

REBORN FLOORS KGS DIAMOND bri

KGS DIAMOND brings into cleaning solutions a revolutionary concept in floor maintenance. When cleaning is just not enough, you can now restore!

Bring a worn floor back to life, remove light scratching from daily usage or recover your floor's lost gloss.

The KGS RENOVATOR™ GREEN system is a simple, user-friendly and multifunctional program designed to be used without the need of any special equipment or chemicals.

User-Friendly

KGS RENOVATORTM GREEN can be used on large areas, on any scrubber drier with a pad drive plate or under single head machines for small areas. Its unique design allows the discs to work on uneven floors and its reinforced long hook keeps the discs in place throughout the whole of the process. Just fix them on the pad, fill up the tank with water and you are ready to go, no chemicals required!

System Versatility

The system is versatile and adaptable for different floors, conditions and finishes. Depending on the situation, grits can be skipped or added for perfect results.

KGS RENOVATORTM GREEN can be used on most kinds of soft stones like terrazzo, concrete, marble and travertine.
