

# TRAFFIC CONTROLLER SMS ALERT SYSTEM

## Advanced Warning And Alerts For Efficient Traffic Controller Monitoring

PPK Technology offers the traffic controller SMS alert system for sending SMS alerts to government officials or maintenance contractor staff regarding the status of the traffic controller. By default, SMS alerts are programmed to include:

- (1) Power Failure
- (2) Door Open / Close
- (3) ELCB/ELR Trip
- (4) Amber Flashing
- (5) Others upon request.

The inputs and outputs of the SMS alert module can be programmable to cater to the user request. This SMS alert system can be linked to the MITS software solution or a MIMIC panel for traffic system monitoring. The control center solution may prompt status checks at the SMS alert module to confirm whether the alarm still persists at the traffic system.

# TRAFFIC CONTROLLER SMS ALERT SYSTEM

## • Key Features

- \* SMS alerts to government personnel and maintenance contractors
- \* Provides status of the traffic system
- \* Examples include power failure, door open/close, ELCB/ELR trip, amber flash and other parameters needed by client
- \* Can be linked to MITS and MIMIC panel system
- \* Reduces traffic system downtime and enhances maintenance efficiency
- \* Remote triggerable outputs

## • Operational Specifications:

Item	Specifications
No. of inputs	8 programmable inputs
No. of outputs	4 programmable outputs
Power	5 Vdc
MITS/MIMIC Panel	Compatible
Status checks	Can send prompt to traffic system for status checks
SMS alerts	Power failure, door open/close, ELCB/ELR trip, amber flash and other parameters needed by client
Frequency band	900/1800 Hz GSM band
Remote triggering	Outputs can be remotely accessed
