New important features in our range of marine toilets

An upgraded version of ocean marine toilets will be available starting from June 2014.

These toilets have got a soft close seat to prevent any noise that could disturb the sleep and the peacefulness of the people onboard.

Luxury toilets are equipped with Duroplast seat and lid with quick-release as standard. The quick-release system enables the removal of the whole seat unit on the touch of a button. This makes the cleaning of all toilet spots otherwise hard to reach much easier.

New flushing system available for the whole range of Ocean technologies toilets. This new intake elbow with innovative spray nozzle maximizes hygiene thanks to the high pressure water jet.

Now cleaning will be faster and better and finally covering 100% of the bowl rinse surface.

New important features in our range of marine toilets

Our new flushing system will be available on all bowl versions as from jan 2015. Upon request you can have it already in June 2014, but only for given models. Do not hesitate to contact us for more details. All bevelled-shaped Luxury and Deluxe toilets will maintain the old flushing system which we have been using till now

A new soft close seat in Duroplast with quick-release system will be available on Luxury toilets starting from June 2014; from September this seat version will take the place of the existing soft close wooden seats on all Luxury toilets

A new soft close seat in ABS for comfort bowls will be available starting from June 2014; from September this seat version will take the place of the existing soft close comfort wooden seats on all comfort toilets

Starting from January 2015 Deluxe standard and low WC will be discontinued models, in order to have all the bowl versions equipped with new soft close seats

Should you require a bidet fitting for Deluxe and Luxury toilets please note that in this case the toilet will be supplied with bidet and with the standard classic wooden seat without soft close (not suitable to this particular installation)..
