

Benomic Horti Star

The BENOMIC HORTI STAR owes its name to the fact that it is the star in the Benomic series. And that for an extremely competitive price. The pipe rail trolley is fitted standard with a double scissors, which can reach a height of 300 cm.

In greenhouse horticulture, pipe rail trolleys are often used for working at a height, especially in crop care. The star of the Benomic series. Hygienic, economical and competitively priced. Platform height between 54 and 300 cm and a running speed of 5-60 m/min.

HYGIENIC

Its smooth exterior makes the trolley easy to keep clean. There are no corners or edges in the frame where dirt can accumulate. Also, your crops do not suffer damage from sharp corners. The fencing is powder coated.

SIMPLICITY

The BENOMIC HORTI STAR is fitted with a strong, well-arranged dashboard with as few switches and control knobs as possible. Your employees will familiarise themselves immediately with the simple controls.

SCISSORS

The scissors have an entirely smooth finish, with closed head ends, so that crops and string cannot hook behind the scissor profiles. The hoisting weight is 250 kg, so this is more than enough for two employees.

DRIVE GEAR

The BENOMIC HORTI STAR is fitted with an economical 0.37 kW electromotor. This achieves a variable speed of up to approx. 60 m per minute.

LOW PRICE

New techniques and materials make smarter production possible at lower costs. With the BENOMIC HORTI STAR, we let you share the benefit. We have succeeded in putting the HORTI STAR on the market at a very competitive price compared with other models with the same features.

WE OFFER YOU

- Fast commissioning
- Easy maintenance
- Ergonomic system
- Stability and less contamination

Hortilife

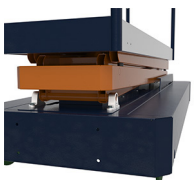

The clear dashboard, with as few switches and control knobs as possible, ensure quick familiarity with the controls and acceptance from the operator.

The foot pedal comes flush with the platform, this increases the ergonomic posture for the employee.

Easily accessible components and proven technology ensure simple and minimal maintenance.

The closed scissor components ensure high stability and a reduced risk of contamination from accumulated plant residues.

The BENOMIC HORTI STAR is made for carrying out harvesting and maintenance work to your crops at the right height. Stability, maintenance and ease of use were the starting points for developing the BENOMIC HORTI STAR.

Through the use of proven technologies, the BENOMIC HORTI STAR is reliable in use and low in maintenance.

Well-arranged controls and a selection of lifting heights ensure that activities are carried out in an ergonomically responsible manner.
