

Marinefloor

modular pontoon

MARINEFLOOR BoatFloor System®

The MarineFloor® BoatFloor System® is the ideal solution to maintain a boat out of water, ready for use, accessible in safety for loading equipment or get on board. The maneuver is easy, thanks to the propulsion of the engine. Simple and efficient, our BoatFloor System has no metallic piece or mechanic system. It requires no particular maintenance or no power supply.

Designed for most outboard or SailDrive boats, our boat base can be integrated into a MarineFloor® EcoSystem® cubes platform or completed with an access pontoon, assembled with additional boat bases (for rental activity, ...), and allows you to maintain your boat out of water, safely ready to go.

Dry boat
Ready to use
Safely
easy to use
maintenance free

Focus Points

- Modular and extensible system without corrosion and maintenance
- Complete boat protection, without any effort
- Stability while loading / unloading - Anti-skid surface
- Maintenance and reparation with your boat out of the water
- Adapted to different lengths and beams and to your marina berth
- Economic: No more lifting and a better lifetime for the boat
- Ecologic: No more antifouling
- Boat highlighting

« The base is composed of a set of elements linked by centre pins. They fit closely the shape of your boat by a progressive thrust. In the meantime, the boat is guided by rolls fixed in each slider. The manoeuver is easy thanks to the engine. When the boat is on the sliders, you simply need to pull up the propeller out of the water and to moor the boat to the base. To go back in the water, lower the propeller so it is fully immersed, engaged the reverse gear and the articulated structure will put the boat down softly. »

Compatible with all brands *
Semi-rigid or rigid boat
From 4 to 9 meters, up to 4 tons
Outboard engines and SailDrive

Technical characteristics

Weight : 6,5 kg/cube
Buoyancy : 360 kg/m2
Resistance of
assembling rings : 2 t
High impact resistance
Rigidity of the assembly
Anti-UV & Anti-static treatment
Flame retarding & frost resistance

* Subject to validation by our technical team
