“Seaview worked closely with us to supply a mast with our fairly extensive custom modification requests.”

Gary Johnson  
Applied Engineering Manager  
Navatek Ltd.

"We rig them to be "dream boats" with every conceivable option and technology. Seaview's flexible line of electronics mounting solutions makes it easy to fit our full system including radar, satellite TV and thermal night vision. Their customizable masts and mounts are rugged, reliable and they look fantastic too. They blend seamlessly with the design of today's modern sport-fishing boats and look totally built-in, not bolt-on. That's really appreciated by the boat builders we work with on these projects too."

# HERE'S WHY YOU SHOULD CHOOSE SEAVIEW

## PERFORMANCE

Seaview mounts will properly elevate your electronics to eliminate interference, safely clear those on board and encourage longevity of the electronics.

## DURABLE

Unlike any other mount available, Seaview takes the finish to another level. We Chem-Film (same process used by Boeing) each high grade aluminum part prior to our standard 3 part epoxy prime and powder coat to ensure the best possible finish and corrosion resistance.

## MODULAR DESIGN

Simple 3 step system to choose your Seaview mount and accessories. Visit the website for a simple selector guide.

1. Pick Mount Style
2. Select Top Plate
3. Choose Accessories

## SPACE SAVING

Compact Seaview mounts help you get all of your marine electronics with one simple solution. Small footprints and one center hole for wiring point of entry.

## HIGH QUALITY

Our Robotic Welding provides maximum efficiency while producing consistently superior welds. The Lincoln Fanuc 55E Single Station, AM120iC/12L with 6 axis robotic arm and 2 axis turntable was specifically programmed to weld our Seaview products.

This robot is operated by our very experienced welding team, manufacturing our Seaview products for stock, commercial and military applications including OEM parts.

"Monterey Boats exclusively uses Seaview mounts for all of their sport yachts and enjoys the quality and relationship they have with Seaview."

# LOW PROFILE ADAPTERS

## FOR MOST SATDOMES

Water tight seal fits between satdome and mount

AMA16

UV stable white ABS plastic

Marine grade aluminum

AMAGXF

### OPTIMIZE YOUR SATELLITE DOME INSTALLATION

The Seaview Low Profile Adapters will reduce the footprint of your satdome. Add an AMA-W wedge to your installation to level your satdome when installing on sloped surfaces.

- The AMA18, AMA18IP & AMA24 are made with ABS plastic with an internal anodized aluminum plate for superior strength
- The AMAGXF is made of powder coated marine grade aluminum
- Small mounting base for space limited installations
- Hides cables

### ACCESSORY | AMA-W

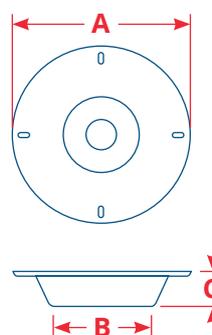

By rotating the AMA-W wedge halves you can achieve 0° - 12° of adjustment. The AMA-W wedge works with AMA-16, AMA-18, AMA18IP, AMA-24 and AMA-GXF only.

# ADAPTER PLATE

## FOR SIMRAD® HALO™ OPEN ARRAY RADAR

This Simrad Halo™ adapter plate is a great solution when replacing an existing Simrad Broadband 3G™, Broadband 4G™, Raymarine or Garmin closed dome radar. Mounting holes pick up existing radar brands mentioned above and the Simrad Halo™ open array. Halo24 works without adapter plate.

# MAST PLATFORMS

## FOR MOST RADARS & SATDOMES

Solid underbody construction not only greatly improves strength but also hides radar cables.

Predrilled to receive accessories such as a flood light or horn.

### ADJUSTABILITY

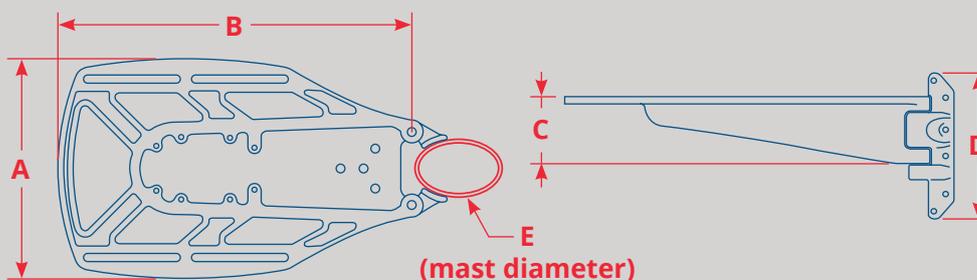

The SM-18-R is designed with fore and aft adjustable rails so that you can have the radar as close as possible to the mast.

### STRENGTH

Six stainless steel rivets with nylon washers to protect powder coat finish per foot are used to hold the heavy duty mounting feet to the mast.

- Fits 1", 1½" or 1¼" (25mm to 32mm) rails
- Cables routed internally through the clamp and into the rail
- UV protected ABS plastic housing
- Water tight gasket
- Tamper resistant security screws

## FAQ's

# TESTIMONIALS

HERE'S WHAT THEY HAVE TO SAY ABOUT

**SEAVIEW**

**Raymarine**

"Seaveiw has been a tremendous help to Raymarine USA on all of our demonstration boat projects. These high-performance boats make appearances at boat shows, industry events, fishing tournaments, on TV, and at lots of other high-impact events. Both consumers and members of the boating press and media come onboard to see the latest Raymarine technologies in-action.

We rig them to be "dream boats" with every conceivable option and technology. Seaveiw's flexible line of electronics mounting solutions makes it easy to fit our full system including radar, satellite TV and thermal night vision. Their customizable masts and mounts are rugged, reliable and they look fantastic too. They blend seamlessly with the design of today's modern sport-fishing boats and look totally built-in, not bolt-on. That's really appreciated by the boat builders we work with on these projects too.

Another thing that always impresses is Seaveiw's ability to deliver their systems quickly and accurately. No matter what combination of scanners, sensors and antennas I need to mount topsides, Seaveiw's team always seems to have the correct parts ready to go, and they deliver them on-time. The Seaveiw team is truly a pleasure to work with."
