

NMEA 2000® Networking

Actisense® aim to be the installer's product of choice by making navigation safer with the most reliable boat electronic systems.

Our range of products are developed to industry standards and to a high level of quality and technical sophistication.

With our excellent Customer and Technical Support, we offer the products and service you'd expect from an industry leading brand.

We take great pride in our intelligent design and exacting manufacturing standards, ensuring the products we develop are the products you want and need.

"intelligent products that exceed the NMEA standards"

Phil Whitehurst, **C.E.O**

Our range of NMEA 2000® Micro connectors and cables has been designed using our specialist NMEA knowledge.

The 'A2K' range is developed alongside our other products to ensure optimum performance and 100% compatibility is maintained

This specialist range of products work seamlessly together with other manufacturer's products that use DeviceNet standards.

We have been representing Actisense in the US market for over 10 years now. Actisense offer one of the most

complete NMEA2000 product lines available. Seemingly simple items like their T connectors with dual attachment points and built-in standoff, or the innovative and flexible NGW-1 NMEA0183 to NMEA2000 data converter have shaped this market segment and accelerated adoption of the NMEA2000 protocol. Actisense has taken a defining leadership role in our industry and we are so proud to be representing them.
