TURNSTYLE DESIGNS  
**unique** architectural hardware

8th edition

Trading since 1992, Turnstyle Designs has been creating architectural hardware that is unique in both design and construction.

Every month a new, design, product or finish is developed, either for inclusion into our own range of products or as a custom piece for a client. Keeping up with this prolific level of creativity is a challenge in itself, many products are pre launched on our website in the "new products" section as well as being tested at various design exhibitions; the market gauged, rough spots ironed out and then the selection is edited down to the very best.

This is what has found its way into our latest catalogue, ideas and designs that have been honed, production systems and processes fine tuned to present only the very best British design and craftsmanship.

Turnstyle offers a broad enough palate to suit most styles, with enough choice of finishes and sizes throughout the full hardware gamut to make Turnstyle a one stop shop, regardless of the size of project.

Turnstyle Designs is a wholly owned private business, the staff are its family, we have pride in what we produce and how we look after our clients, the attention to detail goes into every aspect of our business from production to after sales service.

Whether specifying for a client or choosing for yourself, we hope you find inspiration in the following pages and of course if you have any suggestions or questions please do not hesitate to contact us.

# materials

---

## Made in England

Turnstyle Designs products are manufactured in the UK.

We only use the best materials on the market, and employ highly skilled specialist craftsmen, engineers and assembly workers for our production. We stand by our product in design, function and durability. Rest assured you are buying the best.

The main materials used in our products are laid out below:

## Composites

Our unique composite blends have become one of our trade marks: Incredibly versatile and durable, each piece is hand cast and finished and will pass through at least eight pairs of hands before being finally packed for dispatch. Every piece is unique with its own individually crafted character and charm. With the exception of Bone, all our composites are suitable for both interior and exterior use, including coastal environments.

All composites are made from a closely guarded blend of resins, mixed with core ingredients as listed on the following page.

## Leatherwork

All our leather door levers, door knobs and door pulls are hand stitched and bonded. Cabinet hardware, with the exception of The Saville range, is machine stitched and bonded, both highly skilled crafts, with years of training and experience that produce unsurpassed quality and some designs that are seemingly impossible to produce.

## The Leather

We only use the very best vegetable tanned, full grain (the top and strongest section), drum dyed, bridle leather. Our leather comes from cattle that are farmed outdoors without the use of barbed wire, which dramatically reduces scarred hides (which the cows also prefer).

Leather, like all natural materials will change with age, according to the situation, exposure to sunlight and usage (or lack of). The more you use it, the better, the oils from your hands feed the leather and adds a unique patina. Like an old handbag or briefcase, the character gets richer with age.

Tactile and seductive there is nothing better than the feel and smell of real leather, a natural choice for handles.

## Custom Leatherwork

Based on a minimum value we will either source different colours or use customers` own leather, please speak with our sales department regarding suitability of leather and design.

## Brass and Metalwork

Turnstyle uses a host of manufacturing processes to produce the best results, including hot forging, turning, stamping and wire forming. On the whole we use solid brass, apart from the Saddle and Combination D handles, where we use Zamak. Whatever the method, it is the finishing that counts, and our finishes are superb.

## Custom Metalwork

For prices on custom sizes, other plated finishes, or complete custom designs, please contact our sales department with full details of the project. See pages 64-65 for examples of some recent custom work.

## Variations

Over the years we have learned that with hand made products it is impossible to maintain 100% consistency with some of our materials. Subtle variations can occur from batch to batch, please allow for this.

## Technical details

For technical information regarding fittings and specification, please contact us or visit the download section on our website.

## Order Confirmation

Please note, the majority of our products are made or assembled to order, once assembled they cannot be dismantled, we urge you to double check all your confirmation copies (every order is confirmed in writing) to ensure details, finishes etc are correct before we despatch.

Machining composite lever grips

Leather hides in storage

Hand stitching leather cabinet pulls

Machine stitching leatherwork

## **Guarantee of satisfaction**

Apart from the many hands and eyes each product passes through during the manufacturing process, each and every product and component is quality checked in component form and after assembly.

The chances therefore of any of our product reaching a customer substandard or faulty is extremely remote. If, however you do find our product defective in any way, please contact us immediately for a replacement.

## **Environmental Statement**

At Turnstyle Designs we endeavour to keep waste to a minimum and recycling to a maximum. All office stationery and inward packaging is re used and/or recycled, outward packaging is 95% recyclable, energy is bought from renewable sources, brochures are printed on PEFC sourced paper.

We manufacture locally thus reducing our carbon footprint for transport, vegetable tanned leather, not chromium, and composite fillers are by-products. Waste materials are recycled wherever possible. Seconds and discontinued lines are sold on at below factory prices (see [www.knobstoyou.com](http://www.knobstoyou.com))

Our environmental stance does not come from a marketing perspective but a real need and recognition that we all have to reduce consumption and think about every element of what we use and how we use it. The future of the planet lies with all of us as individuals, if we all contribute and improve our lifestyles and way of thinking, we, as a collective can and will make all the difference.

Components storage

QA and assembly

## Composites

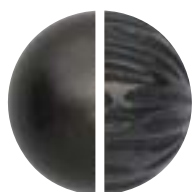

### **Ebony (EB)**

Dyed marble, sealed and then hand finished to create a beautiful and subtle sheen.

### **Cocoa (CO)**

New addition to the family. Dyed marble, stained and polished to produce a beautiful, subtle, rich dark finish reminiscent of Bakelite. Highly versatile in many styles.

### **Black Bronze (BB)**

A deep black with a slightly reflective bronze sheen. Bronze mixed with dyed marble and graphite.

### **Library Green (LG)**

Dark green composite, rich and unusual, dyed marble finished to a beautiful and subtle sheen.

### **Turnstyle Blue (TB)**

Great in bathrooms or for making a statement. Dyed marble mixture sealed to create a beautiful finish.

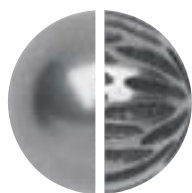

### **Lifeguard Red (LR)**

Be bold, bright and shameless, dyed marble composite.

### **Bone (BN)**

Dyed marble, hand polished to produce a soft and versatile finish suitable for contemporary or traditional settings, made to order, suitable for interior use only

### **Alupwet (AP)**

A blend of cold cast aluminium, pewter plus one or two hidden ingredients, deeply polished for many hours to ensure a long, long lasting finish

## Leather and wood

### **Chestnut (CN)**

A rich reddish brown, sold with an off white natural stitch as standard, a richer contrasting patina will develop with use.

### **Chocolate (CT)**

A classic dark brown, great with Oaks and dark woods, sold with a dark stitch as standard.

### **Black (BL)**

A solid classic, sold with black stitching as standard, a safe choice with any background.

### **Racing Green (RG)**

Reminiscent of great chesterfields, deep and dark, sold with an off white, natural stitch as standard. Made to order.

### **Yachting Blue (YB)**

A cool blue, with contrasting white stitch, funky and bold. Made to order.

### **Jazz Red (JR)**

A beautiful and daring choice, sold with a contrast white stitch. Made to order.

## Brass

### **Bright Chrome (BC)**

Hard wearing, reliable classic, easy to match with existing hardware and great for bathrooms and contemporary settings.

### **Satin Nickel (SN)**

Our most popular finish, contemporary and complements all our composite and leather finishes perfectly. Co-ordinates well with satin stainless steel too. An un-brushed satin to ensure a flat, even finish.

### **Polished Nickel (PN)**

Un lacquered classic finish, a beautiful blend with Ebony and Cocoa, not suitable for exterior use.

### **Dark Bronze (DB)**

A rich dark "living" finish with a lacquered patina over copper base. This finish is designed to change with age where handled, showing through base finishes which themselves will age.

Other custom finishes available subject to minimum order, see specials section on page 2

### **Codes**

Codes shown in catalogue only denote design. Please specify configuration/sizes when ordering.

## Miscellaneous finishes

**Satin Stainless (SS)** Saddle range of cabinet hardware and hinges only.

**Matt Nickel (MN)** On zamak components, Saddle and Combination D cabinet handles only.

**Antique Bronze (AB)** Bow and Strap handles and hinges only.

**Aqua (AQ)** Composite, only available with Shagreen design, or by minimum order.

**Polished Stainless (PS)**

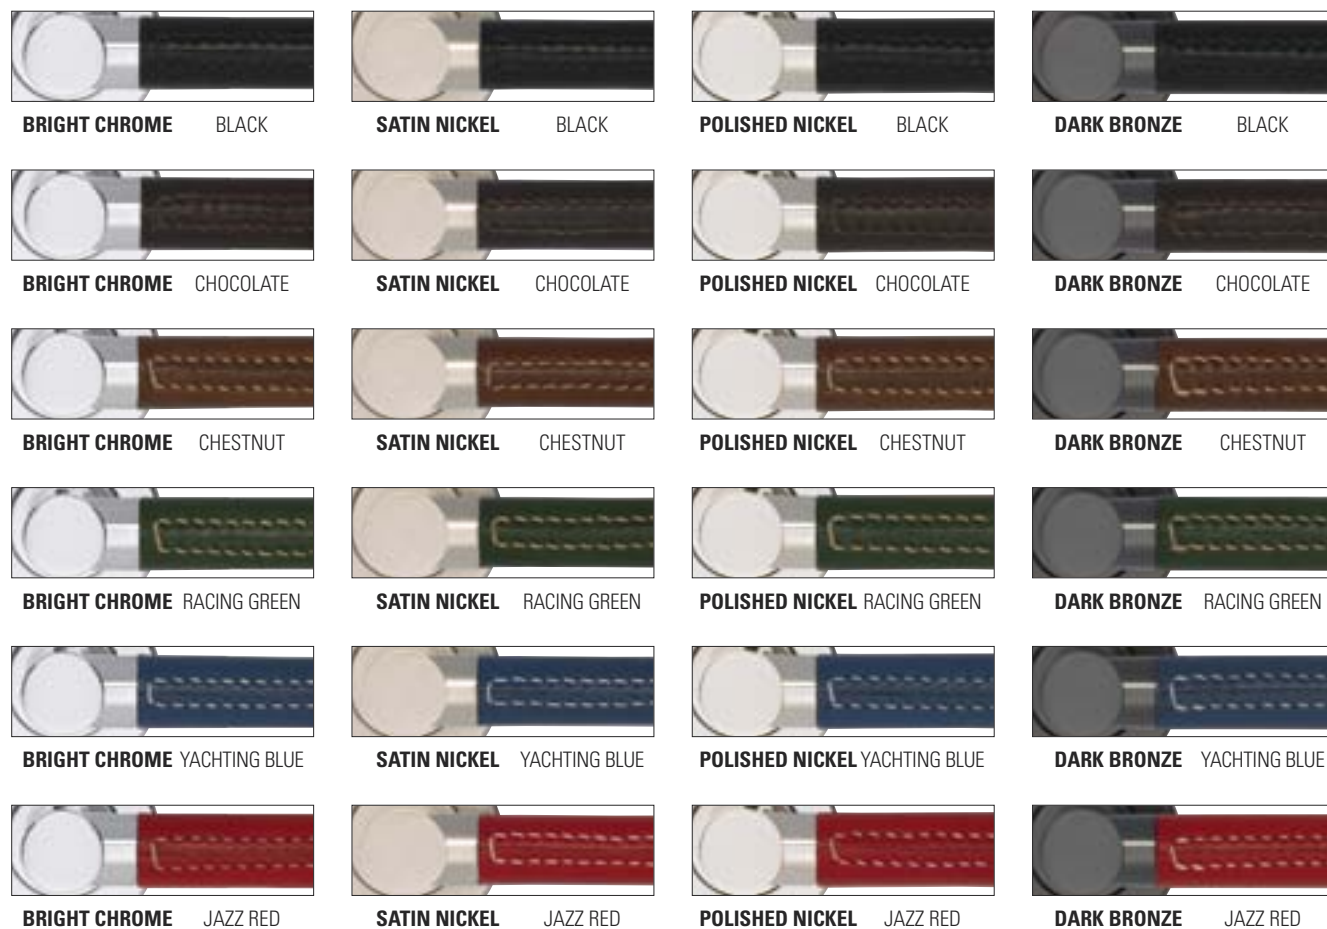

**Tan Leather (TN)**

**Satin Chrome (SC)** Switches and bow caps only.

# leather composite

Hand cast from hand stitched originals, in a blend of our composite resin and dyed marble, this range gives you the look of hand stitched leather at less cost. It will not age like real leather

Composite body  
Shown in Mocha
