

## PRODUCT DATA SHEET: VG520SD & VG750SD GYROSTABILIZERS

VG520SD / VG750SD

|                          |                                       |
|--------------------------|---------------------------------------|
| Angular Momentum         | 520 / 750 kN.m.s                      |
| Rated Stabilizing Torque | 1000 kN.m                             |
| Mass                     | 20100kg (44313lb) / 23000kg (50706lb) |
| Power                    | 70 – 110 ekW                          |
| Rated RPM                | 1940                                  |
| Cooling Water            | 125 – 200 lpm                         |
| Running Noise            | Average 73 dBA                        |

*Note: Dimensions below exclude clearances. For more information, please ask VEEM Marine for a Product Installation Drawing*

The world's largest production gyro stabilizers offering up to 1000 kN.m.s of stabilizing torque for vessels ranging from **150' – 300'+ (approx. 45 – 100m +)**

### VEEM MARINE ADVANTAGES INCLUDE

- Up to 95% roll reduction at rest or underway
- Fully maintainable in the vessel (inc. major overhauls)
- Highest stabilizing power per \$ or kg/lb available
- Recirculating forced lubrication for long bearing life
- Epoxy coatings and corrosion resistant components
- Low noise emissions
- Telemetry for remote monitoring, diagnostics & updates
