## Transform the way you cook!

Grilling with a lid is a necessity but onboard space can be limited. There's no need to compromise quality of grilled food due to tight quarters with the patent pending collapsible SilKEN® Grill Lid.

Through the use of silicone, the lid can collapse to a height of two inches and removes for storage. The insulation quality of high temperature silicone allows for very fast and even heat. Cleaning is easy with a wet paper towel.

Ideal for all grill applications, the lid has two handles, one on top and one on the front edge, and vents through three sides. Use the front handle when the lid is hinged or the top handle when lid is placed over the grate.

The Kenyon SilKEN® Grill Lid is specifically designed for Kenyon electric grills and is available in a variety of colors. And as all Kenyon products, backed by uncompromising quality and the best customer service in the industry.
