

# ProTroller Series

## PROTROLLER SMART TABS TROLLING BRAKES AND TRIM TABS ALL IN ONE

- Reduce trolling speed by up to 35%
- Improve steering and tracking at ultra-slow speed
- Reduce fuel consumption up to 11%
- Eliminate the need for trolling bags and plates

*By simply moving a lever up or down, ProTroller SMART TABS switch between the most effective trim and stabilizer system on the market to the most effective trolling brakes available.*

## EXPECT MORE...GET MORE

ProTrollers incorporate the ability to transform **SMART TABS** into trolling brakes with the flip of the lever handle. In the 'up' (retracted) position, **ProTroller SMART TABS** function as trim tabs, using nitrogen gas actuators to automatically adjust the plates in accordance with water pressure, boat speed and payload to improve performance and handling. In the 'down' (deployed) position, the plates create equal braking on both sides of the boat. **This reduces trolling speed up to 35%, maintains steering control, eliminates prop restriction and promotes straight tracking at any speed.**

# ProTroller Series

## PROROLLER SMART TABS

### More Time To Fish

The **SMART TABS ProTroller** series simplifies trolling so the focus is on catching fish instead of navigating the water. ProTrollers improve acceleration, hole shot, ride and handling to reach the perfect fishing spot more quickly.

### More Choices

**ProTroller SMART TABS** are available in both marine-grade stainless steel and rust and corrosion free molded composite materials to accommodate consumer preference. Plate size and actuator resistance are determined by the boat size and horsepower prior to installation. ProTrollers are easily installed on most aluminum, wood, or fiberglass transoms.

### More Support

Each kit includes all mounting hardware, written installation instructions, and a free video which provides step-by-step instructions, component parts list and required tools. In addition, Nauticus technicians are available to answer specific inquiries Monday through Friday from 9:00 a.m. to 5:00 p.m. EST by calling 440-746-1290.

Nauticus, Inc. warrants to the original retail purchaser that **SMART TABS** will improve the overall performance of any planing hull power boat to the consumer's satisfaction. Contact Nauticus for complete details.

### More Bang For Your Buck

For about the same cost of a high end rod and reel combo, the **SMART TABS ProTroller** series automatically adjusts to sea conditions, without the need for expensive electric or hydraulic hardware and switches. Installation can be completed in an hour or less using a few common tools. Also, improved fuel economy saves time and money at the pump.

### More Durability

The **ProTroller SMART TABS** plates will not break if the tabs are accidentally left down during acceleration. In addition, retracting the ProTroller brackets eliminate tab breakage when rack storing a boat, beaching a tender, or in very shallow water conditions. Actuators are sealed in chemical and ultraviolet resistant EDPM rubber boots for extended life.
