

CLEAR SYSTEMS

It's all in the Chemistry

CLEAR SYSTEMS

Sicomin has developed a unique range of clear systems that protect from UV and enhance the appearance of the finished components with a stunning high gloss finish.

TOP PRODUCTS

TOP CLEAR

Next generation coating formulation for clear carbon and other varnished components

Translucent, high gloss & permanent 'Wet Look'

UV stable, very fast hardening, self leveling

Brush or spray versions available

Ideal for clear carbon look, artwork and a high quality surface finish

Suitable for all materials including Carbon, Glass, Aramids, Wood and all commercial Foams.

SURF CLEAR EVO

Classic worldwide renowned epoxies for the Surf industry.

Provides the highest UV resistance of all the Sicomin clear resins.

High gloss appearance for transparent laminates, clear carbon parts and decorative goods.

Self levelling, sandable and scratch resistant.

GREEN CLEAR

Clear laminating and coating systems.

Based on Sicomin Greenpoxy made with more than 50% green carbon content.
Sustainable clear resins.

Features and Benefits

- Next generation, lightweight clear resin systems
- Suitable for all materials including Carbon, Glass and Aramid Laminates
- High mechanical performance and superior UV stability
- Brilliant high gloss finish for clear carbon, wood and composite components
- TOP CLEAR offers Sicomin's ultimate UV protection to clear epoxy laminates and is fast hardening and easy to apply
- Compatible with polystyrene, polyurethane, cross-linked and linear PVC foams
- Brush or spray versions available
