

# MOSQUITO NET TO PORTLIGHT WINDOW

Keep mosquitoes away from cabin - mount a mosquito net on the window. Open the window, attach the suction cups on the window and fasten the mosquito net in place with the drawstring. The mosquito net is dense enough to keep small insects and gnats outside.

The mosquito net fits most windows on the market up to: 430 x 180 mm for rectangular hatches and 485 x 225 mm for oval hatches, internal dimensions. On window that opens inward, mounts the mosquito net on the outside. Fold the mosquito net after use to 1/3 of the size and store in the supplied storage bag.
