SEBO BS 360 / 460

WORKS FOR ME

Ready for new challenges. The SEBO BS 360 / 460 upright vacuum cleaners combine the proven design and performance of their forerunners with low energy consumption and a high quality HEPA filter system.

BS 360 / 460

MADE IN GERMANY

SEBO BS 360 / 460

PROVEN TWIN-MOTOR CONCEPT.

The SEBO 360 / 460 ECO upright vacuum cleaner continues the long and successful SEBO tradition of twin-motor upright vacuum cleaners. Proven features like the COMFORT power head, and the suction wand with telescopic tube combine with enhanced filtration ready for the requirements of the second stage of the European Ecodesign Directive for vacuum cleaners.

01 Flat construction

The BS 360 and 460 can work completely flat. With their low-profile design, they make it easy to clean under furniture.

02 Innovative power head

An electronic system advises the optimum setting for the 4-stage height adjustment and protects the motor and belt: If the brush is jammed it shuts down automatically.

05 Filter bag continuity

The SEBO BS 360 / 460 has a three-stage filter system featuring a micro hygiene filter, the same filter bag (1055) as previous models, and an HEPA exhaust air filter. This practical and allergy-friendly filter equipment guarantees a long service life and achieves best results.

03 Easy brush strip change

The brush strip of the power head can be changed without the use of tools, simply by pressing the release button.

04 Blockage clearing access

The self-closing flap on the bottom of the power head enables access to the suction channel to remove obstructions.

06 Practical attachment tube

The integrated attachment tube with its extendable telescopic hose gives you an additional range of 2,6 meters. This conveniently allows you to remove dust and cobwebs from previously unreachable corners.

Product features

- Two motors
- Tool free changeable brush strips
- Self-releasing foot pedal for more robustness
- Convenient clean out door
- Cable length 12m
- Practical attachment tube
- Three-stage filter system featuring a HEPA-exhaust filter
