## GOST NT-Evolution 2.0 SM

Global Remote Security, Monitoring, & Tracking "Peace of Mind" Package

The GOST NT-Evolution 2.0 Security, Monitoring & Satellite Tracking Package includes the GOST NT-Evolution 2.0, two wireless remote key fobs, a set of wireless dual optical infrared beam sensors, a mini siren, high intensity strobe, a high water sensor and a pull sensor. This ruggedized, marine-grade system was designed to protect center consoles and other vessels that require a water-resistant solution. Protect your vessel from theft and make it impossible for your vessel to leave the dock or the back of your yacht without setting off the siren and strobe. The system will also alert you if someone disconnects the vessel's batteries, if the battery voltage is getting low or if the vessel starts to take on water.

The GOST NT-Evolution 2.0 SM package has been named the "Peace of Mind" package due to its ability to notify owners in the event of a security or monitoring event on board, as well as track a vessel after it has been stolen. Many insurance companies offer additional discounts for adding security & monitoring to your GOST tracking system.

1 each GOST NT-Evolution 2.0

2 each GMM-KF2  
Wireless Remote Key Fobs

1 each GMM-IP67-IBS2-Siren Out  
Infrared Beam Sensors  
*with output for siren & strobe*

1 each GMM-IP67-HWS  
High Water Sensor

GMM-IP67-Pull-25  
Water Resistant Pull Sensor

1 each GA-Strobe-White/Red  
High Intensity Strobe

1 each GA-Mini-Siren  
Water Resistant Mini Siren

### VOLTAGE REQUIREMENTS

- Input Voltage: 10-32VDC
- Short Circuit protection: Thermally Fused
- Average Current Draw @ 12VDC when battery backup is charged = 120mA
- Average Current Draw @ 12VDC when battery backup is charging = 800mA
- Time to Charge battery backup: Approximately 5 hours

Honorably awarded a medal  
from the U.S. Coast Guard for our  
assistance in vessel recoveries
