

JIBER[®]

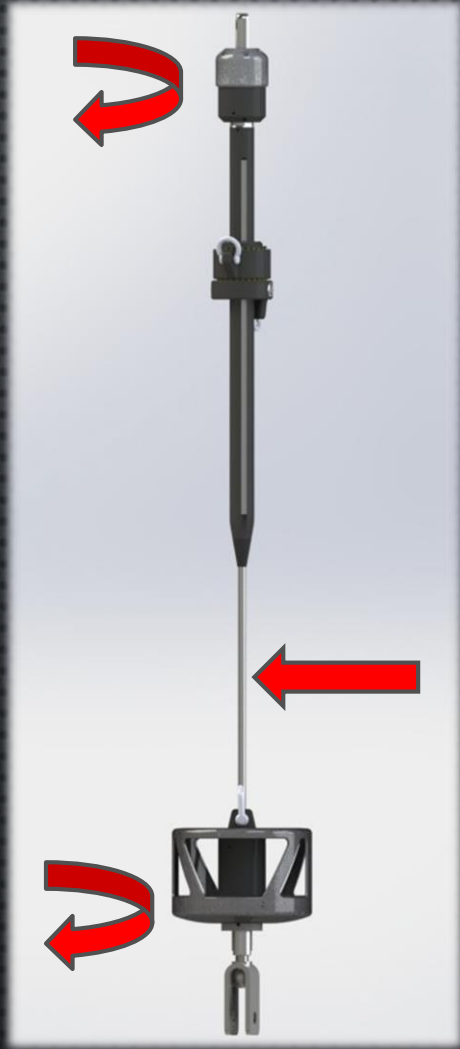

UBI MAIOR[®]
ITALIA

JIBER®

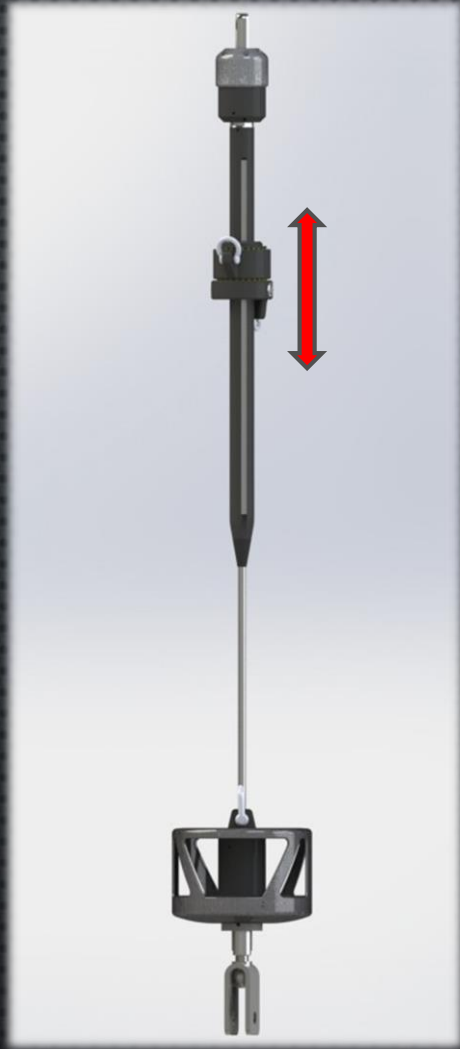

JIBER IS A STRUCTURAL JIB OR GENOA
FURLER THAT WORKS WITHOUT THE
USUAL ALUMINIUM EXTRUDED FOILS

THE ROD FORESTAY IS LINKED TO THE DRUM AND THE SWIVEL, AND IS ROTATING, TRANSMITTING THE TORQUE AND FURLING THE SAIL.

JIBER®

THE SAIL CAN BE HOISTED UP AND DOWN,
AND THE HALYARD TENSION CAN BE
ADJUSTED ANYTIME.

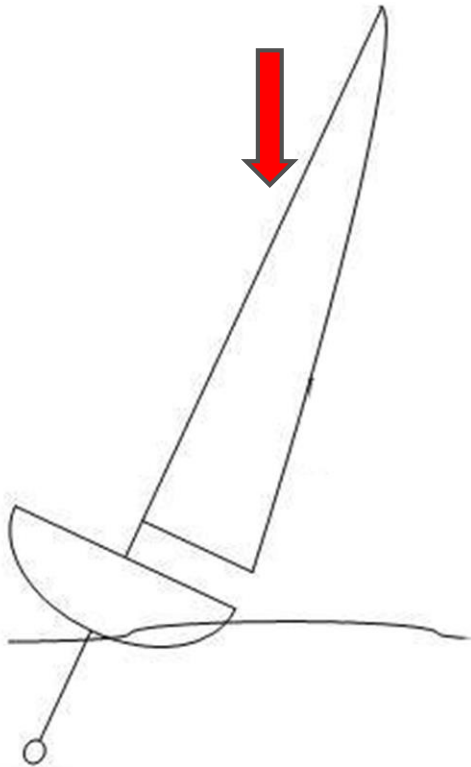

IT IS USED EXACTLY AS A CONVENTIONAL
FURLER, NO TRAINING OR ADAPTATION
REQUIRED FROM THE SAILOR

THE SHUTTLE LOCKS IN POSITION AND
UNLOCK AUTOMATICALLY.

NOT HAVING THE ALUMINIUM FOIL MEANS
THAT WE SAVE APPROXIMATELY 30 KG
AGAINST THE BEST COMPETITORS.

30 KG MIGHT NOT SEEMS MUCH, BUT THEY
ARE HIGH! IS LIKE SAILING WITH 2 PEOPLE
HIKING ON THE RAILS.

FASTER, SAFER SAILING, BETTER BOAT
HANDLING.

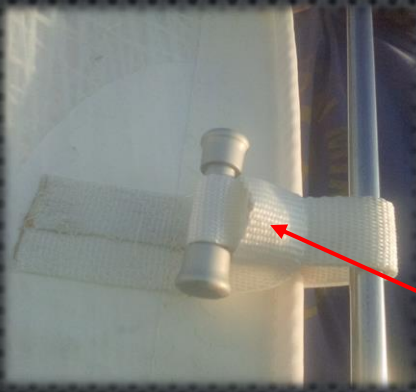

JIBER®

THE JIB CAN BE ATTACHED TO THE FORESTAY USING 3 SYSTEMS:

SOFT HANKS

ZIP BAG

TUFF LUFF

JIBER®

AS A SIDE BONUS WE HAVE BETTER
UPWIND PERFORMANCES THANKS TO
REDUCED DRAG AND WINDAGE NEAR
THE LEADING EDGE FOR THE JIB.

THE BOAT SAILS HIGER AND FASTER.

JIBER®

OUR PROTOTYPES HAVE BEEN SAILING
AND RACING FOR THE BETTER PART OF
AN YEAR. RELIABILITY IS PARAMOUNT.

JIBER®

THE JIB WITH SOFT HANKS OR ZIP BAGS
CAN BE TAKEN DOWN EXTREMELY
FAST IN CASE OF NEED, FASTER THAN
CONVENTIONAL FURLERS.

JIBER®

A NICE SIDE EFFECT IS THAT THE
SMALLER DIMENSIONS OF THE DEVICE
ALLOWS TO HAVE BIGGER SAILS.

AND THEY CAN BE USED REEFED!

JIBER®

NOW OWNERS THAT ENJOY CLUB RACING DON'T NEED TO CHOOSE BETWEEN THE PERFORMANCES OF TUFF-LUFF OR THE EASINESS OF A FURLER.

YOU CAN HAVE THE BEST OF BOTH WORLDS, AT THE SAME TIME.
