## **HOW WAS SALT&PEPPER CREATED?**

Fashion trends were not really showing through in the market, even though this can be very inspirational. That's why Salt&Pepper unites the fashion trends into one home- and tableware brand and became an international brand in 2001 with logistics hubs in Australia and Europe.

Starting in 1995, the core of the brand is located in Australia. However since two years, the international brand is also strongly focusing on the needs of the European market, which can differ from the Australian market. Salt&Pepper's design team draws its inspiration from architecture, cities, movies, pop culture, the latest fashion trends, and yes, even from the catwalk!

In order to allow the fashion-conscious people to express themselves, Salt&Pepper must maintain a wide range of collections containing something for everyone.

## **WHERE ARE SALT&PEPPER PRODUCTS DESIGNED AND MANUFACTURED?**

Salt&Pepper has two teams responsible for the designs of their ranges. One team that is located in Australia, and a European team that focuses on the local needs of the customers. These teams draw their inspiration from architecture, cities, movies, pop culture, the latest fashion trends, and yes, even from the catwalk! Salt&Pepper designs are modern and timeless, and fit into every contemporary home.

Production is carried out in various countries around the world. We work in a close collaboration with the best manufacturers for each type of product and material, and only the most prominent international partners are selected in order to guarantee the best quality at affordable prices.
