

The first complete sail racing instrument system with professional performance level designed for every crew.

All Astra Yacht exclusive technology environment in one single stunning device.

esa d7 is not only a professional multitouch display: it's the first combination of an advanced tactical software for regatta with a powerful computer built in a touch screen display explicitly thought and developed for marine ambient, with high contrast, wide angle and outdoor visibility. It can be connected to all the existing onboard instrumentations or through Astra esa Instrument system to the different sensors. Visualize data in the most flexible and powerful way fully selectable and

adjustable to crew's needs.

Take benefit of all esa Regatta features like the patented real time boat polar calculation, monitor your performances at one glance, prepare a perfect start with the starting procedure support page, use the maps for a perfect navigation, both in regatta and cruise.

Receive all the support for sail regulation and settings with the cruiser edition, for the best performance and safety onboard.

ASTRA Yacht @astrayacht
