

MA-4000RC Series Infrared Remote Control Speakers

Poly-Planar's innovative Infrared Remote Control Speakers let you control the volume, the source – even the power – of your PolyPlanar audio center by pointing a waterproof, floating handheld remote control directly at the speaker. Control the sound from the cockpit or another cabin while your audio center remains protected below deck.

They combine a midrange polycarbonate cone with a 1" mylar tweeter for full range frequency response and handle 80 watts of peak power per pair. The optional waterproof remote features a convenient lanyard and floats if dropped overboard.

MA-9020 Gunwale-Mount Speakers

Mount these full-sized speakers out of the way under the gunwale, where they're protected from the elements, yet close enough to deliver rich, full sound. The molded, one-piece plastic grill protects the speaker components from splash and spray. The two-way vented port design offers full range response. Peak power 200 watts/pair.
