AUGUST 2014
INTRODUCING THE LATEST
IN HIGH-PERFORMANCE
ACTIVE FOOTWEAR DESIGN
FROM CHATHAM

OUR TECHNICALLY ADVANCED
AQUA-TECH TREAD+ SYSTEM PROVIDES
CONFIDENT AND ASSURED GRIP

Razor siping and engineered
siping ensures optimum grip
especially in wet conditions

OUR ANATOMICALLY DESIGNED
AQUA-TECH FOOTFLEX SYSTEM MIMICS
THE FOOT'S' NATURAL MOVEMENT

Medium density phylon
compound offers maximum
flexibility and cushioning

DEVELOPED BY
Chatham

MIDSOLE

Strategically placed drain holes allow water to disperse from interior of the shoe in under 10 seconds

Medium density phylon compound offers maximum flexibility and cushioning

Undulating design cups and supports the foot during activity

UPPER MATERIALS

Moron® 3 ply technical mesh

Soft woven lining next to the skin

Ultra lightweight open cell foam mid layer to increase air flow to maintain temperature

High abrasion resistant woven top layer

Abrasion resistant rubber toe and heel protection

Polynap facing and quarters offer low water uptake/quick dry performance

Sewn in quick glide eyelets with rot proof laces and water resistant velcro

LAST

Anatomical shape with a generous toe box

Low centre of gravity (only 4mm difference between fore-part and heel)

Asymmetrical

FOOTBED

Open cell structure allows water to pass swiftly and directly through to the midsole to facilitate water evacuation

Lightweight EVA with integral heel cradle

OUTSOLE

Latex rubber sole compound offers excellent traction in wet and dry conditions

Anatomical design flexes in all directions to mimic the foot's natural movement

Razor siping and engineered siping ensures maximum water displacement and optimum grip especially in wet conditions

Stitched at toe for added security

Distinctive, signature oval suction detail
