Phonepark® intelligent parking meter

An innovative system of parking management and control.

Easier, ecological and safe

The availability of reserved parking at strategic locations offers privileges to authorized users facilitating the flow and reducing abusive parking. The option for solar power allows reduction of energy costs resulting also in environmental gains.

Absolute control and parking management.

Conceived for an absolute parking management, the system allows parameterized definitions, differentiated tariffs and schedules according to needs, optimizing profitability. Only authorized drivers have access to the system.

Available Parking Profitability

It allows an easier control of privileged parking in avenues, condominiums, enterprises, hospitals, priority services, shopping centers, loading and unloading places, airports, VIP areas, among others.

Easy installation and management

Adaptable to any parking place wherever there is a GSM mobile network and a photovoltaic or public network feed. High reliability with a low cost maintenance. Non intrusive pavement assembly.

Check out the full range of phonepark® products by visiting our website www.phonepark.pt

Use the configurator to choose the solution that best fits your needs.

AUTOMATED BARRIER

Just call the toll-free number listed and the barrier falls to allow parking.

Management software. The intelligent parking meter phonepark® is supported by a management software that ensures total control of parking and its flow, through information use report, in real time. This ensures the possibility of intelligent space management, optimizing their profitability.

The management software allows full autonomy of the manager (available for PC or Mobile Device).

Advantages to the phonepark® manager

Enjoy a leading position in advanced technology.

+ MANAGEMENT

Monetizes your privileged places. Allows the price list and schedule definition by zone or user profile. It inhibits the abusive parking enhancing the parking capacity. The management software and analysis allows an absolute control and parking utilization.

+ SECURITY

It eliminates the periodic coin collection. It increases the public safety by reducing the need of handling money.

+ FLEXIBILITY

Criteria change possibility according to short-term occasional needs. Allows differentiating values according to time, day, zone or user profile. It might be used in emergency situations because it activates the safety system.

+ ECOLOGICAL

It results in a significant decrease of parking search traffic and therefore the reduction of CO2 emissions. It can be powered exclusively by solar energy. It eliminates the use of paper.

Advantages to the driver

Surely a parking system with additional advantages

With phonepark® parking is:

+ EASY

To park call the free number of the selected place and wait for the authorization. You don't need to get out of your vehicle.

+ CONVENIENT

It eliminates the parking period renewal. It allows parking in privileges areas. It enables warnings about the parking use by sms (cost, balance, utilization time).

+ SECURE

It eliminates handling cash. Free and safe one-time register. Inhibits and control abusive parking.

Guaranteed parking in three steps.
