

Marine fendering specialists

FLEXITEEK

Beautifully engineered synthetic decking
and marine products.

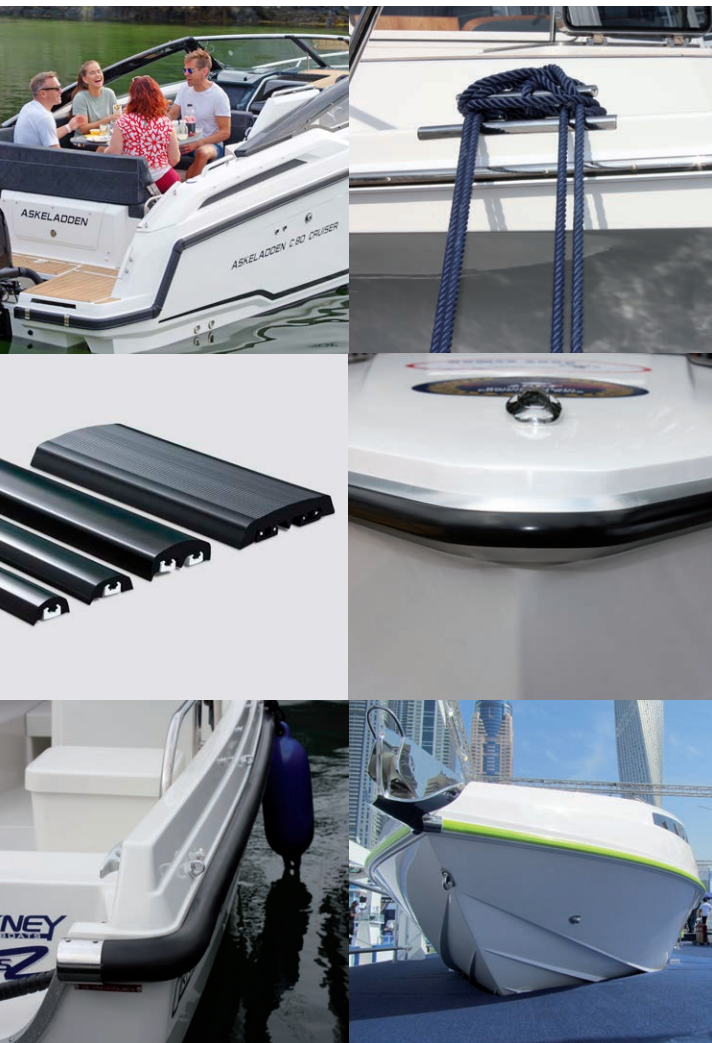

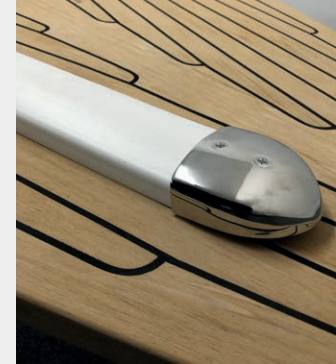

Marine fendering specialists

Wilks is proud to be one of the world's leading companies in the manufacture and supply of impact protection and decking systems.

CLICK FENDERING SYSTEM

Click is the latest boat fendering system from Wilks and has been developed to provide a quick and simple installation without compromise to impact resistance. The Click system consists of a rigid PVC track and flexible UV stabilised PVC body to provide a quick fit fendering system with hidden fixings.

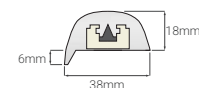

Our History

Since 1973 we have supplied many leading boat builders with their profiles and our customer base spans the globe.

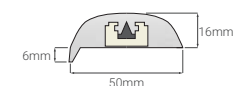

We manufacture a wide range of fendering profiles for both boat and pontoon applications and Flexiteek, the original synthetic teak decking for boats.

At our premises we hold a vast stock of profiles in flexible PVC, rigid PVC, stainless steel, aluminium and rubber; but as manufacturers we can also supply to meet your individual trade requirements.
