New Products

2021-2022
By HABA

Why HABA?

- Fast delivery
- Innovative products
- Quality control
- Big quantity in stock
- Single point of contact
- Custom made service

Hi there,

First of all, thank you for being a partner with us.
In this document we present to you the new products from HABA for the upcoming year.

We want to make our customers #happycampers:
People who love being outdoors or out to explore whether it's with their tent, motorhome, caravan or boat.

Whatever our customers love to do, we love making their lives, while they are outdoors and exploring, easier with you, because...

Together we make the camper's life better #happycampers

Tivoli

The Tivoli is a modern square ceiling light. The very flat model is made of the plastic PMMA, so it is also lightweight. PMMA looks like glass, giving it a transparent look.

The light is evenly distributed in the ceiling fixture, so there are no harsh shadows and there is a strong light emission over the entire surface. The brightness of the Tivoli can be adjusted with an external LED dimmer. The Tivoli can be either surface mounted or recessed.

4305800 Tivoli ceiling light

Tivoli plafonnière LED 12V zonder schakelaar
Tivoli ceiling light LED without switch
Tivoli Deckenleuchte LED ohne Schalter
Tivoli plafonnier LED sans interrupteur

Dimmable	Yes
Dimensions(LxWxH)	210x210x13mm
Wire length	200mm
Net weight	240g
Material	Plastic
Colour	Transparent/mirror/frosted

New products by HABA 2021-2022

Daiano

The Daiano light is a LED bar with high brightness to illuminate the working surface inside a caravan, motorhome or boat. The frosted cover diffuses the light within the fixture, giving an even distribution of light. The Daiano is expandable with one extra LED bar to create a bigger light surface. The Daiano luminaire has a luxurious appearance and has 3 light settings to bring just the right amount of light necessary, which can be controlled by touch.

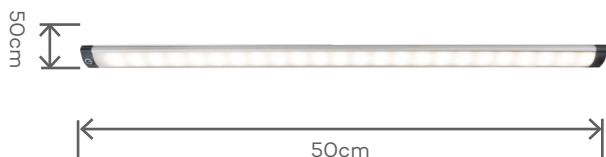

Dim/touch switch

3 light settings

1m cable to connect 2 LED bars
or to connect to 12V DC

External dimmable	No
Switch type	Touch
Dimensions (LxWxH)	500x25x9.5mm
Wire length	1000mm
Net weight	126g
Material	Aluminium
Colour	Silver grey/frosted

HABA

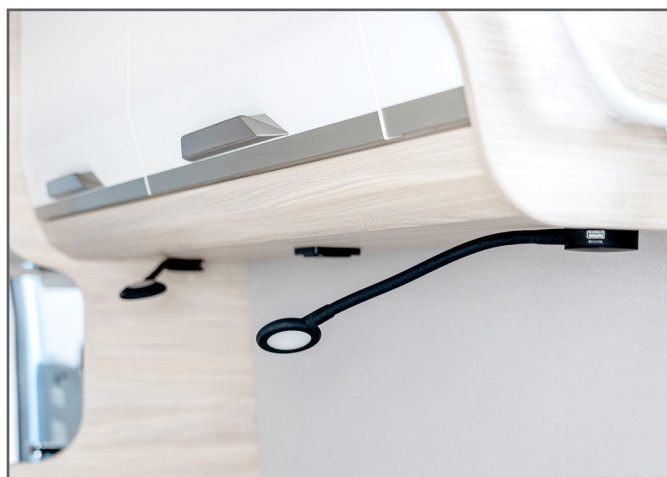

happy campers

Verona

The Verona is a modern surface-mounted spotlight with a flexible neck. The flexible neck allows the light beam to be directed properly at the desired surface, as may be necessary when reading a book, for example. Due to the flat and flexible model, the surface-mounted spotlight is very suitable for building up in smaller spaces, such as near a bed.

With the touch switch, the metal part, on the top of the head, the Verona can be turned on and off, and the light intensity adjusted (dimmable). As an additional feature, 1 of the 2 models, has 2 USB charging ports with high charging current to charge for example, a mobile phone or even a tablet. Easy and invisible mounting through screw holes under the bayonet cap of the base of the spotlight.

● 4306912H Verona flexible spot

Verona flexibele silicone spot met touch/dim schakelaar

Polarity sensitive	Yes
Dimensions(LxWxH)	372x60x20mm
Wire length	300mm
Material	Steel/plastic
Colour	matt black
Amount of USB ports	2
Output current USB	1x 2.0A and 1x 1.0A

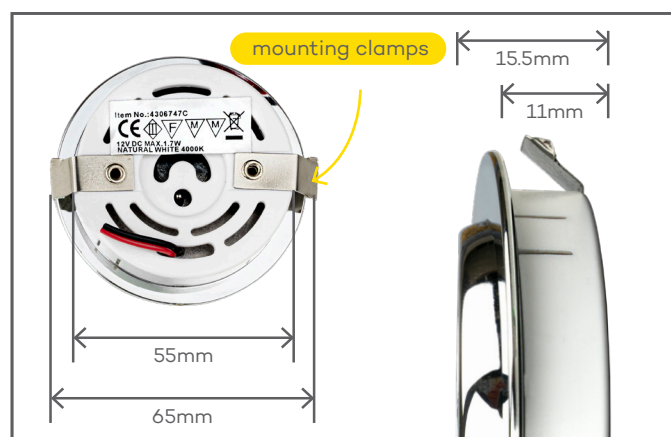

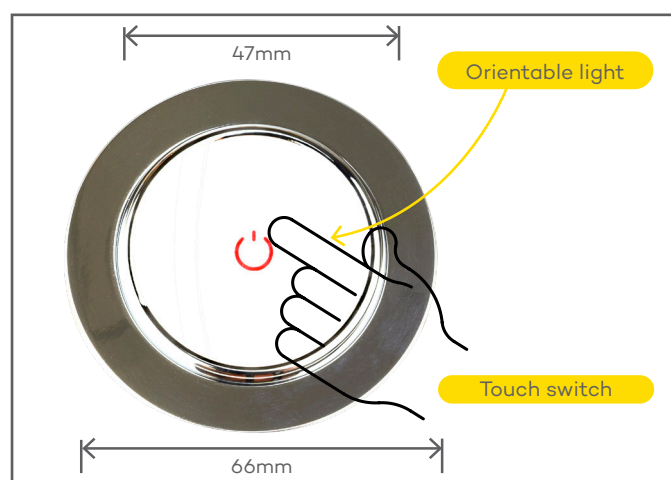

New products by HABA 2021-2022

Civita

The Civita is a small orientable recessed spotlight with touch control. Simply set the desired direction of the light beam and switch the spot on and off by touching the spot in the middle.

The spot is very suitable for properly illuminating a work surface, such as the kitchen counter. It is an aluminium spotlight in chrome color. The very flat model is easy to install because 2 clamps secure the spot in the made hole. No further installation required.

● 4306747CH Civita recessed LED spot with touch switch

Civita richtbare inbouwspot met touch schakelaar

Porzio

The Porzio door lamp is lighting for above the doorway of the caravan or motorhome. The lamp gives good evenly spread light, through the frosted cover. This is important for safe entry and exit, when it is dark outside. The Porzio door lamp also functions as lighting for the awning. By connecting an external dimmer, the light intensity of the door lamp can be dimmed.

The foam seal on the back of the lamp ensures that after installation the door lamp is waterproof. Any condensation under the frosted cover can escape through the openings at the base of the lamp.

New products by HABA

2021-2022

Viganella

The Viganella lamp is a door lamp with high brightness to illuminate the entrance of the bus camper. The door lamp is suitable for mounting on the camper Westfalia MAN, Volkswagen Crafter and Mercedes Sprinter. The lamp fits exactly into the opening of the broader sliding doors of these bus motorhomes, illuminating the entrance across the entire width. The frosted cover diffuses the light within the fixture, giving an even distribution of light. With an external dimmer, the light intensity of the lamp can be dimmed. The Viganella door lamp also functions as a rain gutter. The rainwater from the roof is directed along the sides of the doorway.

● 4302529 Viganella MAN/Crafter/Sprinter

LED dimmer

With the LED dimmer with remote control, multiple light sources can be switched on/off and dimmed remotely at the same time. The LED dimmer is ideal for dimming LED lights with a very low current. The total power that can be switched is up to 96W, which means that for example the Viganella (7W), Porzio (4.5W) and Tivoli (10W) can easily be switched simultaneously. The range of the high frequency remote control is wide and works up to 10m away from the dimmer module. The remote control is easy to carry on the keychain. Wiring of the lights is easy to connect to the LED dimmer module, as it is equipped with power wire clamps.

Press to open the connector
Introduce the cable
Release to close and fasten the cable

Carajack set

The Carajack Set consists of 4 aluminium axle supports with Carajack Safety protective caps. The aluminium axle stands support the chassis of the caravan or motorhome to take the weight off the tires when staying in one place for a longer period of time. The protective caps give a better grip of the axle supports on the chassis of the caravan or camper. The pressure on the axle support is also better distributed and the cap ensures a separation between metal and metal, which prevents possible damage to the chassis.

Attention! Make sure to never lift the tyres from the ground!

Carajack Safety

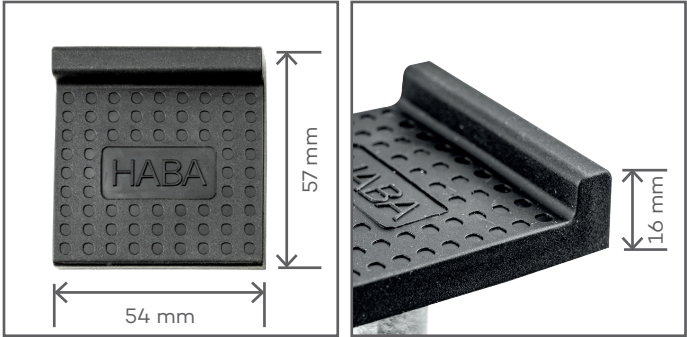

The Carajack Safety protective caps provide a better grip of the axle supports on the chassis of the caravan or motorhome. The pressure on the axle support is also better distributed and the cap ensures a separation between metal and metal, which prevents possible damage to the chassis. The Carajack Safety protective caps are specifically made for the aluminium Carajacks of HABA available in a set of 4 or 2 pieces.

Hold-up plus

With the Hold-up plus pegs, it is easy to create a sloping path for the waste water hose by driving the pegs into the ground at different heights. In this way, the waste water flows effectively from the motorhome/caravan into the sewerage system. By making a gooseneck in the flexible waste water hose, foul smells from the sewer are stopped. The pegs are an addition to the Colapz waste water hose and adapter piece.

Central Park

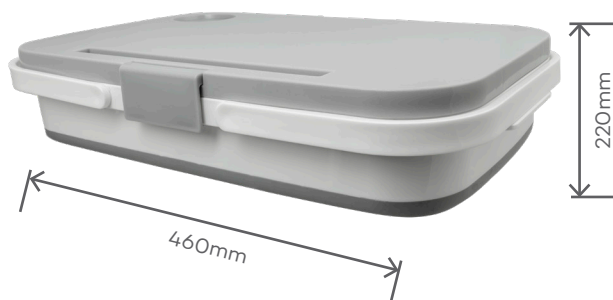

The Central Park Foldable Picnic Basket is a multifunctional basket with lid, which can be used as a table. The unfolded basket has a capacity of 15 litres and can be used as a shopping basket, pet bath, washing basin for clothes or dishes and, of course, as a picnic basket. By folding out the 2 collapsible stands, the lid becomes a table. The surface of the table has a slot for a tablet and a recess for a cup. After use, the basket can be folded up for compact storage.

Flexible marking sign

The flexible marking sign allows itself to be stretched very well on the protruding load, precisely because the sign is flexible. The sign is made of solid plastic, which makes it easy to bend without breaking. It is suitable for load marking for all countries except Spain and Italy, where a special marking sign is required. The markings on the sign have class 2 reflective material and the sign is equipped with sturdy eyes to secure the sign on the load.

7601580 Flexible marking sign

Flexibel markeringsbord kunststof
Flexible marking sign plastic
Flexibel Warnschild Kunststoff
Panneau de signalisation flexible en plastique

Product specifications

Dimensions (LxWxH)	500x500x1,3mm
Net weight	468g
Reflection classification	Class 2
Material	Polypropylene, metal
Colour	White with red stripes

Suitable for the whole of Europe, except for Italy and Spain
