Siren Marine is the industry leader in **Connected Boat® technology** – allowing boaters to stay connected to their boats from anywhere, anytime.

Siren Marine provides you with **peace of mind** through real-time data & alerts so you know your boat is safe & secure – or when it's not. Smart boat monitoring means you spend less time worrying about your boat and more time enjoying it.

Security 1

Alert!

sirenmarine.com

Standard Features

Battery Monitoring

Monitor your boat's battery & receive alerts if voltage is low

GPS Position/Geofence

Track boat's location & receive alerts on boat movement

NMEA 2000

Best-in-class NMEA 2000 marine electronics backbone connectivity

Digital Switching

Remotely control multifunction displays, lights, refrigerator & more

Global LTE

The latest cellular technology connects you to your boat anywhere, anytime

Features with Add-On Sensors & Accessories

Engine Metrics

Monitor performance & support metrics for any NMEA propulsion system

Connected Fluid Tanks

Monitor tank levels (i.e. fuel, water, etc.) and check level history

Security/Entry

Add snap, motion & entry sensors for the ultimate boat security system

Bilge

Monitor bilge activity, including bilge run time & daily bilge cycles

High Water

Detect water and monitor water level in bilge

Shore Power

Monitor shore power connection & receive power outage alerts

Temperature

Monitor temperature of cabin, engine room, fridge and/or bait locker

Satellite Compatible

SirenSat provides smart boat location & tracking

Wireless Sensors 3.0

Siren 3 Pro delivers improved wireless connectivity

Siren 3 Pro

Siren Marine's Next Gen Technology

Welcome to the next gen tech – providing the ultimate Connected Boat® experience that keeps you connected 24/7 regardless of boat size, type or use. Together with our easy-to-use App & offering global cellular & optional satellite connectivity, our smart boat device connects you to your boat anywhere, anytime. Control your boat's lights, A/C & digital switching systems from the palm of your hand.

The Siren 3 Pro provides remote monitoring, helping your boat stay safe, secure & ready to enjoy.

Wireless Sensors

Siren Marine wireless sensors are easy to install and ideal for hard-to-access places.

Wireless Battery Sensor

Siren 3 Series Sensors Only Compatible with 3 Series Devices

Monitor battery voltage with the Wireless Battery Sensor and never worry about a dead battery again. Attach the Battery Connector to one of the boat's batteries and plug the other end into the Wireless Module. Link the module to the Siren 3 Pro and receive alerts if the battery voltage exceeds or drops below a preset level. Ideal for monitoring multiple batteries on a boat.

Wireless Temperature Sensor

Siren 3 Series Sensors Only Compatible with 3 Series Devices

Monitor the temperature of the cabin, engine room, bait locker, or fridge. Place the Wireless Module in the area that needs to be monitored, link the module to the Siren 3 Pro, and receive alerts if the temperature exceeds or drops below a preset level. The optional temperature probe can be used for measuring the temperature of specific equipment (e.g. engine) or hard-to-reach areas of the boat.

Wireless High-Water Sensor

Siren 3 Series Sensors Only Compatible with 3 Series Devices

The Wireless High-Water Sensor detects if there is water in the bilge and sends an alert to the Siren Marine App if water has risen above the preset level. Mount the Water Probe at the desired height in the bilge and plug the other end into the Wireless Module. Link the module to the Siren 3 Pro and receive alerts if the boat is taking on water.

Wireless Bilge Pump Sensor

Siren 3 Series Sensors Only Compatible with 3 Series Devices

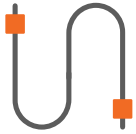

The Wireless Bilge Pump Sensor monitors bilge pump activity, including run time and daily cycles. Attach the Bilge Pump Connector to the bilge pump and plug the other end into the Wireless Module. Link the module to the Siren 3 Pro and receive alerts if the bilge pump exceeds a preset run time or cycle counts.

Wireless Entry Sensor

Siren 3 Series Sensors Only Compatible with 3 Series Devices

Receive instant notifications if there is unauthorized entry on the boat. Perfect for securing lockers, doors, and hatches. Install the Wireless Module on one side of the door or locker and the Open/Close Magnet on the other side. Link to the Siren 3 Pro and receive alerts when the door or locker is opened or closed.

Wired Sensors & Accessories

Siren Marine wired sensors & accessories offer reliable, maintenance-free monitoring. For a full listing of available sensors, accessories, and technical specifications, visit www.sirenmarine.com.

Canvas Snap Sensor

Compatible with Siren 3 Pro & MTC

The ideal security solution for boats that have a canvas cover. Simply replace one of the regular canvas snaps with the Canvas Snap Sensor. In the event the snap is opened, the Siren 3 Pro will send an alert to the Siren Marine App and can also trigger an audible alarm (*alarm sold separately*).

AC Shore Power Relay

Compatible with Siren 3 Pro & MTC

The AC Shore Power Relay is hardwired directly to the AC distribution panel. In the event shore power is lost, an alert is sent to the Siren Marine App. A certified marine electronics installer is highly recommended to install the AC Shore Power Relay.

DC Accessory Relay

Compatible with Siren 3 Pro & MTC

The DC Accessory Relay allows users to remotely control any 12V onboard device through the Siren Marine App. Devices can be activated manually or configured to be triggered automatically by an event.

Micro ePIR Motion Sensor

Compatible with Siren 3 Pro & MTC

This compact and flush-mounted motion sensor detects unauthorized entry. In the event motion is detected, the main device sends an instant alert to the Siren Marine App and can also trigger an audible alarm (*alarm sold separately*).

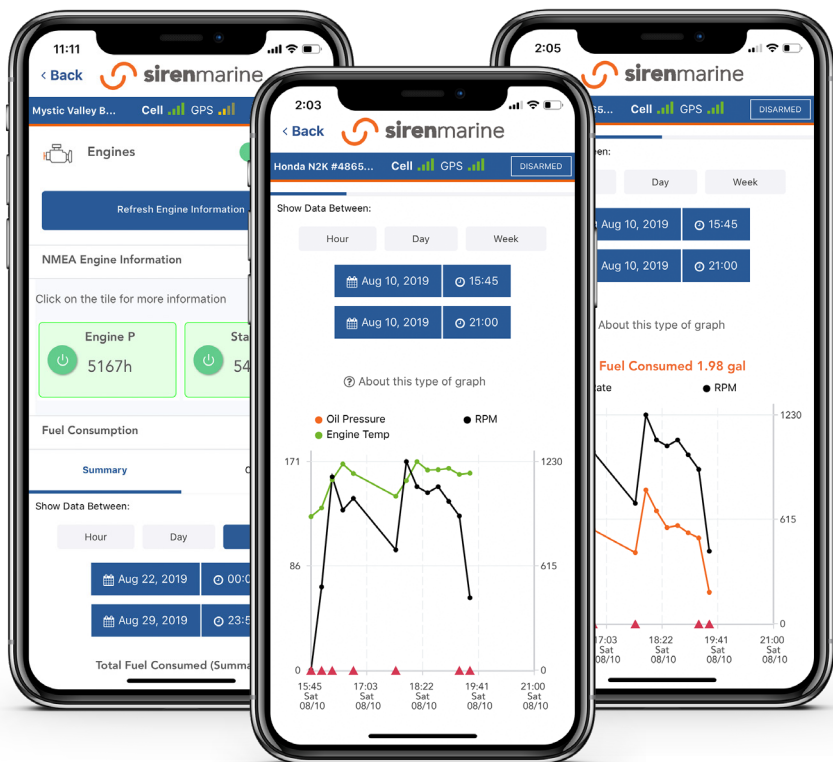

Audible Alarm

Compatible with Siren 3 Pro & MTC

This alarm emits a powerful audible alert (105 db) to fend off intruders. Can be paired to a security input to automatically trigger.

NMEA 2000 Connectivity

Engine Data

Receive performance, maintenance and support services for any NMEA-compatible propulsion system.

- Performance and Fuel Consumption
- Maintenance Cycles
- Connected Engine Support
- Engine Alerts

Connected Fluid Tanks

NMEA-connected tanks to monitor levels and check tank level history.

Fuel

Water

Waste

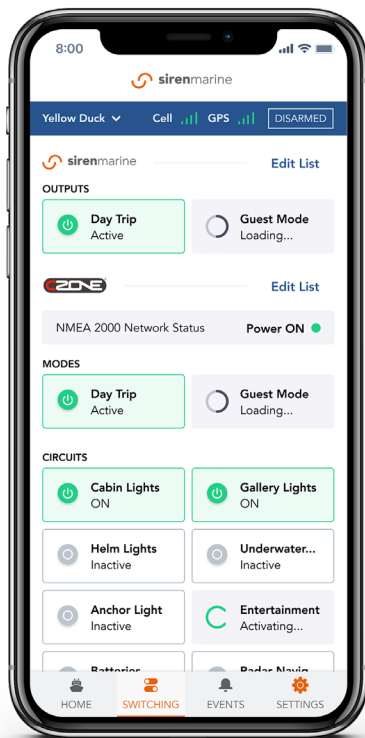

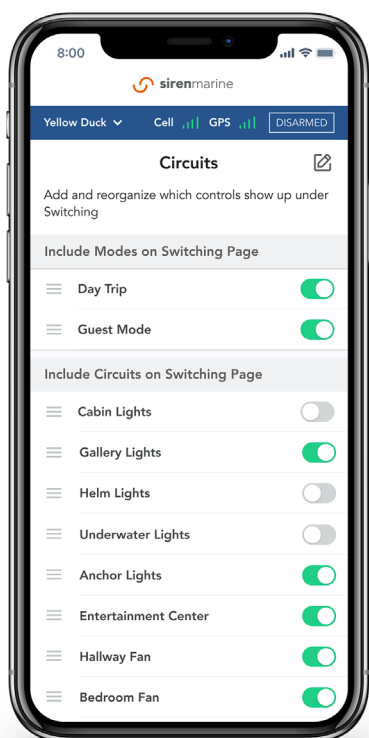

Peace of Mind
for Your Boat
& Family

Digital Switching

Another benefit of NMEA 2000 connectivity is the ability to interface with digital switching systems. This gives users the power to remotely control any integrated system aboard the boat.

- Activate any switch directly from your phone. Select any of your pre-determined "Modes" before you arrive at the dock.
- Remotely control the same modes as are set on your onboard switching control.
- Using the Siren 3 Pro or Siren MTC output control feature, turn on power to your boat's NMEA 2000 system, which drives all switches onboard.
- Quickly check if you left anything on after leaving your boat for the day.
- Activate any circuit onboard from anywhere at any time!

SirenSat Offshore

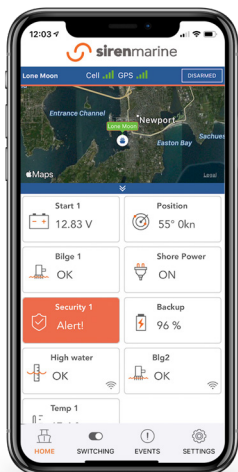

The new SirenSat Offshore Antenna allows users to track their boat, even after it leaves cellular coverage. A perfect solution for boat owners who keep their boats in theft-prone areas, SirenSat will update the location every 5 minutes when the boat is in motion. Satisfies insurance requirement for boats with multiple outboard engines.

*Requires SirenSat
Offshore Antenna &
Satellite Subscription*

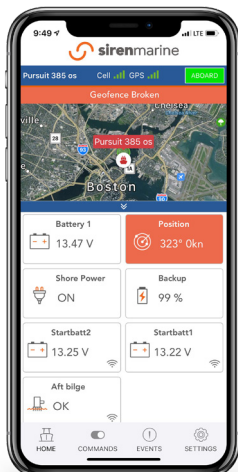

What's in the App?

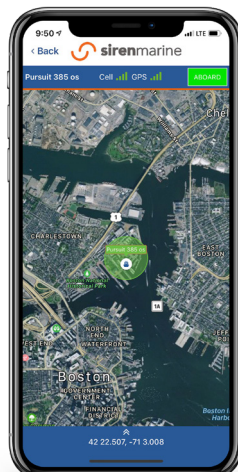

Dashboard

- Full boat status and location at a glance.
- Latest information on boat's status in one clean, intuitive interface.
- Set system to arm, arm aboard, or disarmed.

Alerts

- Receive instant notifications when a critical event occurs - multiple users/alert recipients.
- Notification through multiple channels - App Notifications, SMS, and Email.

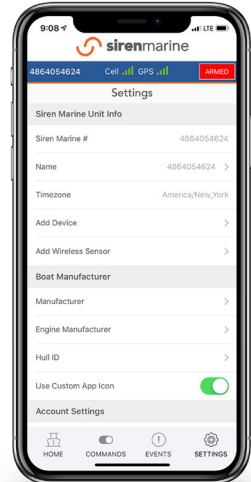

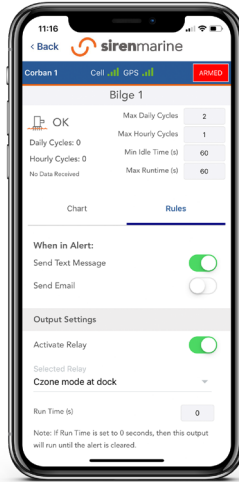

Geofencing

- Set a geofence boundary around your boat.
- Customize and adjust the radius surrounding your boat.
- Receive instant notifications when your boat leaves the geofence.

For more information visit

www.sirenmarine.com/pages/how-it-works

Sensor Detail

- Create user-defined custom settings and thresholds.
- Monitor activity through usage charts.

Rule Sets

- Activate rules when settings are violated.
- Enable text and email notifications for specific sensors.
- Automatically trigger outputs.

Settings

- Connect with your boat and select your personal preferences.
- Add account owners and additional alert recipients (including marinas & service yards).
- Customize your home screen to reflect your boat's system.

Partners

Siren Marine is proud to partner with leading boat builders, premier dealerships and service facilities to make the Connected Boat® a standard across the marine industry.

Subscription Plans

A subscription plan is required to send data between the Siren Marine device and the Siren Marine App.

Subscription plans can be purchased from sirenmarine.com.

Siren Marine Subscriptions

- Monthly Subscription
- Seasonal Subscription (Apr-Oct)
- Annual Subscription

An additional subscription is required should you choose to add the optional satellite antenna.

SirenSat Offshore Subscriptions

- 1 Year Subscription
- 2 Year Subscription
- 3 Year Subscription
