

SAMSUNG

staron[®]
Solid Surfaces

For over 20 years, the mineral material STARON[®] has been used in high-end interior work and furniture design.

In cooperation with architects and designers, as well as with qualified fabricators, new areas of application, experience and knowledge are constantly being opened up worldwide.

The unique properties of mineralbased STARON[®] convince both planners and builders.

Samsung manufactures STARON[®] sheets in over 140 individual colours for international use with a wide variety of regional demands on design, colour harmony and areas of application.

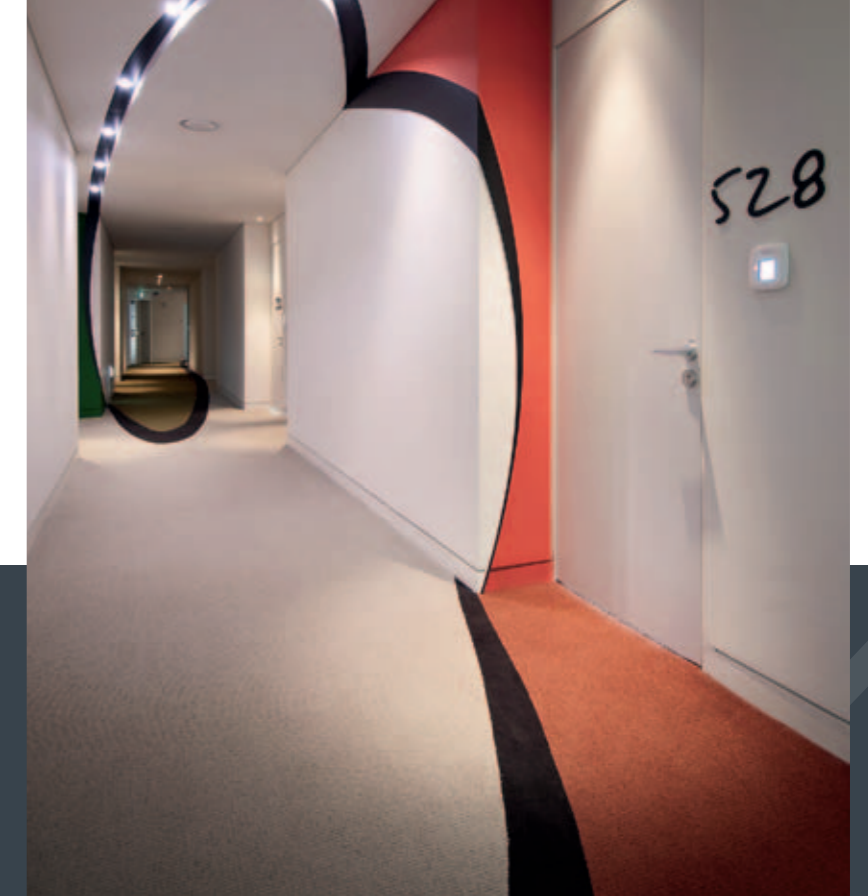

The diversity and innovation of STARON[®] installations are the result of high-quality industrial production and creative planning in cooperation with quality craftsmanship.

STARON[®] is used for designing:

- Hotels
- Restaurants
- Business furnishings
- Museums
- Administrative buildings
- Airports
- Hospitals
- Laboratory facilities
- Wellness centres
- Ship and mobile home interior finishing
- Private kitchens and baths
- Wall and facade cladding

Hotel

In hotels, STARON[®] offers guests a great welcome and the hotelier a presentable, durable, low-maintenance interior.

Individual gastronomy

From individual to system gastronomy – STARON® is perfect for generating a highly recognisable individual brand design with no limits set to creativity.

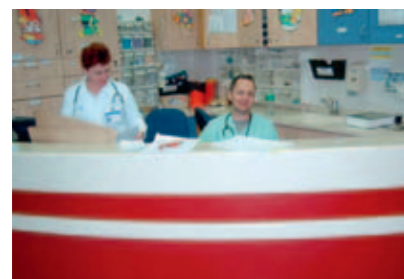

System gastronomy

Health care

In the health care sector, the high demands placed on hygiene and chemical resistance are the reasons for the diverse and tried-and-tested application of STARON® in the design of reception units and work-stations, baby washing and baby changing tables, laboratory and operation room facilities, patient rooms, and baths.

Wall and facade cladding

The areas of application for STARON® are diverse and meet the highest demands. They range from transparent partitions integrated in high-quality interior finishing to seamless wall cladding for hygiene and health care applications.

Public buildings

Thanks to the many years of use of STARON® worldwide and the creative cooperation with architects and specialist companies, STARON® installations can now be found in such public areas such as:

- Airports
- Railway stations
- Museums
- Libraries
- Banks
- Insurance and administrative buildings
- Care facilities
- Kindergartens
- Schools
- Universities
- Swimming pools and wellness centres

Shopfitting

For shopfitting purposes, STARON® is ideal for an exclusive, neutral product presentation. STARON® has been applied successfully for interior and furniture design as well as for lighting and presentation elements. STARON® is used in exclusive single projects and in modular system design.

Motor home, train and yacht interior finishing

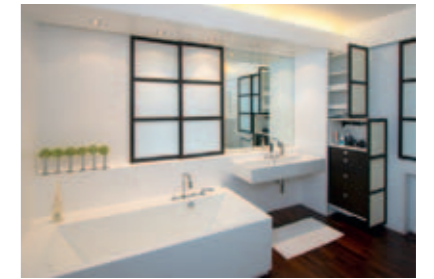

STARON® has proven itself to be a reliable „travel companion“ for road, rail and sea.

Kitchen

The practical features encountered in the daily use of STARON® in the kitchen impress the most. Form and function can be combined together in designs according to the ideas of planners and users.

Bath

Planners design adventure and wellness baths with STARON® both in detail and in their overall spatial architecture. STARON® can be used as the sole material or in diverse combinations, for example with glass, acrylic, wood, ceramics, stone and stainless steel.

STARON® sheets

STARON® mineral material products, manufactured by Samsung Chemical, are styrene-free, acrylic-based solid sheets and moulded parts with mineral fillers. STARON® sheets and moulded parts can be glued together without seams using STARON® methyl methacrylate adhesive.

STARON® moulded parts

The STARON® moulded part models illustrated are intended to represent a selection from the extensive product range of STARON® production and processing. The high processing flexibility of STARON® sheets together with its thermoplastic properties and the almost invisible adhesive allow for the realisation of individual moulded parts for private and commercial use in interior and structural architecture.

Sheet colours

Samsung manufactures STARON® sheets in over 140 individual colours for international use with a wide variety of regional demands on design, colour harmony and areas of application.

Sheet sizes

Thickness	Length	Width
6 mm	2500 mm	760 mm
12 mm	3680 mm	760 mm

Individual sheet sizes and special colours on request.
