

We didn't set out to become the world's premier boat lift manufacturer.

We were simply looking for a practical solution for keeping boats clean and dry when not in use — without having to transport them inland — a solution that would enable anyone to launch or dry-dock the boat with minimal effort.

HydroHoist® boat lifts have evolved from a simple idea into a sophisticated, yet user-friendly, method of total boat care that is embraced worldwide. Using state of the art designing software and 3D modeling, each lift is professionally engineered and designed for its application.

HyPower™ provides a line of easy-to-maintain power pedestals suited for marina and RV applications with the patented PowerSnap® panels and weather bases paired with the EnergyMate® and PowerPort® pedestals.

RotoMoldUSA, centrally located in Oklahoma, provides superior rotomolding services — including the industry-known blue tanks for HydroHoist boat lifts, and additionally provides services to several Fortune 100 companies ranging from pharmaceutical to agriculture to transportation. Featuring equipment including McElroy® Fusion and Ferry® 280, RotoMoldUSA's design and engineering maximizes the benefits of rotational molding.

Accessories Boat & Dock Protection

The **Bow Guide** aligns the boat in the slip while protecting the keel. The **Corner Bumpers** provide peace of mind when pulling in to your slip, preventing the boat from making contact with the dock. Providing additional protection is the **HydroFender**™ — a high quality dock edge bumper designed to take the place of traditional rub rail. The **UltraFender**™ is perfect for transient gas and premium docks.

HydroLocker® Innovative Dock Storage

HydroLocker® is the most attractive dock locker on the market! Vandal-resistant hinges with internal fittings for added security to store your valuables. Constructed with UV-stabilized polyethylene making it corrosion and impact resistant. It provides a generous 11.5 cubic feet of clean dry storage and can double as a mounting stand for the **EnergyMate**®.

HarborHoist™

The **HarborHoist™** has a level-lifting frame constructed of high-strength grade aluminum.

- Most versatile, free-floating lift
- Continuous walkways full length of the lift for safety and access
- Boats from 4,400 lbs/1,995 kg to 25,000 lbs/11,339 kg

UltraLift™ SERIES

The **UltraLift™** Series offers lifting capacity up to 32,000 lbs/14,515 kg and comes in **Heavy Duty**, **Shallow Water** and **Front Mount** options.

- HSLA cast pieces 40% stronger than fabricated steel
- Drive-in or back-in
- Accommodates floating docks with U-shaped slips as well as extra-wide slips

HP EXTREME PWC DOCKING PLATFORM

The **HydroPort™** Series PWC docking platforms are ideal for all models of personal watercraft. Available in **HP Extreme** and **HP Pro** configurations.

- Easily adjustable 5" x 2" rollers
- Front or side-mount capability for fixed or floating docks
- 1,625 lbs/737 kg capacity

Ideal for fresh and salt water

HYPOWER

Unlike traditional power pedestals, HyPower offers the power where and when you need it with patented PowerSnap technology.

- **MARINAS**
- **RV PARKS**
- **HOME & EVENTS**

THE HYPOWER ADVANTAGE

- **PowerSnap Flexibility**
 - ◆ Pedestals can raise service levels while lowering maintenance costs
- **Customer Support**
- **TotalMarina.com**
 - ◆ 24/7 parts and common unit ordering
- **PowerSnap Tested**
- **Custom Colors, Light Lenses and more**
 - ◆ Add your own marina or RV Park logo
- **Metering for Electrical & Water**
 - ◆ Including Cloud-based Remote Read

PowerSnap panels are interchangeable from one unit to another for easy upgrades and service

PowerPort features an optional removable head unit which snaps out for safe storage

RotoMoldUSA™

PROVEN CAPABILITIES. MAXIMUM CAPACITY.

FERRY® 6000

MCELROY® FUSION

Whether you are looking to improve an existing product through the use of rotational molded components, or increase efficiencies in your manufacturing process, **RotoMoldUSA®** can deliver a custom product to meet and exceed your requirements.

WHY CHOOSE ROTOMOLDUSA?

- Company 50+ years strong
- ISO 9001-2015 registered
- Parts manufactured up to 18.5' (5.6 m) in length
- In-house mold maintenance
- Plastic fusion process
- Largest bi-axial rotational molding machine in the world — 18.5' swing
- Centrally located (U.S. Hub Zone)
- 3D rapid prototype printer
- Finite Element Analysis (FEA)
- Design assistance
- EPS foaming capabilities
