Underline System

Scrubbis UnderLine System removes the fouling from your boat hull, while the boat is still in the water. UnderLine System handles soft and rough fouling, to achieve clean hull with less friction and a faster boat.

Easy and quick

Exploit the buoyancy force to simplify and quickly cleaning the hull.

Easy to bring

Foldable and easy to stow away in the boat with the detachable parts and modularity. Scrubbis is always available when needed.

Save money

Affordable tools to take care of your hull. A clean hull gives you up to 20% lower operating cost for motorboats.

Faster boat

Scrubbis makes your boat **up to 30% faster!** A clean hull creates a lower friction in the water.

Good for the environment

Using Scrubbis instead of using toxic paints or other chemicals is the solution to a major environmental problem.

Hull Scraper SET

Art.no 86102

With **Scrubbis Hull Scraper SET** you easily remove soft barnacles and other soft fouling from the hull. Clean the hull while the boat is in the water.

Hull Scraper SET is profitable and environmentally friendly solution to the problem of fouling on boats. It is a special tool to clean the hull in a time and cost effective manner. The cleaning head has a buoyancy of 2 kg / 4.4 LBS and a 3.2 m / 126 in long telescopic handle. Buoyancy distributed on the narrow scraper blades makes scraping force becomes very high and thus effective.

The cleaning head is equipped with flexible scrapers which effectively clean the hull. There is also a hard scraper blade for cleaning the harder fouling if necessary.

Included in the SET:

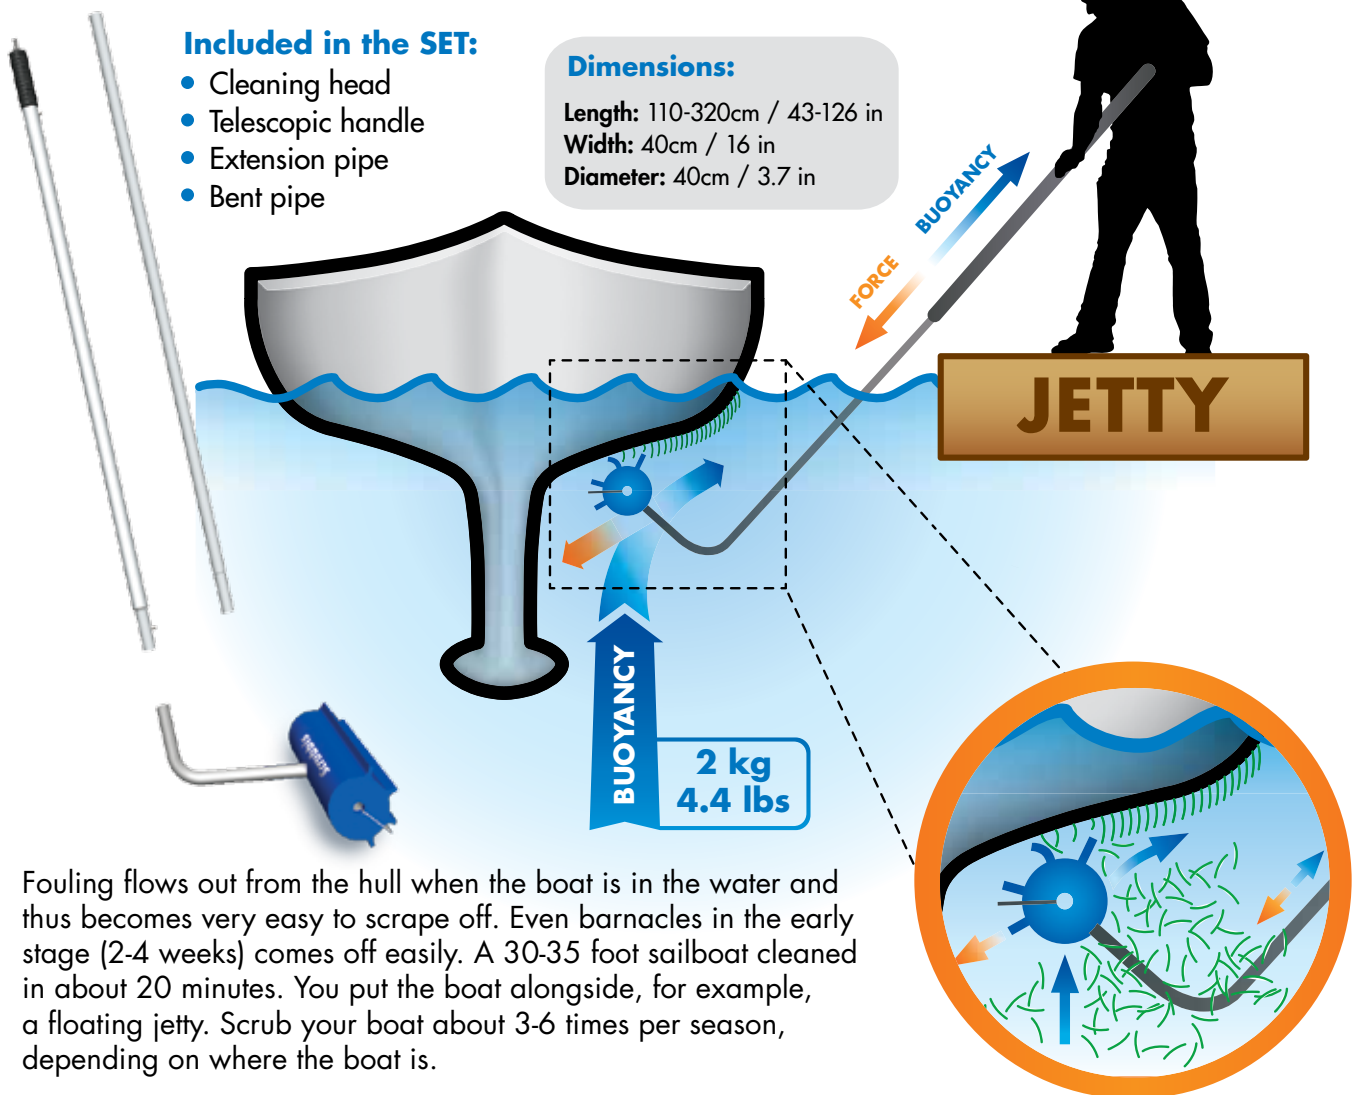

- Cleaning head
- Telescopic handle
- Extension pipe
- Bent pipe

Dimensions:

Length: 110-320cm / 43-126 in

Width: 40cm / 16 in

Diameter: 40cm / 3.7 in

Fouling flows out from the hull when the boat is in the water and thus becomes very easy to scrape off. Even barnacles in the early stage (2-4 weeks) comes off easily. A 30-35 foot sailboat cleaned in about 20 minutes. You put the boat alongside, for example, a floating jetty. Scrub your boat about 3-6 times per season, depending on where the boat is.

Groovy Head

Art.no 86152

Groovy Cleaning Head remove rough and hard fouling from the hull. Suitable for water with very heavy fouling.

Groovy Head is a cleaning head and accessory to Hull Scraper Set (86102). Replacing the usual cleaning head with Groovy Head. This is designed for tough and abundant marine growth, but not already hardened fouling such as shells. The cleaning head has a buoyancy of 2 kg / 4.4 LBS, which creates a pressure against the hull and facilitates cleaning.

For best results, we recommend that you first use Groovy Head and then switch back to the regular cleaning head. First you remove the heavy fouling and then the softer sludge and you get a clean hull.

<https://youtu.be/t0qMzobAbe8>

Dimensions: LxD: 40x11 cm
15.7x4.7 in

Regular Head

Art.no 86120

Regular Cleaning Head is a spare parts for the Hull Scraper SET to replace worn cleaning heads.

Spare part for Scrubbis Scraper SET (86102) to replace worn cleaning heads. With a new cleaning head you scrub the hull more efficiently. The worn-cleaning head can be thrown in the recycling.

Included in the package:

- Cleaning head with soft scrapers.
- Hard scraper.

Dimensions: LxD: 40x9,5 cm
15.7x3.7 in

Indicator Plate

Art.no 86106

With **Indicator Plate** you can see when it's time to scrub of the fouling from your boat hull. It's easy, fast and illustrative.

Tie the **Scrubbis Indicator Plate** with your boat or the jetty beside the boat. When the fouling grows on your boat hull it will also grow on the Scrubbis Indicator plate.

Once in a while during the season, lift up the plate from the water and look if there is any fouling.

If so, then it's time to scrub your boat hull with Scrubbis Scraper SET or other Scrubbis products. Also scrape of the fouling from the plate so you know you restart the indicator fresh.

Dimensions: WxH: 12x12 cm
4.7x4.7 in

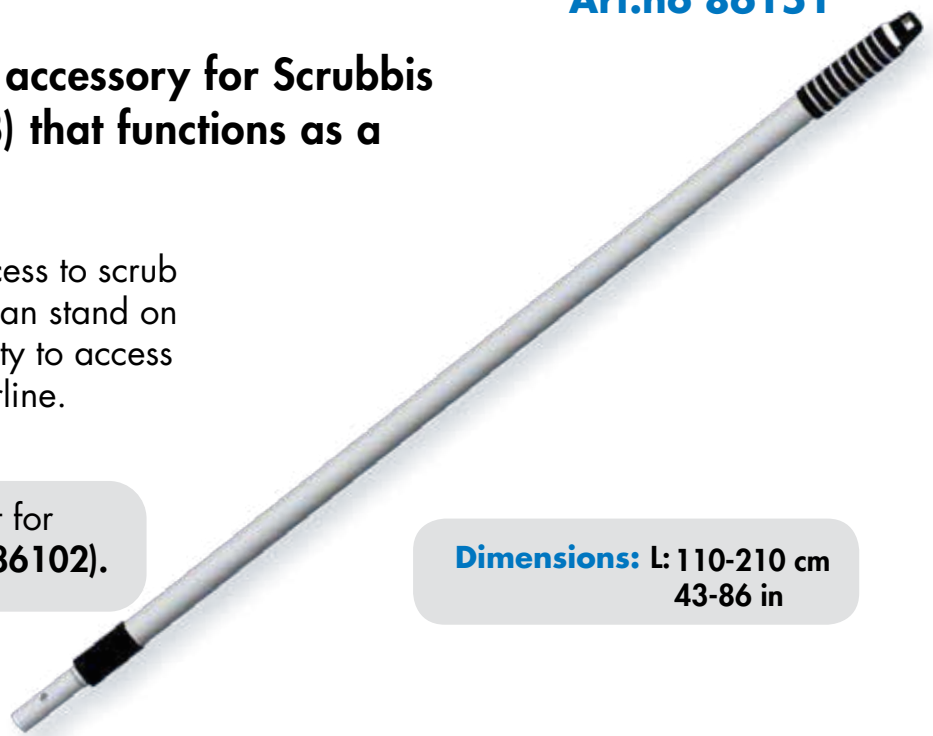

Telescopic Handle

Art.no 86151

Telescopic Handle is an accessory for Scrubbis WaterLine Brush (86103) that functions as a handle.

Telescopic handle enables access to scrub the hull at the waterline. You can stand on the deck or on an adjacent jetty to access and scrub the hull at the waterline.

This is also a spare part for
Scrubbis Hull Scraper SET (86102).

Dimensions: L: 110-210 cm
43-86 in

Waterline System

Scrubbis Waterline System consists of several products to easily and effectively manage, cleanse and care for the hull at the waterline.

The concept of Scrubbis Waterline System is to handle boat hull by the waterline, while the boat is in the water during the season. The waterline can be cleaned continuously and is always clean and nice during the season. Also, the dirt and the coating is moist and easy to remove while the boat is in the water.

The system is environmentally friendly when combining mechanical cleaning with mild detergent. No harsh chemicals or acids need to be used.

Waterline System

Waterline Brush

Art.no 86103

With Waterline Brush you will easily remove dirt and stains from the hull at the waterline. Suitable for smaller and larger boats.

Waterline Brush is an effective cleaning head for scrubbing the hull at the waterline. It cleans of dirt and stains such as grease, soot, oil and marine biofouling. Waterline Brush shall be mounted on telescopic shaft available in Hull Scraper Set (86102). You can also buy Telescopic Handle (86151) separately.

Waterline Brush is preferably combined with Waterline Cleaner Spray (86200) to get an effective overall solution towards the dirt.

Waterline Brush is used while the boat is in the water during the season, while the dirt on the hull is moist and easy to remove.

Waterline Brush

Brush Part:

One side with soft bristle fleece to scrub and brush.

Scraper strips:

One side for scraping and rinsing.

Buoyancy:

1 kg / 2.2 lbs buoyancy that helps and pushes against the hull.

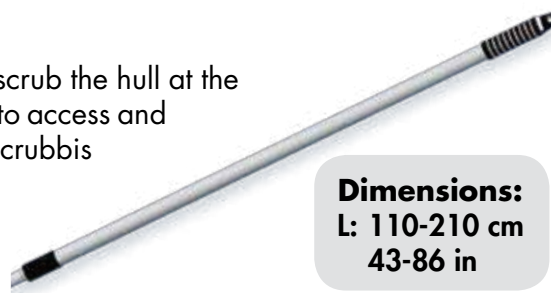

Dimensions: WxLxH: 8x20x12 cm
3x7.9x4.7 in

Telescopic Handle

Art.no 86151

Accessory for Scrubbis WaterLine Brush (86103) that functions as a handle. Telescopic handle enables access to scrub the hull at the waterline. You can stand on the deck or on an adjacent jetty to access and scrub the hull at the waterline. This is also a spare part for Scrubbis Hull Scraper SET (86102).

Dimensions:
L: 110-210 cm
43-86 in

Waterline Cleaner Spray

Art.no 86200

Waterline Cleaner Spray provides extra cleaning power to the Waterline brush. It dissolves the dirt and clean the hull at the waterline.

Waterline Cleaner Spray is specially formulated to clean the hull at the waterline from dirt and coatings. Spray it on the WaterLine Brush (86103) to create more efficient systems for cleaning.

Waterline Cleaner Spray and Brush is used while the boat is in the water during the season, while the dirt on the hull is moist and easy to remove. Cleaner Spray contains no chemicals that harm gelcoat, textile, steel or glass.

- 100% water soluble and mild.
- Contains no acids or harsh chemicals.
- Very effective in combination with Waterline Brush.
- Used during the season while the boat is in the water.

Size: 16.9oz/50ml.

DeckLine System

Clean the boat deck by reusing nature resources.

We at Scrubbis care about the nature and don't want to waste fresh water to do the ordinary cleaning of the boat deck. Therefore, we believe that using sea water to wet down the surface and brush it, is much smarter and more Eco-friendly.

In that way you can make the majority of the cleaning on the boat deck with sea water. If you have salt water, you can always use a little fresh water in the end to rinse.

DipDeck Brush

Art.no 86108

DipDeck brush is an EcoSmart 2-in-1 deck brush. Soak down and brush the deck.

Deck brush with built-in water container to wet down the deck while brushing. It is easier to brush and clean the surface when it is wet. Fill the container with water by dipping DipDeck brush in the sea or fill up with a water hose. The water will flow out through the brush.

The water container is a foldable bellow, which minimize the size for easier storage.

Fits with the Scrubbis Telescopic Handle (86151).

- Deck brush with built-in water container
- Dip and refill from sea water
- Water comes out through the brush
- Foldable water container to minimize storage size

Dimensions:

Width x Depth: 24x13 cm
9.5x5.1 in

Folded, Height: 18 cm ; 7.1 in

Expanded, Height: 35 cm ; 38.8 in
Volume: 4 L ; 135 OZ

Mooring & Hooks

How do you moor? In different situations you need to moor in different ways. With Scrubbis you find all solutions for your needs.

Mooring with Rope back

Thread the rope through a buyo or a jetty ring. Easy mooring and releasing.

Products in Scrubbis family:

- **Catching Hook & Mooring**

Mooring with hook

Hook to a buyo or a jetty ring. Secure and strong mooring.

Products in Scrubbis family:

- **Merx Hook**

Mooring with sling

Mooring to piles, bollards or cleats. Strong and and wear durable.

Products in Scrubbis family:

- **Scrubbis Sling**

Catching Hook & Mooring

Art.no 86107

CATCHING is a smart 2-in-1 boat hook, with multi-purpose functionality.

- Use it as a boat hook
- Use it to thread a mooring rope through a mooring ring.

CATCHING is a smart 2-in-1 boat hook with multi-purpose functionality.

It's a conventional boat hook and to thread a mooring rope through a mooring ring. Fits with the Scrubbis Telescopic Handle (86151), thus alleviating the need for yet another pole to carry on your boat. Swedish innovation CATCHING is yet another quality product in the Scrubbis family which saves you space and offers flexibility.

Rope: Ø8 → 2xØ22
Ø 5/16" → 2xØ7/8"

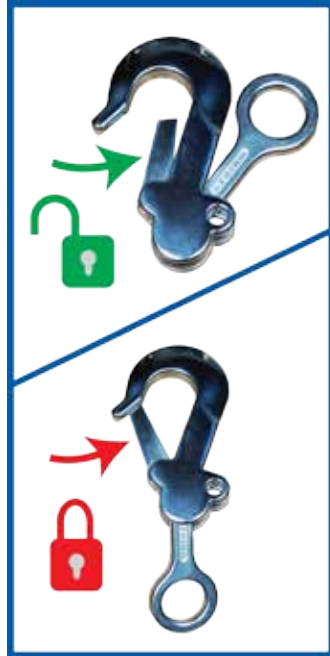

Boat hook

Mooring Finger

Merx Hook

Art.no 86111

Merx Hook is a strong & smart self-locking mooring hook.

Merx Hook is for easy and secure mooring on buoy or dock. The latch is locked when the rope is tensioned, which secure the mooring. When the tension is off and the hook is folded, the latch can be opened and the Merx Hook can be released. Strong marine stainless steel SS1316 that withstand 2500kg / 5500 lbs drag force. You can also use an additional padlock to secure the hook even more. Fits with the Scrubbis Telescopic Handle (86151) and HookGrip (86109).

- **Self-locking latch, during tension**
- **SS1316, 2500kg / 5500 lbs traction**
- **Can be locked with padlock**
- **Safe & easy mooring**

Sling

Art.no 86112

Scrubbis Sling is a strong and durable sling for morring on piles, bollards or cleats.

The Sling is made of very strong and durable material for mooring on piles, bollards or cleats.

It has a unique function where you can put it in HookGrip Holder (86110) and it will form a ring for easier mooring. Also when using it with the Telescopic Handle (86151) you get a reach up to 2 meter (80").

Scrubbis Sling make the mooring easy, secure and accurant.

- **Safer mooring**
- **Formed as a ring**
- **Longer and easier reach**
- **2500kg / 5500 lbs traction**

HookGrip Holder

Art.no 86109

HookGrip is a smart holder for mooring hooks, such as MerxHook, and slings.

It's an easy and smart holder for mooring hooks such as MerxHook and FlexHook and also for slings. When you place the MerxHook in the HookGrip, it will open the hook latch for easier hooking. Mount the HookGrip on Scrubbis Telescopic Handle (86151) and you will get a reach up to 2 meter (80").

The hooking of the mooring hook and slings becomes SAFER and EASIER.

- **Safer mooring**
- **Longer and easier reach**

Boat Hook Adapter

Art.no 86110

Scrubbis Boat Hook is a strong boat hook for mooring and handling buyo or deck.

The boat hook is an adapter to the Telescopic Handle (86151). It is detachable and easy to stow away when not used.

Also when using it with the Telescopic Handle (86151) you get a reach up to 2 meter (80").
