ABOUT AP MARINE

AP Marine is active in the nautical market since 1985 and situated in Franeker, founded by Anko van der Plas, continuing to grow and built up a very broad and loyal customer base.

AP Marine specializes in propellers and shaft systems. The propeller shaft systems are developed and manufactured in-house by AP Marine, therefore the delivery times are short and prices sharp.

We have been receiving more and more requests from customers for a total package.

AP Marine is authorized dealer for Amco Veba marine cranes, Marsili steering systems and Romagnoli winches.

Propellers, propeller shafts, bearings, rudder systems, thrusters, winches, cranes, anchors, pumps, and Steering systems are delivered to both commercial and pleasure craft.

Upon request, our products can be supplied with a certificate issued by BV.

PROPELLER SHAFTS

AP Marine specializes in custom made propeller shafts. Many years of experience and specialised knowledge ensure that more and more large shipyards find their way to AP Marine.

Both standard as custom made propeller shaft systems are a possibility as well as "large" propeller shaft systems up to Ø 300 mm.

The propeller shaft systems are developed and manufactured in-house by AP Marine, therefore the delivery times are short and prices sharp.

Apart from the supply of single shafts, AP Marine also supplies complete propeller shaft systems.

Upon request, our products can be supplied with a certificate issued by RINA, BV or Lloyd's.

PROPELLERS

In recent years, AP Marine has built a good reputation in the commercial shipping. Our specialist knowledge and the added value of helping to choose the most efficient propeller, helped that shipyards found their way to AP Marine as their supplier of propellers or complete rudder systems.

The 'standard' Sonica propellers are specially designed for small commercial vessels. We supply three-, four- and five-blade propellers.

The 'standard' propellers are made of manganese bronze with a standard cone of 1:10. Also available in nibril. The standard propellers are available up to Ø 3040 mm.

AP Marine also provides larger custom propellers.

Upon request, our products can be supplied with a certificate issued by RINA, BV or Lloyd's.

RUDDER SYSTEMS

AP Marine produces a great number of rudders in profile, which are compatible to the individual hull, ranging from low velocity water displacement, to deep V planing designs and many other applications. Rudder system come in various lengths of rudder, shaft and rudder posts.

AP Marine produces rudders in steel as well as stainless steel. For both standard and custom made rudder systems you can contact AP Marine.

We can assist you in the process of designing , through years of experience AP Marine can advise you to choose and install the most efficient system.

Upon request, our products can be supplied with a certificate issued by RINA, BV or Lloyd's.

HYDRDRAULIC STEERING

AP Marine is dealer for hydraulic steering systems, power packs and hydraulic pumps of the brand Marsili.

The Marsili company was established in 1957 and is a renowned name in shipping and shipyards. Marsili is constantly innovating, (and) high quality belongs to the fundamental values.

In 2012 Marsili became a certified company for the internal production by the "Russian Maritime Register of Shipping" to be added to the already obtained "Russian River Register".

BOW THRUSTERS

AP Marine delivers bow thrusters for both pleasure craft and commercial vessels.

For the different types of drives and powers there are various types of bow thrusters available

Based on extensive experience of providing specialist services, AP Marine can help you make a choice for the most suitable bow thruster, up to 800 hp.

Upon request, our products can be supplied with a certificate issued by RINA, BV or Lloyd's.

CRANES

AP Marine is dealer for Amco Veba marine cranes, Amco Veba is the European leader in the field of marine cranes.

AMCO Veba has an excellent international reputation and manufactures and supplies cranes from 1 to 85 tons. Sealand Series cranes are designed and produced for heavy conditions (sea). Hexagonal shaped telescopic booms are gradually and concomitantly extended, instead of one at a time, offering greater load handling control, even under harsh conditions.

Upon request, our products can be supplied with a certificate issued by RINA, BV or Lloyd's.

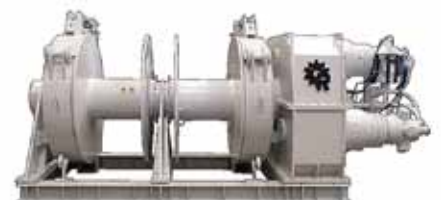

WINCHES

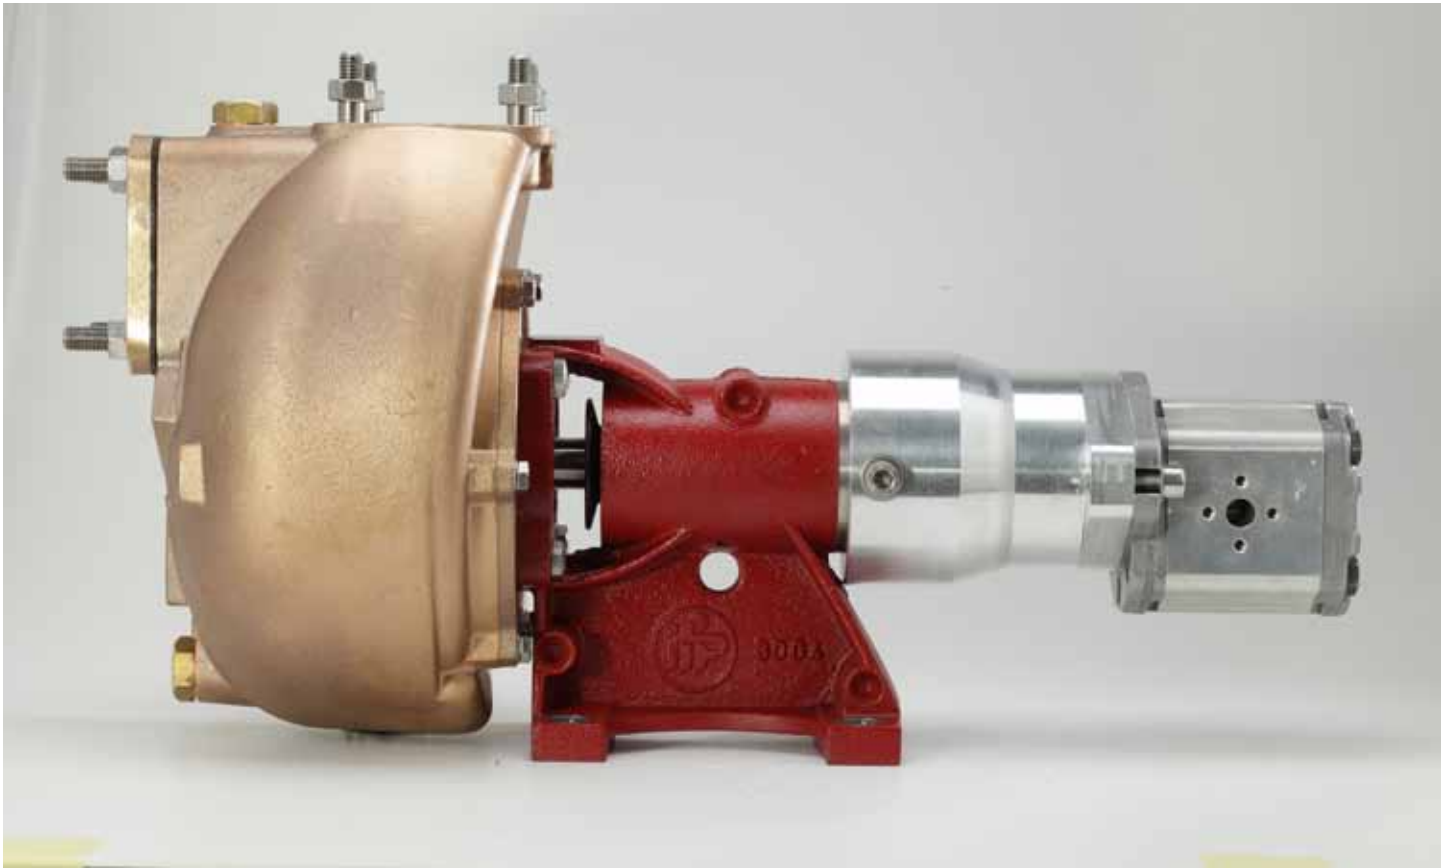

AP Marine is dealer for Romagnoli winches.

Romagnoli is an Italian company founded in 1892 and one of the most qualified in the field of winches (towing winches, mooring winches, capstan winches and power packs). The winches are suitable for both working vessels as for large yachts.

Romagnoli innovates continuously to improve its products. Quality is of great importance, all winches are made to the highest standards.

Upon request, our products can be supplied with a certificate issued by RINA, BV or Lloyd's.

PUMPS

AP Marine is dealer for Forani & Pecorari pumps.

Marine Pump specialists Forani & Pecorari snc, established for over forty years, design and manufacture bronze pumps exclusively for small and medium tonnage vessels.

The specialist experience, robust product design and, in particular, high quality in the manufacturing process, has allowed Forani & Pecorari snc to become strongly established in both European and non-European markets.

The production program includes five series of bronze pumps, purposebuilt for seawater. All Pumps area available in bare shaft form, with manually operated clutch or with electromagnetic clutch. The pumps can be delivered for clockwise or anticlockwise rotation.

Upon request, our products can be supplied with a certificate issued by RINA, BV or Lloyd's.

ANCHORS

Alioto Group from Italy provides nautical components since 1974. Anchors, anchor chains, hooks, steelwire ropes, shackles, sockets and more.

The philosophy of this company is:
"Sensibility to safety issues, attention to technology,
and respect for good craftsmanship."

Upon request, our products can be supplied with a certificate issued by RINA, Lloyd's, DNV or American Bureau of Shipping.

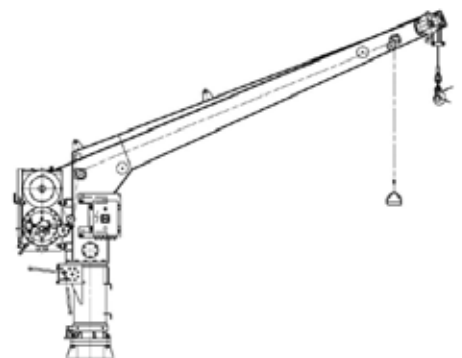

DAVIT CRANES

INCOMAR SUD Srl, with offices in Naples and in Genoa, operates since more than 30 years in overhauling and selling inflatable liferafts and Marine Evacuation Systems (MES).

INCOMAR SUD Srl is also supplier of Davit cranes which are of high quality and suitable for both commercial ships, work boats, tug boats, ferries and cruise ships as well as yachts and mega yachts.

BEARINGS & ACCESSORIES

The rubber bearings of Caravel are of high quality and give an excellent performance.

Water lubricated bearings are the ideal solution to reduce sound and vibration.

The Caravel rubber bearings are available from Ø 20 mm up to Ø 600 mm and with longitudinal grooves or spiral grooves.

AP Marine can also deliver seals, SPURS ropecutters, propeller nuts, anodes and more..

After reading this leaflet, do you have any questions or would you like more information?

Feel free to contact us with questions or for an offer free of engagement.

Because of our years of experience, you can expect excellent quality and service. We cooperate with you in thinking about your design, idea, efficiency, power, conditions, service life and speed. Based on the many years of accumulated knowledge

AP Marine is able to give sound advice and to guide you, on request, in the building process.
