SECURITY SYSTEMS

We solve all the vulnerabilities of your premises through intercommunicating measures and systems to offer you total control and security over your business

CLOSED CIRCUIT TV

Connected video equipment that creates an image circuit which can only be accessed by specific users.

FIRE PROTECTION

We analyze your facilities and we take charge of the installation, supervision and maintenance of all the active and passive measures that your business requires.

ACCESS CONTROL

Increase the general security of the campus, restrict access or delimit traffic according to areas and personnel according to your needs.
