

**UK'S LEADING FUEL EQUIPMENT SPECIALIST**

## **FUEL STORAGE TANKS**

For SALE or available for HIRE

**Taylor Fuel Control offers a range of Steel Fuel Storage Tanks designed, manufactured and installed (if required). Our Tanks have been installed in some of the following: Truck and Bus Fleet Depots, Taxi firms, Farms, Marinas, General Plant Room Areas.**

### **Petrol Storage Tanks**

Petrol storage tanks are available from 1,000 litres up to 45,000 litres and are manufactured to meet the stringent guidelines for the storage of Petroleum spirit.

All tanks are supplied with a stage 2 B vapour recovery system, overfill device and tank gauge.

Tanks over 1,000 litres will require a pump to fill the tank which we can provide in various formats to suit your requirements. Together with modern pipework and leak detection systems they provide a safe way of storing fuel where space is not an issue.

Petrol Storage Tanks supplied to:  
UL 2085, ULC-S655 and  
ULC-S602 tested.

Unit 4 New England Ind Est,

# Diesel Storage Tanks

Generally manufactured in mild steel, tanks can also be fabricated in Stainless Steel for particularly aggressive environmental locations.

Our standard range of fuel tanks "The Enviro-Fuel-Store" are rectangular and cover sizes from 5,000 litres to 100,000 litres.

Each standard Enviro-Fuel-Store is of double skin construction and manufactured to BS 799 Part 5 requirements. The interstitial space between the inner Main Tank and the outer Secondary Tank functions as a fuel spillage safety containment zone.

All Fuel Tanks are air tested to .21Bar / 3PSIG complete with test certificate.
