

“SPECIAL OPS” ComfortGrip PowerWheel

Edson has a long history of protecting our Nation's home front. From Edson's trademarked Destroyer Wheels driving Naval warships, to the PowerWheels installed on Homeland Security vessels, Edson products are battlefield tough. Edson's newest wheel continues that tradition.

The Edson “Special Ops” ComfortGrip PowerWheel was designed specifically for the demanding conditions of hard-working mariners patrolling our Nation's waterways. Featuring a rugged semi-gloss durable black finish, the one-piece, cast 316 Stainless construction is engineered with comfortably radiused curves in critical contact areas, that eliminate welds and fasteners. Edson's “Special Ops” PowerWheel incorporates a unique tactile ComfortGrip Santoprene elastomer embedded in the wheel rim for a positive grip in any weather condition. In addition to reducing fatigue, Edson's ComfortGrip also acts to regulate temperature, making the wheel cooler to the touch on a hot summer day and taking the chill away from your hands on a cold day.

This virtually indestructible wheel is available in 13", 14.5", and 16" diameters with a standard $\frac{3}{4}$ " tapered hub to fit most hydraulic helms. An optional factory-installed Edson PowerKnob gives the helmsman maximum maneuverability. The steering wheel is the most touched piece of equipment on your boat. Put an Edson “Special Ops” wheel on your boat today and feel the Edson difference.

Edson's PowerWheels are also available in satin and polished stainless finishes. Also new from Edson: Special Ops Radar Towers.

Established in 1859, Edson International manufactures an extensive line of marine steering systems and accessories, boat davits, radar towers, and marine pumps for sail and powerboats.
