Boat Fenders**

# About HD Brown

HD Brown Enterprises began in 1971 as a small cut and sew business operating out of St. George, Ontario, Canada. In the decades since then we have developed into a multi-faceted organization servicing the needs of our customers through; manufacturing, importing, assembly, distribution, licensing and sales representation. Our retail division sells a number of products under a multitude of licenses across the sporting goods and automotive product lines.

## Why MicroGuard?

Boat fenders that appear black and dirty are actually covered in mold. MicroGuard™ drastically reduces the need to clean and maintain the product.

- Bacteria, Mold and Fungi can easily build up.
- This makes them unclean, unhygienic and odorous.
- MicroGuard's™ unique anti-microbial protection reduces bacteria.
- Prevents product degradation and discoloration.
- MicroGuard™ provides continuous protection for the life of the product.

*Moldy Boat Fender*

## Why Nitrogen?

- Maintains air pressure for 3-4 times longer than air
- It is environmentally friendly as nitrogen is present in the air we breath
- Reduces moisture which helps prevent premature material degradation
- Used by automotive, aerospace, government & military

# Boat Fenders

## ***R Series - Ribbed***

At Sidewind Marine™, our boat fenders begin where the competition ends. The R Series fenders are constructed using molded vertical ribs to enhance strength and minimize rolling. All our fenders use premium marine grade vinyl construction for superior durability. In addition, our fenders are soft and pliable to prevent scratching and have built in UV protection to guard against discoloration. Every Sidewind Marine™ boat fender uses MicroGuard™ so you can be confident that your fender will last forever without ever rotting, or developing mold or mildew...Guaranteed!

## ***T Series HEAVY DUTY Fenders***

TTR Fenders are one piece molded construction with no seams for unparalleled strength and durability. Reinforced ends provide exceptional strength where it is needed most. The vertical ribs further enhance strength and minimize rolling. Premium Marine Grade PVC has built in UV protection and along with MicroGuard™, assures the user that the fender will provide outstanding performance and reliability

## ***H Series - Center Hole***

Our heavy duty H Series boat fenders are designed to provide maximum protection on larger vessels. The center mounting hole runs the length of the fender to allow it to be hung either vertically or horizontally without the need for additional lines. With all the same features of the R Series fender, including MicroGuard™, this is unquestionably the premium boat fender on the market today.

## ***F Series - Ribbed***

F Series fenders bring safety to the next level. They are the best performing protection for your dollar. With Sidewind Marine's design innovations, this one piece design and seamless mold construction gives the F series fender the excellent strength and durability that you require to protect your investment. We have incorporated multiple ribbed reinforced ropeholds for vertical or horizontal use. Advance MicroGuard™ technology reduces bacteria and prevents product degradation and discoloration. F Series is available in a variety of sizes to provide your vessel with the level of protection you've come to expect from Sidewind Marine.

# Specialty Boat Fenders

**Replaceable  
Valves**

## Round Fenders with MicroGuard™

SMC9 – 9" Diameter  
SMC12 – 12" Diameter  
SMC15 – 15" Diameter  
SMC19 – 19" Diameter  
SMC23 – 23" Diameter

Heavy duty round fenders with replaceable valves, designed for sail boats, wakeboard boats, other large boats and commercial applications.

\*Available in white (WH) or fluorescent orange (OR)

## Bass Boat Fender with MicroGuard™

SMB10 – 5 1/2" x 16 3/4"

This unique fender is specifically designed for bass boats and other low freeboard boats. The specially designed 'gunwale arm' was engineered to rest on the top of the gunwale, if the boat slides under the dock this feature provides additional protection for the top of your gunwale. The 'gunwale arm' is developed with a center hole design to ensure maximum strength and the oval shape helps prevent rolling. Manufactured with the same quality as our other fender series, including MicroGuard™.

\*Available in white (WH) or black (BK)

# Dock Accessories

## Dock Edging with MicroGuard™

SME10 – 4" x 9" x 9" Corner piece  
SME20 – 4" x 18" Straight piece

Heavy duty vinyl construction provides maximum protection, easily mounts to either metal or wooden docks.

\*Available in white (WH) or black (BK)
