

ONE STEP®

System cleaning for large-scale mineral hard-floors

Effective large-scale cleaning in one operation

- No more costly basic cleaning
- Grey tiles look all white again
- Natural luster is made visible lastingly
- No disturbance caused by changed structure or diminished skid resistance
- Free of detergents, usable with foodstuffs and free of odor
- Economic application through time and water savings
- Longer cleaning intervals
- Easy handling with existing equipment
- Universally usable with all scrubber-driers
- Only one cleaner for deep and regular cleaning

ONE STEP® Systemcleaner F50 and **ONE STEP® SystemPad** ought to be combined in an effort to maximize an optimal and economical cleaning performance – established in consumer markets, banks and insurances, industry and public institutions – wherever people and logistics are on the way.

ONE STEP® System cleaning for large-scale mineral hard-floors

Technical Information

The Situation:

Mineral eventually go grey over time and become unappealing even though being cleaned routinely. This increasingly becomes an issue wherever freshness, cleanliness and hygiene count. To allow the development of a buying mood of a customer, a clean environment is a basic to facilitate customer satisfaction..

The Cleaning Process:

ONE STEP® Systemcleaner F50 works syntactically with the **ONE STEP® System Pad**, a cleaning pad with special layer treatment, fitting all scrubber-drier. When using the machine, micro fine sharp particles break off the SystemPad. Together with the **Systemcleaner F50** even small pores get effectively cleaned. Like an eraser, the SystemPad slowly wears off.

Another application is the day-to-day routine cleaning, where the cleaner is to be diluted further. Instead of using SystemPads, for the daily cleaning a soft brush or a micro-fiber pad should be used.

Economic Advantages:

Exploiting the pore deep cleaning of mineral hard floors with the **OneStep SystemCleaner F50** in combination with the **OneStep SystemPad** allows a massive reduction of expensive cleaning time. The cleaned area are immediately usable after reduced drying intervals and cleaning intervals grow. Advantages hard to measure are the increased value of the floor and of the environment.

Effectively characteristics:

ONE STEP® SystemCleaner F50 is highly effective. The innovative micro-splitting procedure cleans deeply without detergents or solvent and leaves no residue. **ONE STEP® SystemCleaner F50** removes all dirt residues like oil, fat, rubber abrasion, including efficient and soft cleaning of terrazzo, marble and granite. **ONE STEP® SystemCleaner F50** is ideal for the removal of grey slough.

Directions:

Information for the mode of operation and efficient application of the **ONE STEP® SystemCleaner F50** and the **ONE STEP® SystemPad** informs a DVD. Free of charge from authorized retailers or the company.
