

UK'S LEADING FUEL EQUIPMENT SPECIALIST

FUEL PONTOONS

Taylor Fuel Control design and manufacture four standard sizes of Floating Fuel Pontoons of 10,000, 15,000, 20,000 and 25,000 Litres capacities.

The fuel pontoons are designed for coastal sheltered environments, marinas and inland waterways.

Each pontoon is designed to provide a self-contained floating facility for the safe storage and dispensing of Petrol and Diesel fuel.

The structure is configured to provide buoyancy and to protect the fuel tank from damage. The unique design provides a safe, robust, stable and economic means of storing and dispensing fuel. The buoyant structure has a spillage containment area and a galvanized steel framework to receive the decking, fending and side skirts. It also incorporates the fuelling system and Kiosk control unit.

Unit 4 New England Ind Est,
Hoddesdon, Herts. EN11 0BZ
