Quality Policy Statement

- Consistently meet or exceed our customer's expectation for product quality and performance.
- Consistently meet or exceed our customer's expectation for product and service delivery.
- Continuously improve our processes and systems.
- Provide employee training to better serve our customers and to support personal growth.

CERTIFICATES AND ACCEPTANCES

AdvanTec's Freeman cast hatch line has various approvals and certifications. Our hatches have been granted American Bureau of Shipping (ABS) Product Design Assessment Certification for 109 different models. Each of these models can be used on a number of ABS classed vessels in locations specified in the design assessment.

AdvanTec Marine constantly monitors maritime regulations, standards and classification society activities related to closure approvals.

AdvanTec Marine closures have received specific intended use acceptance by:

- ABS - American Bureau of Shipping
- DNV - Det Norske Veritas
- LR - Lloyds Register of Shipping
- GL - Germanischer Lloyds
- BV - Bureau Veritas
- MCA - Maritime Coastguard Agency
- RS - Russian Maritime Register of shipping
- RINA - RINA S.P.A., Italy
- CRS - Croatian Registry of Shipping
- USCG - US Coast Guard
- CCG - Canadian Coast Guard (Transport Canada)
- ABYC - American Boat & Yacht Council

✓ **Buy America Act Compliant** (52.225-1)

APPROVALS AT A GLANCE

- ABS - type approval, certificate no. 13-HS1082451-PDA
- Lloyd's Register - type approval certificate no. 03/00088(E3) & 9/60003(E1)
- U.S. Coast Guard, CE, ISO-12216 compliant

Approvals have been awarded and may be obtained for specific intended uses. AdvanTec Cast Hatches are currently in use on Coast Guard vessels and Naval craft of all types.

AdvanTec Marine can assist with specific intended use applications.

Over 350 self righting vessels 100% completely outfitted with AdvanTec hatches, doors, windows & portlights. The people you trust, trust AdvanTec Marine.

CAST HATCHES

2400 Series

• LIFT OUT

• SURFACE HINGES

Freeman Cast Hatches Attributes

- Evenly spaced dogging arms exert uniform force on the cover plate.
- Handle position shows when dogging arms are engaged or disengaged.
- Handle is always attached. Hatch and handle fit flush with the deck with the handle in a recessed locked position.
- Watertight hatches, designed to seal up to 30' intermittent head, the double-sealing gasket seals tighter under pressure.
- Versatile installation, hatches can be installed in steel, aluminum, wood, or fiber glass decks.
- Complete units include aluminum or steel mounting rings for bolt-in or weld-in installations.
- Dogging mechanism assures smooth consistent action; no binding or jamming.
- Quick-acting dogging eliminates over or under tightening; hatch operates the same each time.

- **TOP VALUE**
- **VERSATILE**
- **FAST ACTING**
- **RELIABLE**
- **EASY LIFT**
- **LOW MAINTENANCE**

• **CONCEALED YOKE HINGE**
(Optional, selected models)

Service. Value. Experience.

FREEMAN Hatches have more quick-acting flush hatch experience, models and features than any manufacturer

AdvanTec Marine's Freeman hatches are used on a wide variety of fishing boats, tugs, barges, research vessels, offshore tenders, rescue craft and other workboats. The Freeman hatch is designed for new boats, or replacing other hatches in standard openings, or for improving existing craft.

The hatches are fast acting and easy to use. Simply grasp the handle and pull, the shaft slides into place, and with less than a quarter turn, completely disengages the locking mechanism. The dogs and linked handle do the work smoothly in just a second.

Our easy lift system allows simple removal. With the locking mechanism disengaged, the hatch is resting on the deck ring and can be lifted out with one hand.

HINGED HATCHES

For hinged models the unique hinging device allows the hatch to be opened more than 180° and "floats" when the hatch is closed to facilitate a tighter seal. Round hatches 18" and larger, and all oval and square hatches with aluminum covers are available hinged from the factory.

Close-up view of standard Freeman "floating" hinge installed on hatch assembly, right.

Quality. Capability.

Two Important Features Distinguish the Freeman Cast Hatch from Other Designs

- **Built in T-Handle**
- **Easy Operating Dogging Mechanism**

The standard pocketed, stainless steel T-handle is built in, permanently part of the hatch. Grasp the handle and pull, the shaft slides up into place, and with less than a quarter of a turn the locking mechanism completely disengages. The alignment of the handle shows when dogging arms are engaged or disengaged.

Knife-edge or Compression Sealing?

Compression Seal 2400 Series Hatches

These hatches have easy-to-clean spigots, feature long gasket life, and are economical to purchase.

- Aluminum Deck Rings are intended to be weld installed into aluminum decks and bolt installed into other deck materials.
- Steel Deck Rings are to be weld installed into steel decks only.
- Watertight seal to 30 foot intermittent head, continuous 10 foot head top-loaded pressure (on properly installed and adjusted hatch assemblies).

Knife-edge Seal 2400 Series Hatches

These hatches feature a coaming with drain gutter and an aggressive sealing rim edge. A drain fitting can be installed to minimize water from entering enclosure when hatch is initially opened.

- Aluminum Deck Rings are intended to be weld installed into aluminum decks and bolt installed into other deck materials.
- Steel Deck Rings are to be weld installed into steel decks only.

TYPICAL HATCH COVER ASSEMBLY

Cam at center of rotating mechanism exponentially increases force through fulcrum at the opposite end of the dog arm.

Evenly spaced dogging arms (either 3, 4 or 8 depending on size of hatch) exert uniform sealing pressure on the cover plate. The unique design, fit, and adjustability of Freeman's dogging mechanism assure smooth, consistent action; no binding or jamming of parts.

Definitions

- **Max load:** maximum point load acceptable on any point on top of the cover.
- **Max load-fatigue:** maximum cyclic point load acceptable on any point on top of the cover. Higher loads will result in non-infinite fatigue life which may be acceptable in certain applications.
- **Max watertightness pressure:** Maximum tank test pressure (inside direction).

Analysis

The load results are based on finite element analysis of hatch/ring combinations. In the case of aluminium castings, the fatigue limit is also included as it is lower than the yield limit. A 2x safety factor was assumed in all instances.

The watertightness pressures listed are based on Type Approvals and previous sealing results. Note that only the aluminium models hold TA certificates.

Higher loading results may be acceptable based on the application and other requirements. Please contact Engineering if additional clarity is required.
