FORSHEDA mooring compensators Trelleborg now launches the new Mini Snubber, a perfect alternative for smaller boats.

Made of blue EPDM material it's extremely durable in all weather conditions and has an excellent weather, ozone and saltwater resistance.

Fit a Mini Snubber on your mooring line to reduce the shock load on the line as well as the boat's hardware. The Mini Snubber is available in one size for 10-12mm rope thickness.

Part no.	Length	Rope diameter	Maximum force
45242-1	196 mm	10-12 mm	1500N
