

## Our company

Folch Ropes is a specialized manufacturer of mooring ropes and tailor-made protections to ensure long life and elegant finishes. We export to more than 62 countries and our products stand out for their high resistance, sophistication and innovation.

Located in an idyllic setting from Barcelona, Folch family is proudly in the rope industry since 1942. We love and honour our past and we are always innovating for a future. We constantly look for your needs with innovation and sophistication to keep providing the best and highest quality product and service.

Our ropes are made of high strength and high quality raw materials and customized finishes to satisfy all your needs and give the best touch to your motor yacht.

Folch's Super yacht and Mega yacht line include ropes specially designed for mooring, tender and toys, to satisfy the specific requirements of Super yachts and Mega yachts.

In a calmed or agitated sea, Folch is always the best mooring line.

Technical and sophisticated perfection for the best safety in the harbour.

## Mooring lines

Folch Mooring lines are designed to give the best performance, look and safety to your motor yacht when in the harbour.

Our mooring line is the perfect rope for your Super yacht and will provide excellent breaking load, abrasion resistance and excellent lifetime.

Our mooring ropes are double braided, 3 strands and 8 strands ropes in high resistance polyester and and polypropylene multifilament in the best quality.

Lengths and colour are made to order according to the mooring plan of the Super yacht.

Sophisticated and customised covered splices made by specialized hand made marine professionals, with the best Spanish bull leather, which gives an elegant finish and protects the rope from all possible frictions.

Lengths can be embroidered in the spliced leather as well as the name of the Super yacht.

*From 14 mm to 90mm diameter.*

## Towing lines

Folch towing line is the perfect rope for Toys and Tenders in the sea.

It is specially designed to prevent unwanted twisting of the rope when floating in the sea.

It is a lightweight and floating 12/16 strands rope made of High resistance HMPE Dyneema in grey color, to give the best strength or made of polypropylene in yellow colour, which maximizes the visual safety of the rope.

Lengths are made to order according to the needs of the motor yacht.

We can supply our towing line with splices and/or stainless thimbles ready for towing use.

*From 10 mm to 44mm diameter.*

## Fender lines

Folch fender line is a double braided rope designed to give the best resistance and an elegant look. It is a soft and manageable rope that enables multiple knots.

Our fender line will be the perfect rope for your fenders and will provide excellent breaking load, abrasion resistance and excellent lifetime.

16 strands rope nicely braided in high resistance polyester in a wide range of colors.

Lengths and colour are made to order according to the needs of the Super yacht.

We can supply our fender lines with splices to tie up the fender on the cleats.

*From 6 mm to 16mm diameter.*

## Folch Chafes

To guarantee the best protection to our mooring Ropes, we have chosen the best materials to give a perfect finish. Our protections can be customised in Spanish bull leather, marine treated, as well as high quality Polyester and HMPE Dyneema cover, which guarantees the best results.

The leather, available in a wide range of colors, can be embroidered with the length of the rope or even the name of the Motor yacht, to offer an exclusive and sophisticated design.

*Folch chafes can be supplied for our mooring line and fender line.*

## Finishes

To meet our customer needs, we can supply our products with different finishes:

- **Spliced ends / Loops in multiple diameters and lengths.**
- Thermo fixed treatment to lead all fibres working in unison.
- Coating which increases the rope resistance to rubbing.
- Shackles / Thimbles.
