For cleanliness and hygiene ...

25 years of experience

Founded by **Jerónimo Arija**, **Induquim** began in 1994 with 2 divisions: Hospitality and Communities entities.

Supporting our customers

Our customers and our drive for continuous improvement have led **Induquim** to develop effective solutions in products and services.

Everything you need

Managed by experts in the different Professional Cleaning fields, **Induquim's products range** provide the best solutions for every need.

Committed to R&D

Induquim R&D develops its new formulas, products and cleaning programmes with the latest in technology to improve all results.

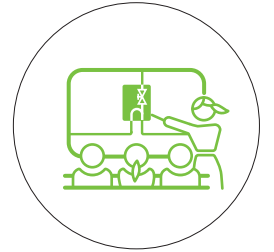

Affordability

Induquim analyses the entire processes to achieve savings in products, consumables, energy, time, maintenance, durability ... and staff efficiency.

Why induquim?

Custom training

At **Induquim**, we provide training courses on new products and protocols, cleaning and hygiene processes for managers and professionals.

Comprehensive programmes

Because each of our customers is unique. Our experts work out the best solutions and specific cleaning programmes to suit your situation.

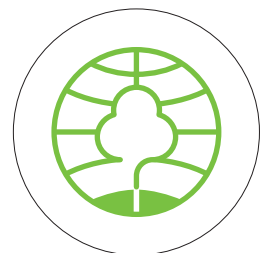

Spanish technology

Induquim competes internationally with Spanish technology, making it the national industry's leader in products, systems and patents for Cleaning and Professional Hygiene.

Quality + the environment

For **Induquim**, besides strict compliance with European Union standards, top quality and environmental stewardship is also a moral and corporate commitment to sustainability.

Why Induquim?

Research, Innovation and Technology to serve our customers

A history of...

1994

Induquim starts out

with its **Hospitality and Collectivities** entity divisions and, months later, **Automotive and Transport** and **Industry**.

2000

New divisions

in the **Food Industry**, **Professional Laundry** and **Concentrates**.

AENOR certifies it as **ISO 9001** compliant.

2003

New installations

Cleaning and hygiene: keys to your hotel's reputation

Many people co-exist and move around hotels every day and that's why profound, detailed cleaning is of extreme importance. Many times disinfection is also required in some areas to eliminate bacteria that have been able to affect a specific environment or surface.

When a guest stays in a hotel, he or she expects good service, that the expectations are met or are even better than what he/she booked and to feel comfortable, at home. The bedroom, the bathroom and the facilities in the hotel must be clean and cared for, tidy and sanitised.

Hotel cleaning is really important: even though a thousand things are taken care of in an exceptional way, if the bathroom is not gleaming, the furniture and the surfaces are not perfectly clean or the sheets, towels and tablecloths are not impeccable and unstained, the reputation will be affected and the guest will not stay in the hotel again.

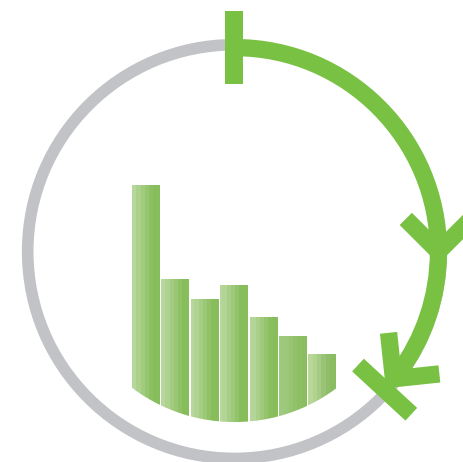

Induquim has a complete variety of products and systems aimed at cleaning, sanitising and disinfecting all the areas and elements in a hotel, and always adapted to the real needs demanded by the client.

Housekeeping

Bedrooms, bathrooms and communal areas in a hotel

Induquim has a wide range of “Ready to use” high quality products to clean and disinfect all the areas in a hotel. For the economy of scale processes, Induquim has developed the **Massplus® concentrated range**, studied to be the best alternative, both economically and ecologically, within the solutions that the professional cleaning and hygiene market offers for Housekeeping.

The use of concentrated products exponentially reduces the different logistics costs and substantially lowers carbon emissions. Moreover, the correct dosage of concentrated products with a precise and professional dilution system achieves direct profits in the cleaning process and in sustainable consumption.

- Reduction in the amount of waste products
- Economic benefits in transport and storage
- Exact dosages without product wastage
- Sustainability and respect for the environment
- Easy to use, handle and store

AG+

Concentrated ammonia cleaner

Especially suited to clean stoneware and for all types of surfaces that need to be cleaned except wood and untreated cork.

MG+

Concentrated multiuse cleaner

Product specially studied to effortlessly clean and remove dirt and grease.

FG+

Concentrated floor cleaner

Product suited to cleaning and polishing any surface, leaving a very pleasant and long-lasting fragrance.

BG+

Concentrated bathroom cleaner

Designed to clean, sanitize and remove residues in bathrooms.

LG+

Concentrated glass cleaner

Product specially studied to make a perfect cleaning of glass, mirrors, appliances, TV, computers etc.

RG+

Concentrated deodorizing air freshener

Product specially studied to set the places where it is applied generating a pleasant and intense aroma.

Kitchens

Cleaning and disinfecting kitchens

Cleaning and disinfecting, like handling and storing food products, is essential to give a safe and quality service to your guests.

Induquim has a wide range of high quality “Ready to use” products to clean and disinfect kitchens. And to get greater profitability, Induquim has developed the **Massplus® range, products** studied to be applied in hotel and resort kitchens which, along with Induquim’s dosage equipment, make the advantages and benefits, both economic and in space, cost control and handling, very significant.

DG+

Concentrated degreaser

Highly concentrated product with great degreasing power.

HG+

Concentrated sanitizing cleaner

Suited to cleaning, sanitizing and deodorising environments with danger of contamination.

FG+

Concentrated floor cleaner

As in the Housekeeping area, the FG+ concentrated floor cleaner is apt to treat the typical kitchen surfaces in hotels.

Smart Resort®, professional laundry

Exclusive system for resort and hotel complex linen

Innovative + Profitable + Balanced + Sustainable = Intelligent rest

A universal characteristic shared by hotels is cleanliness and whiteness. Whiteness donates luxury and sophistication and it is associated with purity and relaxation.

Induquim has created an innovative and exclusive washing system focused on treating hotel linen, sheets and towels that are constantly used and need special treatment.

The **Smart Resort®** washing system cares for the fabrics treated to generate total wellbeing for your guests and gets the best washing results with maximum savings, profitability and efficiency. Moreover, it respects the environment thanks to its exact dosage, to the noble components that it is made of and to the absence of abrasive, caustic products.

Cleaning and hygiene: the beginning of wellbeing

Cleaning and disinfecting in nursing and geriatric homes implies implementing protocols that are delicate and unavoidable, demanding and complex within professional cleaning. The complete sanitisation and disinfection of all parts of the centre:spaces, surfaces, utensils and objects mean that it is a sector with a high degree of exactitude.

Adapted furniture, beds with anti-fall systems, adaptors for washing in showers and many other elements in these types of facilities must be cleaned in a special way.

The residents are people with special characteristics that must be taken into account when establishing cleaning protocols.

The primordial and most important is that, given that they are people considered at risk and whose health is very often delicate and, therefore, more susceptible to contagion given their physical conditions, cleaning must be constant and efficient.

Induquim has a complete variety of products and systems aimed at cleaning and disinfecting all the areas and elements in nursing homes for the elderly.

- Housekeeping
- Kitchens
- Laundry

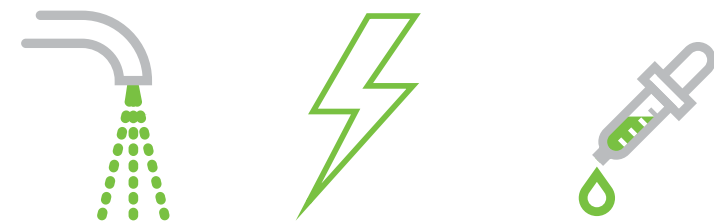

STANDARD SYSTEM

induquim BENEFITS

Savings in processes, time and consumables

Process and consumable savings

Higher profitability

Housekeeping

Bedrooms, bathrooms and communal areas in nursing homes

Induquim has thought about the elderly and that is why it has a wide range of products and systems to achieve the best possible results. All of the areas to be cleaned in a nursing home have been carefully studied and examined by Induquim's technical development team in order to offer the best possible products to obtain the residents' maximum satisfaction.

To get total satisfaction for the residents and relatives in a nursing home, Induquim proposes profitable and sustainable cleaning with "Ready to use" products manufactured with the noblest raw materials or with concentrated products from the Massplus® range.

Induquim's Massplus® range of concentrates is studied to be an alternative, both economically and ecologically, within the solutions offered in the professional cleaning and hygiene market within the needs of Housekeeping.

AG+

Concentrated ammonia cleaner

Especially suited to clean stoneware and for all types of surfaces that need to be cleaned except wood and untreated cork.

Kitchens

Cleaning and disinfecting kitchens

Handling and storing food products in a nursing home requires special care, a safe and quality service for the residents who, sometimes, have delicate health.

The kitchens require products that ensure correct cleaning, hygiene and disinfection and prevent risks for the residents.

Induquim proposes profitable and sustainable cleaning with "Ready to use" products manufactured with the noblest raw materials or with concentrated products from the Massplus® range, with clear usage and storage advantages.

DG+

Concentrated degreaser

Cleaning and hygiene: comfort aboard

Unlike hotels, cruises are always an activity for pleasure and relaxation in which the passengers spend most of their holiday time on board the ship and the services have to be extraordinary.

This is where professional cleaning and hygiene adapted to the great and demanding needs of the sector come into play.

In order to achieve customer loyalty, the cleaning and hygiene in all the areas included in a cruise are fundamental.

Induquim has developed a complete range of **Massplus® concentrated products and systems** aimed at cleaning and disinfecting all the areas of a cruiser that are adapted to the limitations of space and transport with maximum quality.

Performance concentrated products

Maximum safety with minimum waste

Housekeeping

Cabins, bathrooms and communal areas on cruisers

Induquim has a wide range of “Ready to use” high quality products to clean and disinfect all the areas on a cruiser. In this case, with little space and volume limitations and transported weight, Induquim has developed the **Massplus® concentrate range**, studied to be the best alternative, both economically and ecologically, within the solutions offered in the professional cleaning and hygiene market for cruiser Housekeeping.

The use of concentrated products exponentially reduces the different logistics costs and substantially lowers carbon emissions. Moreover, the correct dosage of concentrated products with a precise and professional dilution system achieves direct profits in the cleaning process and in sustainable consumption.

- Reduction in the amount of waste products
- Economic benefits in transport and storage
- Exact dosages without product wastage
- Sustainability and respect for the environment
- Easy to use, handle and store

AG+

Kitchens

Cleaning, sanitisation and disinfection of kitchens on cruisers

The gastronomy on a cruise is one of the differentiating services that the shipping companies use in their marketing. Cleaning and disinfecting the kitchens is an essential requirement to give a safe, quality service to the passengers. That's why the different areas must be carefully cleaned and disinfected. Handling and storing food products is a critical point that a lot of attention must be paid to.

Induquim, has introduced, within its **Massplus® range**, **products** that have been specially studied to be applied in the kitchens on cruisers, along with Induquim's dosage equipment, make the advantages and benefits, in space, handling and storage within the kitchen, very significant.

DG+

Concentrated degreaser

Highly concentrated product with great degreasing power.

HG+

Concentrated sanitizing cleaner

Suited to cleaning, sanitizing and deodorising environments with danger of contamination.

FG+

Concentrated floor cleaner

As in the Housekeeping area, the FG+ concentrated floor cleaner is apt to treat the typical kitchen surfaces in cruiser linen.

In addition to the specially studied concentrated products to achieve optimal profitability and benefit, Induquim also has a range of “Ready to use” high quality products for any cleaning area.

Smart Cruise®, professional laundry

Exclusive system for cruiser linen

Innovative + Profitable + Balanced + Sustainable = Intelligent rest

Another characteristic about cruisers is that they are also hotels. And their need to clean and whiten all of the linen.

Whiteness donates luxury and sophistication and it is associated with purity and relaxation.

Induquim has created an innovative and exclusive washing system focused on treating cruiser linen, sheets, towels, tablecloths, uniforms, etc that are constantly used and need special treatment.

The **Smart Cruise®** washing system cares for the fabrics treated to generate total wellbeing for the passengers and gets the best washing results with maximum savings, profitability and efficiency. Moreover, it respects the environment thanks to its exact dosage, to the noble components that it is made of and to the absence of abrasive, caustic products.

Cleaning and hygiene: the origin of your plates

In the Catering sector cleaning and hygiene are essential to the establishment's prestige. **Induquim**, in this commitment to excellence, is part of your team.

Every establishment in which food is handled and served to the public has a moral responsibility and, of course, extra legal responsibilities. That's why **Induquim** pays so much attention to this sector. Caring for the elements that come into play for an impeccable service means offering products and systems that are extraordinarily clean and hygienic.

Induquim has developed a range of high quality products with noble raw materials that ensure complete satisfaction for both the workers and the consumers: specialised products and systems to cover all the specific needs in a direct and complete way.

Induquim has high quality "**Ready to use**" products and **Massplus® concentrated products** that generate a direct benefit in the results, storage, handling and transport. Always respecting the environment.

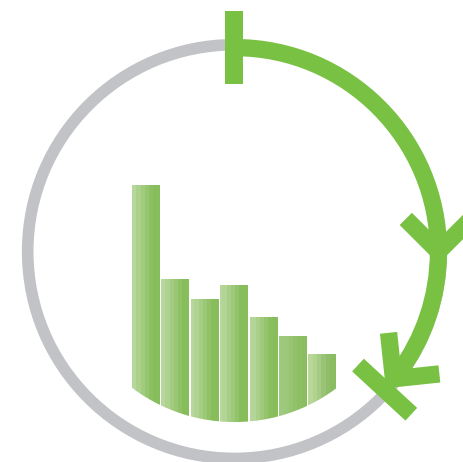

Induquim's Personalised Consultancy Service offers professional solutions to improve your business.

Kitchens

Cleaning and disinfecting kitchens

The kitchen is the most important area within the restaurant/catering world. This is where there is the highest amount of material susceptible to cleaning and disinfection. That's why **Induquim** gives it special importance, given that the kitchen is the place where the food, which the customers will eat later on, is stored, handled and prepared.

Induquim has a division that covers all the products and systems required to offer a quality service. The **Masschef® products** include automatic dish washing and brightening products, manual dish washing and degreasing products that cover all the areas in a professional kitchen.

Massplus®

In addition to the specific "Ready to use" products for professional Catering, **Induquim** has a division of **Massplus® concentrated products** to optimise resources in terms of use and storage capacity.

Rooms

Cleaning and disinfecting rooms and facilities

High quality products to guarantee an efficient service to your diner. **Induquim** has a large variety of products to cover all the cleaning and disinfecting needs of the rooms and lounges with the **Masslimp® range**, products for floors, disinfectants, general cleaners and air fresheners.

Bathrooms

Cleaning and disinfecting bathrooms

The first impression is what counts and a clean, disinfected and well fragranced bathroom provides the business with added value to the service and the quality of the dishes.

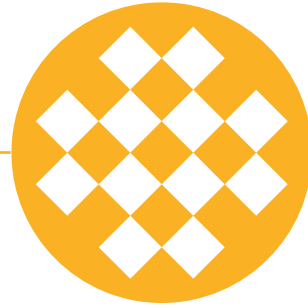

That's why **Induquim** has a complete range of **Masslimp® products** that is specific for bathrooms, which covers all the needs within the professional hotel sector. Likewise, **Induquim** has a wide range of air fresheners with pleasant and long-lasting fragrances.

Masslimp®

Floor Care

A wide range of products to meet all **the cleaning needs on any kind of surfaces**, such as ceramic tiles, stone, wood, parquet, marble or terrazzo floors. These products are always provided with an excellent maintenance and protect the treated surface.

In addition to the extraordinary cleaning, this range of products provides the surface **with a natural brilliance without changing the original colour at all**. They can be adapted depending on the particular application to be suitable for both, cleaning by hand and with automatic scrubbing machines.

When talking about cleaning and sanitizing different surfaces, it is essential to make an appropriate use of quality products taking into account its composition as well as its structure. For this reason, **Induquim** carefully selects and prepares the raw materials to be used so that the finished product is totally in line with the quality expected by the consumer.

In addition, the **Masslimp®** floor maintenance and treatment products are endowed with delicate fragrances, ranging from citric and fruits tones to floral and relaxing scents in order to keep a fresh and lasting aroma.

What are “surfactants”?

AREA TREATED WITHOUT SURFACTANTS

The surface tension of water generates droplets on a surface.

All **Induquim** floor cleaners contain **surfactants** that decrease the surface tension of water by breaking the drops so that the product spreads easily and uniformly over the whole surface forming a layer, penetrating into all the pores to grant maximum effectiveness. Therefore, **Induquim** floor cleaners

AREA TREATED WITH SURFACTANTS

AREA TREATED WITH SURFACTANTS EVENLY

make a saving in terms of quantity, time and energy as they extend over the surface and make the removal of dirt easier.

Induquim combines two types of surfactants to obtain better quality: non ionic surfactants that improve the removal of grease and anionic surfactants that accelerate the cleaning procedure.

Masslimp Floor Care

Biofresh Lima

Bioalcohol lime fragranced floor cleaner

E-100C

Masslimp
Disinfectants

Masslimp®

Disinfectants

At **Induquim** we understand the importance of disinfection in cleaning processes and that's why one of our product ranges is exclusively focused on disinfection.

Kitchens, dining rooms, surface where food and utensils are handled, develop colonies of microorganisms that are a health hazard and they are commonly present in the raw materials themselves and in the atmosphere, such as: *E. Coli*, *Staphylococcus Aureus*, *pseudomonas*, *Streptococcus*, and others that are very important and dangerous like *Lysteria Monocytogenes*.

For these we have a range of highly powerful degreasing-products for all types of surfaces, both for food use and in the atmosphere.

Masslimp Disinfectants

Biofresh Bac

General disinfectant cleaner

H-106

Product with long-lasting triple action: polishes, disinfects and fragrances. Combines surface disinfection and polishing with cleaning and leaves a pleasant fragrance in the surrounding environment. It includes surfactants and solvents to dissolve the dirt. Suitable for use in the food processing industry.

Effective and delicate soaps developed using elements that significantly exceed the tough cosmetic industry’s quality control standards. They present **appropriate pH and moisturising agents to clean and hydrate the skin**. Daily use of the hands doing any activity causes continuous deterioration that can be serious in the long term.

Induquim has gone especially for a range of delicate soaps for all kinds of skin.

Lemon, vanilla, rose, coconut and aloe vera are some of the fragrances chosen to give the hands a special touch as well as disinfect and sanitize them.

Induquim automatic hand foam dispenser

Dose per pulse: 0.5 ml liquid

Air Fresheners

 induquim

 induquim

Masslimp®

Air Fresheners

After carefully studying the latest global fragrances, **Induquim's Technical Research and Development Department**, has developed innovative air fresheners that combine the power of deodorisation with long-lasting fresh fragrances.

Bulk **Airmatic** air fresheners fragrance very pleasantly and have been enhanced for the scent to last longer thanks to the high concentration of **Odofresh** and **Odofresh+** developed to freshen and sanitize bathrooms.

The two lines of air fresheners present characteristic fragrances ranging from fruits or flowers to diverse natural aromas.

Masslimp Air Fresheners Airmatic

Airmatic

Deodorising air freshener

The Airmatic air fresheners create a pleasant ambiance in the place where they are used and are able to deodorise the air that is in contact with the product. It incorporates a characteristic fragrance specially studied last.

Professional laundry

Induquim Research and Development Department has developed the **Masswash®**, range of latest generation products to solve any professional laundry problem.

Personalised washing systems produce the highest quality and reduce energy, water and personnel costs by respecting the European Union's strict environmental legislation.

Masswash® processes and systems

Induquim offers their clients a **Personalised Complete Advice service** consisting of specialised washing professionals analyze your plants, facilities, products and processes so that you can attain greater productivity.

Remote control laundry management

Latest generation Software developed by **Induquim** to remotely manage, control and follow-up the laundries.

Indunet allows, in a fast and simple way, continuous monitoring of any installation carried out by **Induquim**.

One more step for **Induquim** and its philosophy to continuously invest in technology and research development.

Profitability

Increased profits

Masswash®

indubox

Besides the exclusive washing systems, Smart Care® for clothes in nursing homes and Smart Resort® for hotels, spas and gyms, Induquim R&D has developed the Indubox system to generate even better profits from washing processes: Smart Care® Inside and Smart Resort® Inside.

Perfect concentrate system

- Removes all ordinary stains
- Protects fabrics without damaging them
- Maximum savings and profitability
- Perfect dosages
- Ultimate hygienisation
- Eco-friendly

Smart Care® Inside

Exclusive system for nursing home clothing

Aloe Care Inside

Concentrated moisturising detergent with Aloe Vera

It comprises sequestrants, surfactants and optical whiteners that make the washing process optimal. Plus, it features jobon which has extra cleansing and foam control properties.

Fancy Care Inside

Low-alkalinity concentration active detergent

It comprises a large amount of sequestrants, surfactants and optical whiteners that make the washing process optimal. It also contains an active carbon-based ingredient to help the surfactants do their job.

Suax Care Inside

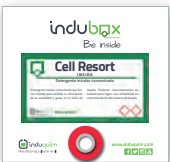

Fully concentrated neutralising softener

Removes alkalinity and chlorine residues. Prevents static electricity and gives garments a soft, pleasant feel. Plus, Suax Care Inside gives more volume, creating a pleasurable, clean sensation.

Smart Resort® Inside

Exclusively for hotel, spa and gym linens and clothing

Cell Resort Inside

Concentrated micellar detergent

Concentrated micellar detergent that forms micelles to facilitate the removal of dirt and grease in the laundry. This product has been carefully designed to achieve exceptional cost-effectiveness within your washing system.

Ionic Resort Inside

Concentrated comprehensive efficiency ionic detergent

An all-round ionic detergent. Product that contains optical bleach, natural soap to take care of and protect fabrics and a pleasant perfume to create an incredible sensation of well-being.

Oxyum

High-efficiency, low-temperature concentrated oxygenated whitener

Highly effective, high-performance product for whitening and sanitising garments. A complete oxygenated low-temperature bleach. It does not cause unpleasant odours compared to peracetic acid-based products.

Suax Resort Inside

Fully concentrated neutralising softener

Makes garments airy and voluminous from the first wash. It is an alkalinity and chlorine neutraliser composed of organic acids and anti-static components that help garments pass through the roller press.

Smart Care® Inside + Smart Resort® Inside

EXCLUSIVELY FOR COLD WATER AND CHLORINE-FREE WASHING

Indubox Oxyum

Concentrated full oxygenated whitener with high efficiency at low temperatures

Indubox Mantex

Special concentrated degreaser for low temperature

Self-service laundries

Laundry products for self-service laundries

Induquim has developed specific products with the **European Ecolabel** label for self-service laundries.

This booming sector also benefits directly from the **Indubox system** as it automates processes, providing maximum comfort and safety with minimum customer interaction while avoiding spills, bad dosing and ongoing attention by operators.

Plus, **Induquim** products reduce process times, save energy and consumables with a perfect finish for clothes that make self-service laundries a pleasant, straightforward job for our customers.

EcoService

Ecological textile detergent

High concentration product ideal for washing fabrics. Its ingredients protect fabrics from harmful detergent compounds. Easy-to-apply on tough spots.

EcoService Soft

Ecological fabric softener

It makes garments perfectly soft with a pleasant, intense scent. Ingredients that, with a single application, turn rough and rigid fabrics into soft and supple, pleasantly scented garments.

For a perfect finish, incorporate a whitener into the washing process

Traditional process

The efficiency of a washing process is the ratio between the resources used and goals achieved. We normally give great importance to the cost of a detergent, but other factors in the process are very decisive.

In less than 45 minutes

At **Induquim** we believe that any type of garment that is washed must also be disinfected because we don't know who the last person to use it was; based on this premise, we are really proud to present the **EMG Saniquick® Washing and Disinfecting System**. Certified in the **WKF European Applied Research Institute** (Germany).

EMG SaniQuick®

EMG Saniquick® allows us to wash and disinfect any load of organic dirt and eliminate the costly and infectious soaking and pre-washes. In other words, it is a process with a wide range of applications as it can be used not only with hospital garments and linens but also in the hotel, catering and food sectors,... **EMG Saniquick® is a real scientific breakthrough, resulting from the intense and brilliant research effort that Induquim has been carrying out over the years.**

In less than 45 minutes

SaniQuick Active

Triple action activator

Essential product to carry out the EMG SaniQuick washing and disinfecting process for fabrics and discharges . SaniQuick Active is the eco-activator of the process.

Innovative + Profitable + Balanced + Sustainable = Intelligent care

Removes stains and dirt that are common in the fabrics in Nursing Homes and Centres for the Elderly: blood, body fluids, excrements, etc.

The **Smart Care®** system washes and treats the fabrics respecting and caring for the most delicate skins thanks to its low abrasive components and exact dosages.

Facilitates the resident's wellbeing and prevents common problems like postural ulcerations due to prolonged decubitus. Very profitable system that achieves savings in water, time, energy and exact quantity of product.

And it respects the environment thanks to the noble components in the products.

Smart Care®

- Innovative and exclusive to **Induquim** for nursing homes
- Removes all common stains
- Cares fabrics without damaging them
- Cares and protects the most sensitive skins
- Maximum savings and profitability
- Exact and balanced dosages
- Maximum sanitisation
- Maximum comfort, rest and calm
- Sustainable and respects the environment (Eco-Friendly)

Aloe Care

Moisturising detergent with Aloe Vera

Product made up of sequesters, surfactants and optic whiteners that offer optimal treatment in the wash process. Moreover, it includes soap that acts as an extra cleaner and foam controller.

1.0-3.0	FRESH	0.994-1.014	20 LITRES	20 LITRES

Innovative + Profitable + Balanced + Sustainable = Intelligent rest

A universal characteristic shared by hotels is cleanliness and whiteness. Whiteness donates luxury and sophistication and it is associated with purity and relaxation. Induquim has created an innovative and exclusive washing system focused on treating hotel, spas and gymnasium linen, sheets and towels that are constantly used and need special treatment.

The **Smart Resort®** washing system cares for the fabrics treated to generate total wellbeing for your guests and gets the best washing results with maximum savings, profitability and efficiency. Moreover, it respects the environment thanks to its exact dosage, to the noble components that it is made of and to the absence of abrasive, caustic products.

Smart Resort®

- Innovative and exclusive to Induquim for hotel linen
- Prevents incrustations
- Cares for fabrics without damaging them
- Cares for and protects the most sensitive skins
- Maximum savings and profitability
- Exact and balanced dosages
- Maximum sanitisation
- Maximum comfort and rest
- Sustainable and respects the environment (Eco-Friendly)

Cell Resort

Micellar detergent

Micellar detergent that forms micelles that facilitate the removal of dirt and grease in the bathroom.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING	20 KILOS
11.5-13.5	CHARACTERISTIC	1.069-1.089	20 KILOS		

Ionic Resort

Comprehensive efficiency ionic detergent

Comprehensive efficiency ionic detergent. Product that contains optic whiteners, natural soap to care for and respect fabrics and a pleasant fragrance to get an incredible sensation of wellbeing.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING	20 KILOS
8.5-10.5	CHARACTERISTIC	1.029-1.049	20 KILOS		

Oxy Resort

High and low temperature organic peroxide

Oxy Resort is a stabilised peracetic so that the Smart Resort® system can also work at a high temperature.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING	22 KILOS
0.0-2.0	CHARACTERISTIC	1.090-1.011	22 KILOS		

Suax Resort

Complete neutralising softener

Sanitising product that offers garments sponginess and volume that is appreciated from the first wash.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING	20 LITRES
0.5-2.5	FRESH	1.002-1.022	20 LITRES		

4D Max Evolution®

Latest generation direct powder dosage system

PATENTED BY induquim

- Multi-service equipment to supply both tunnel washers and washing machines in industrial laundries
- Exclusive system for products in the **Masswash®** line
- Doses up to 30% faster than traditional systems
- 100% efficiency
- Easy maintenance
- Precise and controlled dosage
- We cover all the client's needs
- Safety in handling
- Prevents product contamination

4D Evolution®

Revolutionary Predilution System

PATENTED BY induquim

Wash up to 2.000 kg of linen
with only 10 kg of powder detergent

*More for much less
with the innovative predilution system
that has revolutionised
professional laundry*

**Multi-service equipment
adaptable to any laundry**

- Save up to 40% on detergent and water costs
- Increase productivity by 25% by simplifying operations
- It occupies 75% less space than traditional systems and without noise
- Exclusive system for the products in the **Masswash®** line

*Always obtain excellent
washing results thanks
to a 100% homogeneous predilution*

Masswash Professional laundry Liquids

Alkan
Alkaline activator

Ideal for sanitizing hospital clothes. Effective washing in organic dirt processes with no need for soaking, guaranteeing the total removal of bacteria on clothes and from spillages. Medium-soft water.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
12.0-13.0	CHARACTERISTIC	1.109-1.129	20 KILOS	

Alkan Extra
Total alkaline activator

Special product to wash and disinfect clothes with a lot of organic dirt (hospitals, old people's homes, psychiatrists hospitals). Hard water.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
12.0-13.0	CHARACTERISTIC	1.208-1.228	25 KILOS	

Deterlav
Fast acting moisturising detergent

Very powerful moisturising detergent for washing all kinds of fabric. Respects and revives the natural colour of the fibres.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
7.0-9.0	CHARACTERISTIC	1.030-1.050	20 KILOS	

Enzimatic
Fast acting enzymatic detergent

Special detergent for washing fabrics with large quantities of organic dirt thanks to the inclusion of enzymes in its formulation. No organic origin residues left and it respects the original composition of the fibres.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
7.0-8.5	CHARACTERISTIC	1.035-1.055	20 KILOS	

Deterquid
Fast acting liquid detergent

Highly concentrated product ideal for washing fabrics in hotels, restaurants and communal facilities. Includes ingredients that protect fabrics from aggressive deteratives. Easy to apply on difficult stains.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
8.0-10.0	FLORAL	1.030-1.050	20 LITRES	

Monolav
Monocomponent detergent

Single component alkaline product. Excellent washing results at any temperature and in all types of waters. Efficient against all types of dirt. Cleans, degreases and whitens all at the same time. Contains optic whiteners that offer great whiteness and revive colours. Ideal to wash any type of fabric except delicate garments like silk or wool. Includes a pleasant citric fragrance to give a greater sensation of cleanliness and freshness.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
10.5-11.5	ORANGE	1.047-1.067	20 LITRES	

Mantex

Special degreaser for washing lines in cold

Designed to wash linens in cold water and without using chlorine. This revolutionary product is formulated for use with our innovative washing systems. Mantex is the perfect addition for the professional laundry sector.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS		PACKAGING	10 LITRES O	20 KILOS
6.0-8.0	LEMON	0.984-1.004	10 LITRES	20 KILOS	INDUBOX		

Humecta

100% concentrated eco-friendly moisturiser

Totally active 100% ecological product, very powerful moisturiser and degreaser that rapidly impregnates the fabric, getting the most ingrained dirt out. Performs excellently at low and high temperatures.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS		PACKAGING	10 LITRES O	20 KILOS
6.5-8.5	CITRIC	1.006-1.026	10 LITRES	20 KILOS	INDUBOX		

Humecta Neo

Concentrated moisturiser

Concentrated product, very powerful moisturiser and degreaser that rapidly impregnates the fabric, getting the most ingrained dirt out. Performs excellently at high and low temperatures.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS		PACKAGING	20 KILOS
5.5-7.5	CITRIC	0.988-1.008	20 KILOS			

Humecta Citric

Neutral moisturiser

Neutral degreaser and moisturiser that penetrates into the fibres of the fabric facilitating the removal of dirt.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS		PACKAGING	20 KILOS
6.0-8.0	CITRIC	0.982-1.002	20 KILOS			

Humecta Pasta

Fast acting moisturising paste

Rapidly dissolving powerful pasty degreaser. Suitable for moisturising delicate clothes.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS		PACKAGING	10 KILOS
5.5-7.0	FLORAL	NP	10 KILOS		CUBO	

DD Complet

Concentrated neutral degreasing detergent

Neutral 100% active detergent for getting stains out, based on vegetable surfactants and with no need for alkalines in the washing process.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS		PACKAGING	20 KILOS
6.5-8.5	CHARACTERISTIC	1.006-1.026	20 KILOS			

Masswash Professional laundry Liquids

Suax 3000
Concentrated neutralising chlorine and alkaline softener. Relaxing

Highly concentrated softener that actively neutralises the residues of detergents and bleaches used in the washing process. Untangles the fabric's fibres, softening them while adding volume and sponginess. Facilitates the draining of the clothes as well as the final step in the calendar. Relaxing fragrance.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
0.0-2.0	FLORAL	1.012-1.032	20 LITRES	

Suax 2000
Neutralising chlorine and alkaline softener

Concentrated softener that actively neutralises detergent and bleach residues left by the washing process. Untangles the fabric's fibres, softening them while adding volume and sponginess. Facilitates the draining of the clothes as well as the final step in the calendar.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
0.5-2.0	FLORAL	0.998-1.018	20 LITRES	

Neufresh
Neutralising alkaline softener

Removes alkaline residues left by the washing process and leaves a soft feel to fabrics, facilitating their final step in the calendar.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
0.5-2.0	FLORAL	0.990-1.010	20 KILOS	

Neuflor
Softener

Totally soft with a pleasant intense fragrance. Contains antistatic agents facilitating the final step in the calendar.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)	PACKAGING
2.0-4.0	FLORAL	0.985-1.005	5 20	

NeuGlyn
Wisteria blossom fabric softener

Total softness with a pleasant, intense fragrance. It contains anti-static agents that help the clothing pass through the rolling press.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)	PACKAGING
2.0-4.0	WISTERIA FLOWER	0.990-1.010	5 20	

Sphere
Fabric softener with micro-capsules

State-of-the-art softener that uses micro-capsules that bond to fabrics to scent them with a delicate, fresh, long-lasting fragrance. Its essential oils are released through mechanical or thermal action once the clothes are dry.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (litres)	PACKAGING
2.0-4.0	FLORAL	0.990-1.010	5 20	

Imper SF

Waterproofing, water-repellent for fabrics

High performance product for waterproofing and creating a water-repellent layer on clothing. Suitable for use in work clothes. Imper SF should be applied in the last rinse cycle to achieve the desired results.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
7.0-9.0	CHARACTERISTIC	0.992-1.012	20 LITRES	

Neutrol

Inorganic stain reducer

Additive to remove difficult stains from fabrics.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
3.0-5.0	CHARACTERISTIC	1.302-1.322	25 KILOS	

Recover

Fabric conditioner

Powerful, effective and complete descaler for both special processes for fabrics with scaling and to remove limescale from washing and/or drying equipment.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
1.0-3.0	CHARACTERISTIC	1.235-1.255	20 KILOS	

Ferrosin

Total iron complex

Additive to professionally remove high concentrations of iron from water in the washing solvent as well as iron scaling on fabrics.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)	PACKAGING
2.0-4.0	CHARACTERISTIC	1.044-1.064	1520	

Neukan

Neutralising alkaline liquid

Powerful acidic neutraliser based on a mixture of organic and inorganic acids to generate greater product performance.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
0.5-2.5	CHARACTERISTIC	1.196-2.016	25 KILOS	

Masswash Professional laundry Liquids

Secal
Organic sequestrant

Liquid additive to treat a large amount of metal in the washing solvent. Improves the performance of the detergents used to avoid scaling and lengthens the fabrics' life.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
0.0-2.0	CHARACTERISTIC	1.039-1.059	20 KILOS	

Secal EVO
Comprehensive calcium-removing sequestrant

High quality liquid additive that is added to the washing when a high metal content is present. Double power: sequestrant and decalcifier, enhancing detergent performance and extending the useful life of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
2.5-4.5	CHARACTERISTIC	1.056-1.076	20 KILOS	

Secal TX
Full organic sequestrant

High quality liquid additive that is added to the washing when a high metal content is present. Double power: sequestrant and decalcifier, enhancing detergent performance and extending the useful life of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
2.0-4.0	CHARACTERISTIC	1.105-1.115	20 KILOS	

Cloractiv
Active chlorine liquid

Product base of sodium hypochlorite stabilised with a high concentration of active chlorine. Suitable for low temperature bleaching and disinfection processes.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
12.0-14.0	CHARACTERISTIC	1.015-1.035	23 KILOS	

Oxiactiv
Active oxygen liquid

Oxygenated product with hydrogen peroxide base. Specially designed for washing coloured clothes. An effective sanitizer at medium-high temperatures.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
2.0-4.0	CHARACTERISTIC	1.100-1.120	23 KILOS	

Blanquiox
Low temperature active oxygen liquid

Oxygenated product with paracetic acid base. Designed to bleach and sanitizes all kinds of fabric at low and medium temperatures.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
0.0-2.0	CHARACTERISTIC	1.090-1.110	25 KILOS	

Dosage equipment for liquid products

TUNNEL WASHER EQUIPMENT

Pneumatic tunnel equipment with five channels designed to dose chemical products into a tunnel in a wide range of laundries within the industrial market.

Apt to group together different sets of products in a collector per channel with just one assigned destination module.

MULTI-MACHINE EQUIPMENT

One channel pneumatic equipment to dose chemical products into multiple washing machines in a wide range of laundries within the industrial and OPL market.

Considerably reduces dosage time so that the system can administer greater capacity machines.

ELECTROMAGNETIC PUMP MULTI-MACHINE EQUIPMENT

The electromagnetic pump equipment is designed to dose chemical products into multiple washing machines in a wide range laundries within the industrial and OPL market.

Having an electromagnetic pump means that maintenance is more economical as pipes do not have to be changed.

PERISTALTIC PUMP EQUIPMENT

Peristaltic equipment with 3 to 7 pumps designed to dose chemical products into multiple washing machines in a wide range of OPL laundries.

Each product is dosed without backpressure in the collector.

Masswash Professional laundry Solids

Cosmo DF
Concentrated comprehensive efficiency detergent

Highly concentrated detergent formulated to solve any washing problem in the modern laundry. Includes latest generation ingredients.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
12.0-13.0	FLORAL	1.100-1.200	20 KILOS	

Cosmo
Concentrated detergent for difficult waters

Highly concentrated detergent designed to work in difficult waters containing a large amount of metals such as iron, magnesium, calcium, etc.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
11.5-12.5	FLORAL	1.140-1.160	20 KILOS	

Cilax
Concentrated detergent for very hard water

Highly concentrated detergent designed to work in very hard water. Includes a large amount of lime sequestrants to avoid scaling on fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
10.0-11.0	FLORAL	1.140-1.160	20 KILOS	

Disul
Concentrated detergent for hard water

Highly concentrated detergent designed to work in hard water. Includes a large amount of lime sequestrants to avoid scaling on fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
11.5-12.5	FLORAL	1.090-1.110	20 KILOS	

Prelav
Concentrated detergent for soft water

Concentrated detergent designed to use in soft water. Removes and cleans dirt excellently at any temperature.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
12.0-13.0	FLORAL	1.050-1.150	20 KILOS	

Higiplus
Bleach cleaning detergent

Complete product. Washes, sanitizes and bleaches in only one operation. Excellent washing results.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
11.0-12.0	FLORAL	1.050-1.150	20 KILOS	

Higiplus Low
Low temperature bleach cleaning detergent

Complete product. Washes, sanitizes and bleaches at low temperature in only one operation. Excellent washing results.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
11.0-12.0	FLORAL	1.552-1.572	20 KILOS	

Blancol
Active chlorine in powder

Product that releases highly stabilised chlorine for active sanitizing and bleaching of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
12.0-13.0	FLORAL	1.090-1.110	10 KILOS	

Oxitrón
Active oxygen in powder

Product that releases oxygen activated at low temperature for active sanitizing and bleaching of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
12.0-13.0	FLORAL	1.150-1.250	10 KILOS	

Pow
Additive for washing clothes with persistent dirt

Highly alkaline product that removes persistent dirt. Very powerful degreaser.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
13.0-14.0	FLORAL	1.682-1.702	20 KILOS	

Neutex
Fabric conditioner in powder

Product designed to remove iron scale during the washing process. Its important reduction power facilitates the bleaching of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
NP	FLORAL	1.190-1.210	10 KILOS	

Thor
Detergent atomised with active oxygen

Atomised detergent for washing and bleaching all kind of fabrics.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
10.0-12.0	FLORAL	0.350-0.600	THOR SAC 10 KILOS	

Faced with the challenges presented by the current approach to hygiene in the food industry as established in the EU's complex standard and auditing system, **Induquim's R+D+i Department and its Technical Support Department**, has the complete **Massfood® range** to cover all your cleaning and disinfecting needs in an efficient and safe way.

Induquim's Comprehensive Service

Comprehensive solutions adapted to the specific characteristics of your industry in order to reach optimal levels of hygiene in your facilities, covering risks and needs.

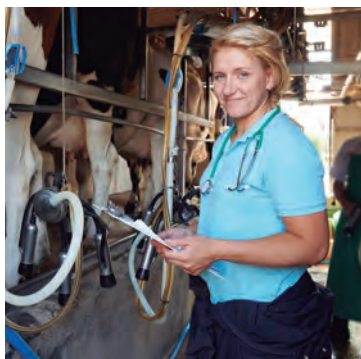

Induquim works alongside you in the implementation through different services. Therefore, we offer:

- **Technical advice on the most suitable products** so that you have the right product in each situation to achieve your goals.
- **Development of specific Hygiene Plans**, defining the cleaning and disinfecting protocol for each room or equipment, how to use the products, effective concentrations, frequency of cleaning and everything that is needed to ensure its correct use.
- **Automation in the cleaning process** through the technical support and availability of a wide range of machinery that allows for C+D efficiency improvements and in the obtained results.
- **Training Courses for the personnel** who carry out the cleaning tasks to ensure they have the correct know-how about how to apply the products.
- **Process consultancy and follow-up**, possibility of microbiological and chemical control of surfaces and atmospheres to validate the hygiene procedures.
- **Development of visible signage** in your facilities.

All of this offered from our deep understanding of the sector, our commitment to put your company at the vanguard regarding health safety. Moreover, in order to guarantee the quality of our products, all of our processes are **ISO 9001:2008 quality standard certified**.

Dairy Industry

Massfood

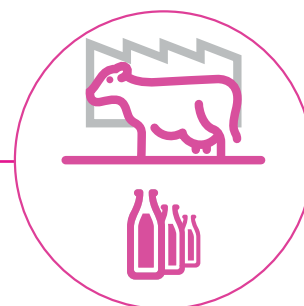

The manipulation of milk and other dairy products requires **CIP cleaning** of all the pipe systems where the milk flows, as well as cleaning the milking stations (in the primary industry) and cleaning the tanks and cisterns where the milk is stored.

They generate inorganic waste associated with milk stone and based on calcium carbonate that precipitates from the milk and organic waste, both fats and proteins that are usual from the manipulation of animal sourced foods.

In these cases the facilities need:

Acidic products for CIP (descalers antifoam agents) Against inorganic incrustations, like **IA-723** (specific for milk stone), **IA-720** and **IA-730**

Depending on the activity, alkaline-alkaline chlorine detergents for CIP, in order to clean the organic remains **IA-751** or clean and disinfect **IA-700**

On occasions, foaming agents for the storage tanks, to attack dirt remains **I-544**, **IA-745** or alkaline chlorine **IA-703C**

For filling cleaning, in the case of bottles **IA-746**

Or the sanitation of the CIP systems, with peracetic acid from **IA-709** and **IA-710** are an option

Meat Industry

Massfood

Induquim has a range of specific products for slaughter houses, cutting rooms and industries for meat products and prepared meat products.

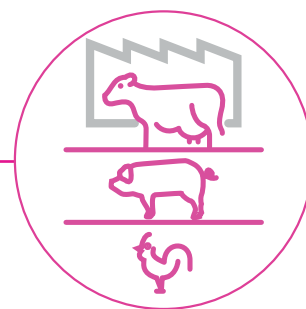

The meat industries accumulate a large amount of organic waste like blood, protein remains and fat. It is a productive activity with continuous work in various shifts that often demand intermediate cleaning and thorough cleaning at the end of the productive day.

Moreover, it is essential to clean utensils, knives, conveyor belts,... that normally have wash down equipment to generate foam to clean the surfaces.

The following is **Induquim's range of products**:

Alkaline chlorine products
foaming agents for general
cleaning and disinfection
IA-703C for work surfaces
floors, walls using foam gene-
rating equipment

Quaternary ammoniums for
machinery and rust sensiti-
ve areas: **Desingras**, **H-331**,
Deterquat, **Biofresh Bac**

Products for temperature
controlled chambers, like
Desingras and specific pro-
ducts for low temperatures
like **IA-761**

Peracetic acid for drains and
surfaces **IA-709** and **IA-710**

On occasions, acidic descaler
for each X time to carry out
cleaning of the mineral rema-
ins and the chemical product
from the repeated cleaning
with water and alkali, like
IA-721

Disinfectant terminal for
cutlery and utensils that en-
sure sanitize after cleaning or
during storage **Microsan**

Fisheries and Canneries

Massfood

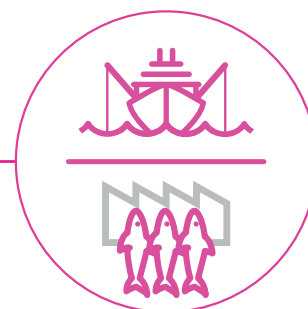

Sector that is characterised for generating organic waste like fat, skin, protein remains and oils from the preserves themselves.

An environment with a high accumulation of dirt along with drag waters from the cleaning, make the floors and surfaces very slippery.

Moreover, there may also be the packing from the preserves. It should be borne in mind that there are raw materials for direct consumption being handled so C+D is of vital importance.

Therefore, the need to use the following should be considered:

Alkaline chlorine products
foaming agents for general
cleaning and disinfection like
IA-703C

Specific products for the tinpla-
te of the preserves **IA-746**

Disinfectant terminal for cut-
lery and utensils **Microsan**

Peracetic acid for drains (high
listeria risk) **IA-709** and **IA-710**

Product for temperature con-
trolled chambers like **Desin-
gras** and specific products for
low temperatures like **IA-761**

For large surfaces, non-
foaming products for floor
cleaning machine like **I-569**

Bakery Industry

Massfood

This is an industry characterised by its large amount of organic waste. High amounts of fat (from the products they make and from greasing the trays to prevent sticking in the oven), burnt fat in the ovens, burnt carbohydrates and sugars, as well as flour.

Important to remove the flour remains before using water to prevent the formation of paste.

Therefore, with these characteristics, it is necessary to use the following:

Alkaline detergents **I-544** or
Alkaline chlorine for cleaning
and disinfecting like **IA-703C**

Peracetic acid for drains **IA-710**

Multiuse degreaser for burnt fat
in the ovens and on the trays,
like **Storm**, **Thunder**, **Gale** or
Multigras

Quaternary ammoniums for
sensitive machinery, pipes or
piping systems and nozzles
where caramel flows, or other
products like cream, **H-331**

Disinfectant terminals for
utensils **Microsan**

Wineries

Massfood

Wine production generates different types of waste depending on whether we are talking about the harvesting tools, the vats and wine recirculation systems, the fermentation barrels or the general cleaning of the facilities.

This is a high quality sector with a lot of exports, with specific limitations like the danger of producing odours that stay in the wines or the need to eliminate the reddish hue of the grape or to remove the tartaric remains that precipitate from the tanks. Therefore, products with different characteristics are necessary:

- foam products for the general cleaning of the facilities, surfaces, floors, exterior of the tanks, harvesting elements...
- anti-foaming agents that facilitate CIP cleaning in the tanks and pipes

- alkaline that eliminate tartaric remains
- acids that eliminate mineral incrustations
- oxidising products that help to eliminate the reddish colour of the grapes from the facilities
- disinfectant solutions that ensure the innocuousness of the produced product

Therefore, the use of the following should be considered:

Non-foaming alkaline detergents for CIP that help to remove the organic remains of the grape and the tartaric
IA-751

Acid descaler non-foaming for CIP that help to remove mineral incrustations **IA-730**

Alkaline chlorinated disinfectant detergente for general cleaning and disinfection of the facilities like **IA-703C**

Alkaline chlorinated disinfectant detergents non-foaming to clean and disinfect the CIP system like **IA-700**

Peracetic acid to sanitise the CIP and to eliminate the reddish pigments of the grape
IA-710

Slightly alkaline degreaser for sensitive surfaces **IA-748**

Beer Industry

Massfood

The elaboration of beer generates a series of specific dirt, especially protein remains, tannins, oils and carbohydrates, as well as inorganic remains like oxalate, which produces "milk stone".

For the correct cleaning of these types of industries the following may be needed:

Alkaline non-foaming agents for CIP that help to remove the organic remains of oils, carbohydrates and tannins **IA-751**

Acid descaler non-foaming for CIP that help to remove oxalate incrustations and other mineral remains **IA-730**

Alkaline chlorinated disinfectant detergent for the general cleaning and disinfection of the facilities **IA-703C**

Alkaline chlorinated disinfectant detergent non-foaming to clean and disinfect the CIP system like **IA-700**

Peracetic acid in the case of opting to use this product **IA-710**

Fruits and vegetables

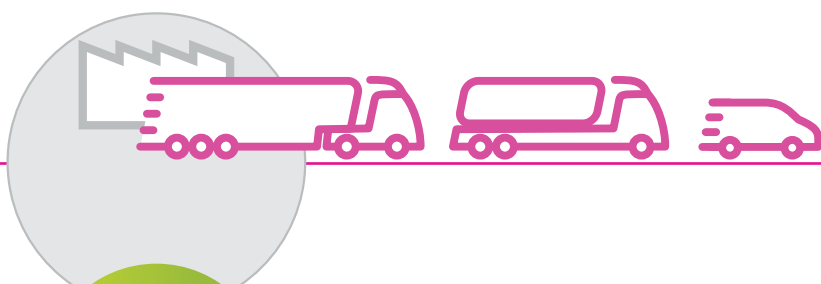

Massfood

In the fruit and vegetable storage process, cleaning is not usually a well developed factor due to the fact that they are not handled much. Normally, cleaning is focused on the chambers, the boxes and on the conveyor belts, where very basic protocols are carried out, except when handling products from the pre-prepared or pre-cooked range (which entails greater handling and product packaging). For the cleaning and disinfection of these industrial units the following are normally used:

Alkaline foam detergents
IA-751 or alkaline chlorine
foaming agents **IA-703C**
for the general cleaning and
disinfection and for the boxes

Disinfectant detergents based
on quaternary ammonia to
clean the conveyor belts clas-
sifiers, processing machinery...
where the foods pass **Desincol**

Transport

To disinfect the aluminium trailers of the transport vehicles, quaternary ammoniums are necessary, like **H-331** or alkaline detergents with a disinfectant terminal.

Be careful with the chlorine as it generates rust on the aluminium.

Massfood Food Sector

I-543

Foaming degreaser

Specially for the removal of all kinds of grease when hosing down as its foam sticks to vertical surfaces. The product consequently spends more time in contact with the dirt.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
11.0-13.0	CHARACTERISTIC	1.014-1.034	5	10	20	  

I-544

Powerful foaming degreaser

Powerful degreasing product. Contains special surfactants that dissolve grease and protein residues easily. Includes foam activating products, being its application appropriate in foam generators for hosing down in the food processing industry.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (KILOS)			PACKAGING
11.5-13.5	CHARACTERISTIC	1.177-1.197	6	12	25	  

IA-700

Chorinated disinfectant detergent

Chorinated product designed to clean and disinfect in CIP systems thanks to its non-foaming components. Contains special surfactants that dissolve grease and protein residues easily.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
12.0-14.0	CHARACTERISTIC	1.200-1.220	10	20		 

IA-701

Foaming chlorinated sanitizer detergent

Powerful degreaser and sanitizer for cleaning and sanitizing very greasy and limescaled surfaces on which conventional products do not work. Ideal for hosing down due to its great foaming capacity.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
11.5-13.5	CHARACTERISTIC	1.141-1.161	10	20		 

IA-703C

Chlorinated disinfectant cleaner

Product designed to clean and disinfect very greasy and limescaled surfaces. Foams very well.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (KILOS)			PACKAGING
10.5-12.5	CHARACTERISTIC	1.038-1.058	10	20		 

IA-745

Self-foaming caustic detergent

Very powerful foaming product to remove strong dirt and scale produced by animal fat, vegetables, proteins and fats.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (KILOS)			PACKAGING
11.5-13.5	CHARACTERISTIC	1.210-1.230	12	25		 

**IA-747****Detergent for stubborn surfaces**

Slightly alkaline product specially designed to clean floors, walls, food preparation surfaces and equipment as well as plastics and soft metals such as aluminium. Ideal product for soaking or washing by hand.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)		PACKAGING
11.5-13.5	CHARACTERISTIC	1.013-1.033	10	20	 

**IA-748****Concentrated slightly alkaline detergent**

Concentrated powerful degreaser especially on porous surfaces thanks to its penetrating power. Includes surfactants that dissolve dirt. Recommended for cleaning equipment and utensils as well as floors, walls and many work surfaces.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)		PACKAGING
8.0-10	CHARACTERISTIC	1.014-1.034	10	20	 

Massfood Food Sector

IA-721

Foaming acid descaler and degreaser

Product for cleaning dried grease on which conventional products do not work. Special composed of acids that hydrolise the grease and surfactants that dissolve easily. Suitable for removing mineral and protein scale deposits and grease.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
1.0-3.0	CHARACTERISTIC	1.170-1.190	10	20		 

Microsan

Terminal disinfectant

Product designed with ingredients based on quaternary ammonium salts. Wide ranging terminal disinfectant. Product suitable for plants, equipment, installations and utensils. Powerful disinfection without leaving residues, smells or a fragrance.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
7.0-9.0	ODORLESS	0.974-0.994	5	10	20	  

Deterquat

Sanitising detergent for equipment and utensils

Designed with quaternary ammonium salt based ingredients for cleaning and sanitising surfaces, equipment and utensils. High dirt-removal capacity, thanks to its active low-alkalinity ingredients and surfactants. It does not damage the treated surfaces.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
9.5-11.5	ODORLESS	1.021-1.041	5	10	20	  

Desingras

Fast acting disinfectant and detergent

Product formulated to clean and disinfect hard surfaces (tables, counters, worktops, tiles, etc.). Suitable for surfaces on which water-based products are inappropriate. This product disinfects quickly.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
9.0-11.0	ODORLESS	0.984-1.004	1	5	10	20

H-331

Disinfectant and detergent for surfaces

Product specially formulated to disinfect utensils and any surface. A powerful concentrated deodoriser including surfactants so it removes accumulated dirt easily. Product suitable for use in the food processing industry.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
12.0-13.5	ODORLESS	1.006-1.026	5	10	20	  

Biofresh Bac

General disinfectant and cleaner

Product with long-lasting triple action: polishes, disinfects and fragrances. Combines disinfection and polishing with cleaning of the surface all with pleasant fragrancing of all the surrounding environment. Includes surfactants and solvents to dissolve the dirt. For all hard surfaces such as floors, tables, desks, tiles, etc. Suitable for use in the food processing industry.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
6.0-8.0	CITRIC	0.977-0.997	1	5	10	20

IA-719

Atomising sanitizer

Spray product designed to sanitize surfaces in the food processing industry. Alcohol based, evaporates quickly and with no need for rinsing. Ideal for use on surfaces for which water-based solutions are inappropriate or in areas which are difficult to access.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)				PACKAGING
7.0-9.0	CHARACTERISTIC	0.951-0.971	1	5	10	20	   

IA-751

Non-foaming caustic detergent

Non-foaming product specially designed for removing organic dirt in a wide range of applications such as washing bottles, CIP systems and spraying systems. Prevents formation of scaling.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
12.0-14.0	CHARACTERISTIC	1.455-1.475	20 LITRES	

IA-720

Neutralising circuit cleaner

Powerful highly effective product composed of an acid mixture that removes grease, protein residues and inorganic dirt when cleaning by hand, soaking or using CIP systems. Contains moisturisers that facilitate access of the product to dirt and further rinsing.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
1.0-3.0	CHARACTERISTIC	1.408-1.428	20 LITRES	

IA-730

Acid detergent for CIP

Highly effective descaler for removing difficult dirt and scaling in the food and drinks industry using CIP systems.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
0-2.0	CHARACTERISTIC	1.267-1.287	25 KILOS	

IA-723

Acid descaler

Product formulated to remove inorganic scale in CIP applications in the food and drinks industry. Ideal for removing beerstone residues. Its low foaming components make it suitable for cleaning in conditions of high pressure and turbulence.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
1.0-3.0	CHARACTERISTIC	1.202-1.222	25 KILOS	

IA-709

15% peracetic acid based sanitizer

Product designed to clean and sanitize in the textile and food processing industries. Powerful oxidising action for stain removal. Ideal for automatic dosing in CIP systems using both hard and soft water. Product contains very powerful microbicide action.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS	PACKAGING
0.0-2.0	CHARACTERISTIC	1.140-1.160	25 KILOS	

Massfood Food Sector

IA-710

5% peracetic acid based sanitizer

Product designed to clean and sanitize in the textile, milk and food processing industries. Powerful oxidising action for stain removal. Ideal for automatic dosing in CIP systems using both hard and soft water.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS			PACKAGING
0.0-1.0	CHARACTERISTIC	1.090-1.110	25 KILOS			25 KILOS

IA-715

Tunnel detergent for soft water

Product suitable for removing organic residues, proteins, albumin, etc. on baking tins, boxes and trays by means of cleaning tunnels. Contains lime sequestrant and magnesium in the water to avoid limescale in nozzles, elements and piping. Ideal for soft water.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (KILOS)			PACKAGING
12.0-13.5	CHARACTERISTIC	1.180-1.200	6	12	25	6 KILOS, 12 KILOS, 25 KILOS

IA-716

Tunnel detergent for hard water

Product suitable for removing organic residues, proteins, albumin, etc. on baking tins, boxes and trays by means of cleaning tunnels. Contains lime sequestrant and magnesium in the water to avoid limescale in nozzles, elements, and piping. Ideal for very hard water.

8.0-10.0	CHARACTERISTIC	1.049-1.069	5	10	20	  

DF Bac

Unscented sanitizing hand gel

pH neutral product sanitizing and protecting the hands. Its pH and the inclusion of protective agents moisturises the hands and avoids irritation. Being unfragranced, it is ideal for the food processing industry.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
5.5-6.5	ODORLESS	1.008-1.028	5	10	20	  

Hydrogel

Hydroalcoholic hand gel

Product for cleaning and sanitizing the hands with no need for rinsing. The product spreads on the hands and cleans, disinfects and dries instantaneously.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
6.0-8.0	ODORLESS	0.872-0.892	5	10	20	  

Natural foamer

Portable tank for manual generation of foam in small areas like kitchens and bakeries.

Foam cannon

Tank of 24 or 50 LITRES with compressed air connection to foam simple facilities where large amounts of water are not required.

Satellite cleaning

Wall unit with network water connection and to compressed air in order to foam and rinse at low and medium pressure.

Satellite mobile

Mobile cleaning unit that allows you to foam and rinse with network pressure while moving around the facilities.

Booster GRI 5

Network water over-pressure equipment that allows C+D to 20 bars (medium pressure), improving the cleaning results in large facilities.

Vehicle Sector

Induquim has a wide range of products to clean and maintain every kind of vehicle. We offer a product for each need, exterior and interior cleaning, with delicate cleaning of all parts of the vehicle and excellent results.

All of the fragrances used in automobile interior cleaning products have been carefully developed to provide a pleasant and unmistakable long lasting aroma.

There are products for all kinds of dirt and stains in this field. We offer detergents for bodywork, wheel polishers, windscreen washers, insect repellents, surface degreasers, etc. All of these provide a full service of unbeatable quality. This product range guarantees durability and maintenance so spending less money is also guaranteed.

Dry EX
Vehicle bodywork cleaner **without water**

Concentrate with latest generation waxes and silicon to clean all types of bodywork without having to use water. Its high quality ingredients offer a protective layer that delays the adhesion of dirt and facilitates posterior cleaning.

pH	PERFUME	DENSITY (kg/l)	SALE FORMATS (LITRES)			PACKAGING
10.0-12.0	CHARACTERISTIC	0.982-1.002	1	5	20	  

Dry EX
PROFESSIONAL

Shampoo PRE

Vehicle bodywork prewash detergent

A-411E

Highly effective product for pre-washing vehicles at the entrance to cleaning tunnels. Does not attack the paintwork or rubber parts.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
10.5-12.5	CHARACTERISTIC	1.048-1.068	5	10	20	  

Shampoo CR

Vehicle bodywork shampoo

A-410

Concentrated product specially designed for washing the bodywork of cars, lorries, buses and trailers in a cleaning tunnel or manually. Contains glycoles and surfactants that dissolve the grease and oil so that it cleans and moisturises in order for the product to access the dirt and the remains of insects stuck on surfaces and remove them easily.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
7.0-8.0	CITRIC	1.017-1.037	5	10	20	  

Shampoo AE

Shampoo with foam activator

A-412

Product suitable for washing lorries, buses, coaches, trailers, etc. in the cleaning tunnel or manually. For cleaning engines, inside the passenger compartment, bodywork, etc. Does not attack the vehicle's paintwork or its rubber parts. Very concentrated and foams well.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
9.0-11.0	CITRIC	1.019-1.039	5	10	20	  

Box L

Vehicle bodywork cleaner for boxes

A-411

Powerful vehicle bodywork cleaner for cleaning tunnel boxes. Removes all dirt effortlessly and avoids rubbing harmful to the vehicle's paintwork. Does not harm any part of the vehicle.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
10.5-12.5	CHARACTERISTIC	1.101-1.121	5	10	20	  

Box S

Vehicle bodywork cleaner for boxes in powder

Rapid dissolving bodywork cleaner for cleaning tunnel boxes. Removes all dirt effortlessly and avoids rubbing harmful to the vehicle's paintwork. Does not harm any part of the vehicle.

pH	PERFUME	SALE FORMATS			PACKAGING
NP	LIME	SAC 5 KILOS			

Shampoo EN

Powerful industrial vehicle cleaner

A-413C

Product specially designed for cleaning the bodywork of cars, lorries, buses, coaches, lorry cabins, vans, minibuses etc. in automatic and hand washing installations. Does not harm paintwork. Very concentrated with powerful antistatic properties so ideal for washing motorbikes.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
10.5-12.5	CHARACTERISTIC	1.100-1.120	5	10	20	  

Massauto Vehicle Sector

Hydrocer

Tunnel water repellent wax

A-422

Slightly alkaline product ideal for rinsing in cleaning tunnels. Does not harm paintwork and rubber containing parts. Contains cations that make the product a powerful cleaner and neutralises the action of washing products. Its sequestrant ingredients set up the rinsing water by removing any limescale. Powerful water repellent, decreases the surface tension forming larger drops of water that are removed more easily. Contains amphoterics that improve the bodywork's shine. Facilitates the drying of the bodywork.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
3.5-4.8	CHARACTERISTIC	0.986-1.006	5	10	20	

Desoil PF

Powerful fragranced cleaner

A-414

Powerful product for cleaning all floors and internal surfaces of an automobile (sunroofs, dashboards, mouldings, etc.). Does not harm PVC, rubber, cement, asphalt, etc. surfaces.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
10.0-12.0	MENTHAL PINE	1.047-1.067	5	10	20	

Desoil XP

Low foaming surface degreaser

A-414L

Product suitable for cleaning inside vehicles (seats, sunroofs, dashboards, etc.). Its latest generation components penetrate the dirt without foaming. It does not harm PVC, vinyl, linoleum or rubber surfaces. Suitable for cleaning with automatic scrubbing machines when the surface dirt has become encrusted.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
10.0-12.0	CHARACTERISTIC	1.055-1.075	5	10	20	

Autotal

Super powerful degreaser

A-432

Designed to remove all kinds of oil and grease in mechanical repair shops, petrol filling stations, etc. Does not attack the vehicle's paintwork. Removes grease from filters, engines, bodywork, floors, tiles, tools, worktops, etc. Contains alkaline components that together with other components work powerfully against dirt but are gentle on the surface.

pH 1%	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
10.5-12.0	CHARACTERISTIC	1.055-1.075	5	10	20	

Gum

Chewing gum and sticker adhesive remover

A-438

Product composed of totally natural solvents obtained from citric extracts and used for removing stickers and chewing gum from any surface. Do not apply to rubber or plastic surfaces that are not resistant to solvents.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
NP	CITRIC	0.796-0.816	650 ml	5		

Petrol

Powerful engine cleaner

A-451

Product composed of powerful solvents that remove all kinds of oil and grease including the most encrusted. It emulsifies grease facilitating its removal by rinsing. Removes grease from filters, engines, bodywork, floors, glazed floor tiles, floors, etc. Product does not contain soda. Soluble in water and diesel. It does not harm plastic or rubber.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
NP	CHARACTERISTIC	0.786-0.806	5	10	25	

Energihand

Powerful soap for mechanicals

A-475

Powerful hand degreaser without damaging them. Removes any kind of grease from the hands, even the most encrusted. Cleans the hands by dissolving the grease in the pores of the skin while softening and keeping the skin at an appropriate Ph. Includes lanolin and coconut oil to soften and hydrate the hands. Concentrated product that can be diluted.

pH	PERFUME	DENSITY (Kg/l)	SALE FORMATS (LITRES)			PACKAGING
8.5-9.5	ORANGE	1.051-1.071	5	10	20	

Mecapast Extra

Extra orange cream for mechanicals

A-478N

Product suitable for deep cleaning of greasy hands. Composed of solvents obtained from citric extracts, cleans and protects the hands effortlessly. Contains microgranules that improve its cleaning action. Includes cosmetics protectors for the hands.

pH 1%	PERFUME	SALE FORMATS (LITRES)	PACKAGING

Graffit

Graffiti cleaner

Latest generation product, made up of a mixture of high quality solvents that penetrate the capillarity of the paint layer, eliminating its porous support without damaging it. Does not contain abrasive ingredients that attack the surfaces. Thanks to its viscous nature, it removes layers of paint and graffiti in porous surfaces, ideal to clean spray paint and markers from walls of surfaces with a difficult access structure like, for example: fired clay, concrete, brick or asphalt.

pH	PERFUME	COLOUR	DENSITY (Kg/l)	SALE FORMATS (LITRES)		PACKAGING
NP	CHARACTER.		1.019-1.039	5	25	METAL

Graffit SP

Porous surface graffiti cleaner

Made up of a mixture of solvents that penetrate the layer of paint through capillarity, eliminating it from porous surfaces without damaging it. Induquim assigns a prominent place in its product ranges that cannot but be dedicated to the **environment**.

We at **Induquim** firmly believe in **corporate social responsibility** of companies so we have developed a product line with **European Union ECOLABEL certification** minimising its environmental impact and meeting environmental requirements.

Advantages of ECOLABEL certification:

- We can let our clients know that our products are more environmentally friendly than others with similar functions and specifications.
- This is a public label compatible with other national systems of ecological labelling and is valid and recognised in all Member States of the European Union, irrespective of in which country said certification has been obtained.
- The ecological criteria established to get the certification are decided objectively by official public organisations as they are not subject to commercial pressure.
- The label shows verified information about the environmental impact of the product throughout its life.

In addition to achieving other ecological requirements (raw materials used, concentrations, specification of containers...), this label is only granted to products that guarantee at least a similar efficiency compared to conventional products. **Induquim** has carried out tests with respect to its formulations at certified laboratories in order to prove said efficiency before the competent bodies.

Massnature Ecological products

Ecofresh
