

*"Volans<sup>2</sup> is the boat for people of all ages, to experience the fun of rowing".*

**Nico Rienks**  
two-time Olympic gold medallist  
in rowing for The Netherlands

### More exercise, more rowers

The Royal Dutch Rowing Federation (KNRB) and the International Rowing Federation (FISA) share the ambition to make rowing more accessible to a larger population and let more talents join the sport. Volans Rowing aims to contribute to these plans and goals with the development of innovative products such as the Volans<sup>2</sup>.

### Innovative and high tech

The Volans<sup>2</sup> is the result of a collaboration with various parties. State of the art knowledge, technology and materials – of TU Delft and DSM – have been used in the development process in combination with the craftsmanship and practical know how of manufacturers such as Tahe Marine (Estonia). The boat is most certainly innovative and high tech.

### Volans Rowing

Volans Rowing is a company owned by Cees van Bladel and Lenneke de Voogd in collaboration with their production partner in Estonia. Cees van Bladel is former Olympic sailor and enthusiastic endurance athlete. Lenneke de Voogd is also an active all-round athlete. Both have vast experience in innovation in sports.

In the development of the Volans<sup>2</sup>, Volans Rowing collaborated with DSM, TU Delft, Infinious, Concept 2, VU Amsterdam, The Royal Dutch Rowing Federation (KNRB), Tahe Marine (Estonia), InnoSportNL, DiDiD, KvD and Rovinox.

VOLANS  ROWING

*"De rowing federation thinks this is a really great development. The boat offers people, members and non-members of clubs, the possibility to enjoy the healthy sport of rowing in the open air".*

**Maurice Leeser**  
director Royal Dutch Rowing Federation

 VOLANS<sup>2</sup>

the NEW rowing  
EXPERIENCE

Enjoying the freedom of the water,  
wherever, whenever and  
as often as you like!

### A fun and healthy water sport

Enjoying the freedom of the water, wherever, whenever and as often as you like! That is the experience with the Volans<sup>2</sup>. This new, innovative rowing boat gives you the opportunity to combine your exercise with pleasure in the open air.

### For leisure and (top) sports

The Volans<sup>2</sup> is not much larger than a kayak but still gives the feeling of a slim and slender racing skiff. With this difference: the seat doesn't slide, but the rigger does – that is the part with the oars. The Volans<sup>2</sup> is fast, light and compact, making it suitable for the recreational athlete, for upcoming rowing talents and for the (elite) athletes who like to do their training in the open air; for young and old, for students and veterans.

### Ready, steady, row

Due to her stability on the water, rowing with the Volans<sup>2</sup> is easy to learn. The boat fits on the roof of a car and can easily be stored at home in the garage or garden. The sliding rigger is quickly mounted. It only takes a short time to get on the water.

Ready, steady, row.
