

ball booster 3rd generation

reference

888.000.240

weight

850 gr

capacity

1 L

packing

8 pieces per box

operating pressure

4 to 10 bar

air consumption

4 bar 170 L/min

5 bar 202 L/min

6 bar 241 L/min

The 'Ball Technology' works with a special kind of 'ball' instead of a metal tube. Because of this, the gun can be used with 4 bar air pressure instead of 6 or 7 bar needed for traditional guns. The new high-tech motor guarantees less down time. After years of research, finally, a cleaning gun that gets the job done without mechanical failures, arises.

CHARACTERISTICS

	<p>Ultra-reliable, high-tech motor bearings assembly.</p>		<p>Air pressure regulator</p>
	<p>Multi-directional air inlet 360°: - better stability on horizontal surfaces - better flexibility inside a vehicle</p>		<p>Only 4 bar required in contrast to all other cleaning guns which need min. 6.5 bar.</p>
	<p>Guard plate prevents dirt from getting sucked into the motor. Extra gasket gives protection for the motor.</p>		<p>Produces less noise than the traditional cleaning guns.</p>
	<p>The bottle lid has an extra screw thread (patented), to which our 600 and 1000 ml Tex-Spray bottles can be connected.</p>		<p>Easy removable brush.</p>

width nozzle

7 cm

including

4 adapters for vacuum cleaner hoses

The Extractor is mounted on the Ball Booster and using one of the adaptors supplied, it connects to the hose of a wet/dry vacuum cleaner. The injection of product at high pressure (compressed air) detaches the dirt immediately. At the same moment, the wet/dry vacuum cleaner sucks up the dirt solution. The result is a perfectly clean and fast drying surface. Fantastic results for in-depth cleaning of carpet and seat upholstery.

CHARACTERISTICS

Safe: users do not inhale the vapours of the waste product

Fast drying surface

Better results than injection/extraction machines

FIELDS OF APPLICATION

Very efficient for removing dirt, dust, fat etc. on places or materials that are difficult to clean:

- interior of cars, motorcycles, boats
- vent holes and airco
- dashboard
- carpets (textile and synthetics)
- around car and back seats
- around gear stick
- beneath car hood and gate stops
- glove and storage compartments
- wheel rims
