We understand clean!

OneStep® CoMopp is our patented innovation.

The CoMopp is a combination of:

Microfiber and the well-known Combo-Pad.

This innovative mop eases work. In one operation the dirt is broken up with the Combo-Melamine and absorbed by the microfiber.

So one Mop for two jobs!

OneStep® CoMopp is universally applicable on all hard floors and resilient floor coverings.

The cleaning's efficiency is immediately visible, guaranteeing excellent operating economics.

The CoMopp is made of high-quality components and is manufactured in Germany.

The Combo-Melamine strip is firmly held to the CoMopp by Velcro® strip and can easily be removed.

The microfiber mop can be washed.
