Refuelling Arm

Our counterbalanced refuelling arm, complete with integral slewing ring, gives 360 degree rotation and outreach. Our standalone unit comes complete with steel base frame, flanged fuel connection, flexible end hose and automatic fuel dispensing nozzle. The refuelling can transfer pressurised Diesel and Fuel oil.

Fuel Pump Dispensers

We offer many types of dispenser, including:

- Electric - with a delivery range from 50 litres/min up to 200 litres/min
Complete with hose and automatic fuel dispensing nozzle
- Manual type hand pump - delivering up to 50 litres/min
- Rotary and Diaphragm models are available, with or without a Register
- 12V, 24V, 110V or 240 Volt model option

Hose Reels

A range of high quality hose reels are available, suitable for the fuel to be delivered at various distances from the cabinet.

- All reels are of robust construction with differing hose reel sizes available
- Finish can be galvanised steel or a stainless steel body option with either spring, manual or electric assist rewind
- Operating pressure range up to 10 bar (150 psi)

Fuel Management

The Management systems we provide are mounted in a weatherproof cabinet and are normally mounted in the tank security cabinet.

Data collected can be analysed to provide detailed information of fuel usage.

Environmental Protection

Our refuelling systems are designed and fabricated to comply with current Environmental Controls Legislation.

We offer a range of high quality Environmental equipment including;

- | | |
|-------------------------|--------------------|
| • Spill kits | • Full tidal booms |
| • Drain protection pads | • Skimmers |
| • Mini absorbent booms | • Rope mops |
