Our technology made for your experience

broaden
your technological
horizons

Videoworks:

- > *Can be the only reliable Partner for the Designing and the Engineering of complex Solutions*
- > *Can give a global support in terms of technologies, solutions and products*
- > *Simplifies your life with an eye to the future*
- > *Helps you with the spaces management*
- > *Improves the comfort and the quality of life*
- > *Is relax*
- > *Is user friendly*

Videoworks provides a global support: consulting, technologies, design, solutions and constant assistance. It is an integrator of solutions, able to communicate with all the actors of the projects:

Owners - Architects - Project Managers - Technical Managers

*Rotating and retractable rack,
perfectly integrated in the furniture*

Videoworks Officina

Videoworks S.p.A.

Videoworks Spa, Italian leader in Systems integration, has more than a 20 years' experience in design, realization and installation of innovative audio/video systems, networking communication IT, Domotics and Entertainment, addressed to the most exclusive clients. Videoworks solutions are created by all the actors of the project and are aimed to meet the most demanding Owners' needs, in the Italian style and with the last technologies on the market: **EXCLUSIVITY, HIGH TECHNOLOGY, STYLE AND DESIGN, EASE OF USE AND RELIABILITY.**

Videoworks staff is made of professionals of audio/video technology integration and it works from Ancona (HQ), Viareggio and Milan offices. As for the software design and development, **Videoworks** collaborates with its Sister Company Itworks, which is specialized in IT Engineering and Systems development.

Inside the **Videoworks** "Officina", the technicians realize the Racks, the meticulous and accurate wiring, tests and trials, obtaining a product, which is ready to be installed. This, reduces all the unnecessary labor costs and waiting time.

All the steps of the process, which is to say the client requests analysis, the CAD project, the quotation, the Light & Sound Engineering, the design, the materials logistic, the development of the software, the tests and the final user training, are all in-house, with no outsourcing at all.

***Videoworks** has the ISO 9001:2008 certification.*

Comfort, leisure & security at your fingertips

Videoworks supplies the design and the integration of a full home automation system that enables the final user to manage what is following, in an intuitive, easy and customized way:

- > *Curtains, lights and Air Conditioning*
- > *CCTV*
- > *Ad hoc Apps for on board life (please see next page)*
- > *Entertainment system (TV, music, games, multimedia)*

All comfort, relax and entertainment with a simple click.

Ad hoc applications for Yachting

Videoworks cares waht the owner likes the most: football matches? Music? Movies? Food? We realize customized apps with simple and intelligent user interfaces.

1

MyConcierge
This App makes your dream come true! You can have a five-star service on board, wherever you are. Ordering either a refreshing cocktail or a snack from the menu, waking up with your favourite music and the scenario you like the most and access your own multimedia libraries have never been that easy. Moreover, for a total respect of your privacy, **Videoworks** implemented the innovative staff call and the “Don’t disturb” mode, inside the cabin.

2

MyInfos
This App allows the visualization of the following information on any displays:

- > Chart work

> Points of interest

> NMEA
- > Weather forecast

> 3D Google Earth

> CCTV
- > Messages from the captain

3

MyScreen
This is an on streaming video display solution, either on tablets or sm artphones, even simultaneously.

4

MyConnections
We are dealing with a local App, based on a CISCO router that allows the management of four different types of Internet connection on board, in an easy and secure way: VSAT, WIFI, UMTS, FLEET BROAD BAND. Users net access can be monitored by the App administrator, who can create and delete users and set scenarios such as “owner at work”, suddenly defining weather who can access Internet or not.

1 MyConcierge
2 MyInfos

3 MyScreen
4 MyConnections

Delivering leisure on board

- 5

MyOlos
It is a Videoworks-made home automation system for Yachts, which allows to integrate all the Entertainment, home automation and audio/video “experiences” in just one touch screen.
- 6

MyCrew
This software is conceived for the innovative Google Glasses, which are worn under WIFI coverage and allow the crew to display and manage calls, alerts, lights, cameras and music, while keeping the movement free. Everything, with a simple voice command.

5 MyOlos
6 MyCrew

IT

A great networking infrastructure is the basic condition for supplying the best comfort and experience on board your own Super Yacht.

Audio/visual: a sensory experience

Let's suppose you are comfortably sitting on the sofa and you are setting your favourite light scenario with a simple click. You can easily access your favourite music library or your movie storage, feel as if you were in a cinema, surrounded by a clean, captivating sound and wonderful colours, thanks to the 4k technology.

Or, you can even think of an on board dj set, with music pervading the whole environment, whether it is internal or external, together with light plays, projections and images.

- > *Magic Mirror*
- > *4k*
- > *Cinema room*
- > *Party mode*
- > *AirPlay*
- > *Apple TV*
- > *Kaleidescape*

Issues of Sound

INTERNAL ED EXTERNAL SPEAKERS

Videoworks is able to realize speakers with high sound quality performances, thanks to:

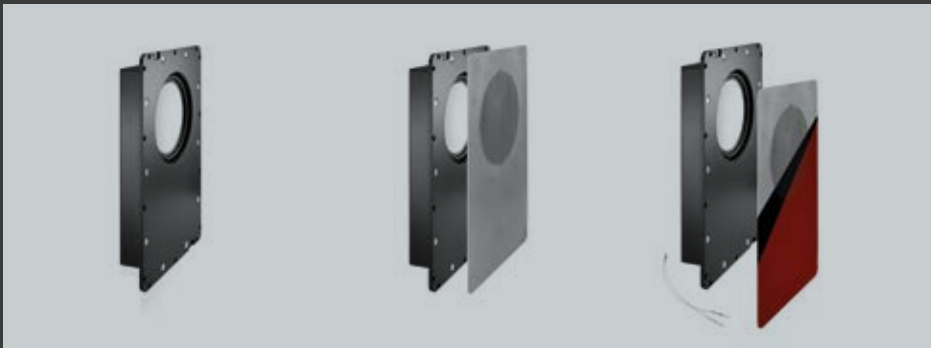

- > *Hidden, thin, coverable INWALL speakers*
- > *INWALL amplifier*
- > *EXTERNAL WATERPROOF speakers: super thin, hidden, for those sound lovers willing to hear the best sound*

Inwall 3 WAYS speakers especially made for Videoworks by ASK

External speakers especially made for Videoworks by ASK

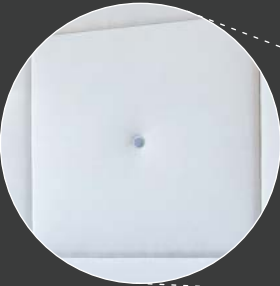

Active Noise Cancelling

ANC has been created out of the collaboration between Ferretti Group CRN S.p.A and **Videoworks**, after more than 20 months of studies and tests with the Università Politecnica delle Marche.
ANC “Active Noise Cancelling” is a patented system on international basis, which allows to reduce the noise inside the cabin during navigation. Microphones are positioned in the bed area and they capture noise in real time. After the noise frequency is processed, a new noise frequency is created, but it is opposite to the first one so that it is able to cancel it.

It can either be activated or deactivated straight by the Owner or the captain and it guarantee:

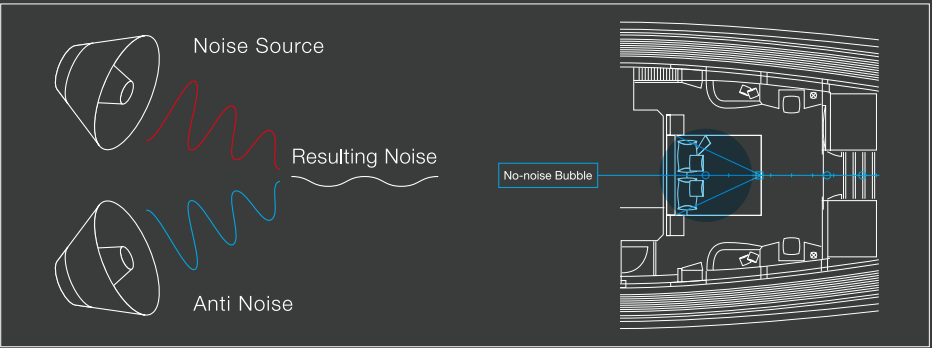

- > *Best efficiency*
- > *Independence of installation*
- > *Intrinsic adaptability*
- > *Reliability and resilience of the different components*
- > *Compact speakers and electronics*

Videoworks “ANC” system on board of ISA 140 MY Silver Wind, by Videoworks

Videoworks “ANC” system, by Videoworks

Sound Masking

The **Sound Masking** is a last generation phenomenon that allows human hearing being focused only on the sound it likes the most. The **Sound Masking**, which can be also activated from the smart watch, delivers the feeling of being surrounded by a real sound bubble, while being isolated from background noises and unwanted sounds. “...the sound spectrum and level is specially shaped to provide the degree of privacy desired by occupants. Masking operates by covering up or masking unwanted sounds, similar to one-way windows that block the ability for a person to see persons behind them, or perfume that covers up other body odors”.

Sound masking
realized in preview
for FM Architettura d’Interni

Wearable Devices

The latest Samsung Gear smart-watch, integrated by a Videoworks software, allows users to control curtains, atmospheres, music and movies just by touching the customizable icons on the screen. This is a perfect combination of design and technology, which will let people have a complete domotic control of their homes, while staying comfortably seated on the sofa.

The Videoworks software will be compatible also with the Apple watch.

for FM Architettura d’Interni

Light Design & Light Engineering

The implementation of light is getting more and more pivotal in our life.
Creating atmpospheres and scenarios and controlling everything via touch panel is an experience **Videoworks** can deliver.

Through its own Light Engineering Department, **Videoworks** gives support to:

- > *Architects*
- > *Electricians*
- > *Technicians*

Allowing:

- > *To choose the lights and optics*
- > *To choose light sources*
- > *3D calculations and simulations*
- > *Rendering*
- > *CAD positioning*
- > *Circuits details*
- > *Lighting wiring schemes*
- > *Wires technical dimensioning*
- > *Technical assistance for bus (DALI, DMX, PWM...)*

All that, to always deliver it's Clients the desired athmosferes and scenarios.
