

KGS RENOVATOR™ STANDARD System

Your floor, Our challenge!

REBORN FLOORS

KGS DIAMOND brings into cleaning solutions a revolutionary concept in floor maintenance. When cleaning is just not enough, you can now restore!

Bring a worn floor back to life, remove light scratching from daily usage or recover your floor's lost gloss.

The KGS RENOVATOR™ STANDARD system is a simple, user-friendly and multifunctional program designed to be used without the need of any special equipment.

User-Friendly

KGS RENOVATOR™ STANDARD can be used on large areas, on any scrubber drier with a pad drive plate or under single head machines for small areas. Its unique design allows the discs to work on uneven floors and its reinforced long hook keeps the discs in place throughout the whole of the process. Just fix them on the pad, fill up the tank with water and you are ready to go!

System Versatility

The system is versatile and adaptable for different floors, conditions and finishes. Depending on the situation, grits can be skipped or added for perfect results. KGS RENOVATOR™ STANDARD can be used on most kinds of soft stones like terrazzo, concrete, marble and travertine.

KGS RENOVATOR™ STANDARD System

Terrazzo with the RENOVATOR™ STANDARD system, including the 4 RENOVATOR™ discs and the KGS polishing powder. Gloss level: 92%. Safe slip test result: 132.
