

I1-R

Machine model I1-R

AquaQlean® I1-R INDOOR Machine

Compact cleaning machine from 2 mm stainless steel housing carried out with a 2 liter liquid tank.

Particularly user-friendly, easy to move and specially designed to clean inside a building windows and walls. Standard equipped with pump, remote control, 3 meter hose with filter, charger and deep discharge protection. Hose can be extended as required.

Working height up to 15 meters.

IMPORTANT

At normal to high pollution a very satisfactory result is achieved with the AquaQlean I1-R machine. Using mineral free water or AquaQlean INDOOR FLUID many contaminants, even dried grease can be removed smoothly and easily without leaving behind streaks.

Application of the AquaQlean INDOOR system results in a clear time saving and less physically demanding compared to the conventional methods.

Conventional cleaning often requires double the working time and at hard to reach high windows even tenfold.

Furthermore, the AquaQlean I1-R machine gives the possibility to perform without using ladder, platform or scaffold.

A conventional cleaning method clearly requires more work time and higher costs.

SPECIFICATIONS

- 3 M. PU 8x6 single hose with filter, endstop (female connector)
- Remote operation
- Maintenance free battery 7 Ah
- Material: stainless steel
- Pump 12V
- Fully automatic 12V charger (**NOT** build in)

TECHNICAL SPECIFICATIONS

Voltage	V	12
Maximum temperature (incoming water)	°C	50
Minimum temperature (incoming water)	°C	5
Pump pressure	bar	2
Total length	cm	13
Total width	cm	23
Total height	cm	24
Total weight	kg	5
