

Specialised Marine Housing Design and Manufacture

Dealer Stamp:

MarinePod®

MarinePod specialises in the design and manufacture of protective housings for marine electronics - "Pods". It offers the marine industry a unique approach to the common problems faced when trying to install the latest navigation or instrumentation displays on to a vessel. With a comprehensive range, MarinePod offers the highest quality products at prices that cannot be matched.

Custom Design

In addition to the standard range of Pods, the MarinePod design team can design and develop bespoke pods to individual clients specifications.

MarinePod is confident it has the skill, experience and industry contacts to deliver a product that will exceed all expectations.

QUALITY • SIMPLICITY • VERSATILITY

MarinePod® - Features

- Install to standard 9½" or 12" binnacle rails
- Versatility to install to non-standard binnacle rails
- i1, i2, C6 and W7 horizontal rail mountable
- Internally routed cables
- Bespoke seal and fastener design
- High quality custom designed, marine grade stainless steel brackets
- Supplied with 1", 1⅝" and 1¼" bushes for common diameter rails**
- Gore-Tex® vent technology
- Easy face removal/refit for servicing of displays
- Installed Pods leave binnacle rail free to be grabbed in rough conditions
- 290 degree, black or white swivel deck base
- Drill guide pips to aid installation

MarinePod® - The Collection

All Pods are available as either Helm (H) or Deck (D) mountable options, unless otherwise stated. Deck mounts are available with either a white base (DW) or Black Base (DB). When ordering please quote your chosen Model Name, along with the abbreviated mounting option. For example "i1-DB" for a deck mountable, black base, single instrument Pod. Alternatively if you require a Pod with no mounting option simply quote the Model Name. For example "i1" for a single instrument Pod only.
