

# BLACKOUT CURTAIN FOR REGULAR HATCHES

- Pop up = 5 seconds mounting
- Fast mounting with suction cup
- Easy to store, folds to 1/3
- Fits all brands of hatches
- Mounts from the inside
- Thin, builds less than 3 mm
- Silver outside keeps heat/cold out
- Works also on deep hatches
- No peering in
- Dark when you sleep

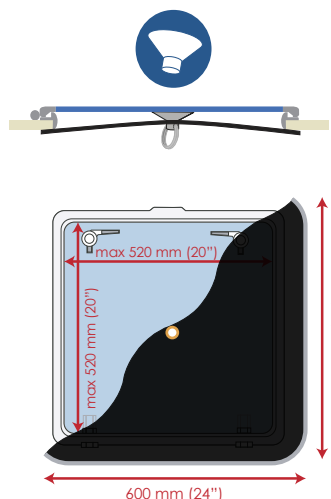

**To have a good night sleep** is important. We think we have a good solution to help you to get a better sleep. Our series of blackout curtains gives you that comfort.

Fits both fixed and open able hatches. Since the curtain is supposed to be bigger than the hatch (with a small overlap) the size is universal and fit most shapes of hatches, square, round, rectangular and small. On smaller hatches the overlap will be a little bigger. On deep hatches you need to prolong the suction cup with a small string (incl. in the package). Every curtain comes with storage bag.
