

SCAN COIN RCS 400 Retail Cash System

 **SCAN COIN**
www.scancoin.com

The SCAN COIN Retail Cash System offers cost-effective, secure retail cash handling. By streamlining cash administration and verification procedures, the system enables faster, more efficient cashier routines for collecting cash floats and depositing the day's takings. Improved in-store cash flow management, with automatic recycling of coins and notes – increases efficiency and staff flexibility. All to ensure a rapid and significant return on investment.

Cash recycling with RCS 400

After registering on the RCS system, the cashier selects the cash mix for the day. In **less than 30 seconds**, coins and notes are automatically dispensed, coins into cups or the UCD, Universal Cash Drawer*.

Banknotes are dispensed from the note recycling device in parallel and a receipt is printed. All activities are registered in the Orchard J software and can be sent via the monitoring software to a central server.

Maximum cash flow control

During the day, the RCS 400 also serves as a continuous cash supplier, enabling a supervisor to support cashiers with change when needed.

At the end of the day, the cashier logs on and quickly deposits coins and notes from the day's takings.

The coins and notes are safely stored in dispensers, ready for future float dispensing. The notes can be stored in the recycling device for future float dispense or sent to the self sealing bag.

Benefits

Minimise manual labour ...

- time-consuming manual counting of coins and notes is eliminated
- automatic dispensing of the daily floats saves a lot of time
- back-office staff are released to focus on other, more customer-related tasks

... and maximise cash flow control

- automatic counting of the day's takings per cashier or cash drawer
- automatic verification of the takings, morning/evening
- the coins are re-circulated within the store, which means less need for buying cash
- all activities are registered and saved for tracking purposes
- processing accuracy assured with patented SCAN COIN sensor technology
- less shrinkage, fewer counterfeits and security risks

Quick and easy deposit of coins and notes.

Notes can be dispensed in bundles.

Coins are automatically dispensed into the cups.

ACCESSORIES/OPTIONS
STAND (FLOOR)
